10 importance of civic education: The Rise and Fall of Civic Education Michael Learn, 2024-09-16 Social studies is a field in crisis. The crisis stems from failure to establish the very foundation of social studies' purpose in public education: civic education. Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education. This issue has disrupted the field since the early days. As educators sought to include civic education within public schools as a dedicated field, social studies evolved into a blending of history, social sciences, and civic education. Social studies' evolution never resolved the differences between the three, with each discipline striving to control the narrative. Instead of creating a unified field, the disciplines devalued social studies and thus any discipline associated with it. *The Rise and Fall of Civic Education: The Battle for Social Studies in a Shifting Historical Landscape* investigates the changing definitions and purposes ascribed to social studies in the United States through time. This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies.

10 importance of civic education: Public School Literature, Civic Education and the Politics of Male Adolescence Jenny Holt, 2016-12-05 During the nineteenth and early twentieth centuries, British society gradually began to see 'adolescence' as a distinct social entity worthy of concentrated study and debate. Jenny Holt argues that the social construction of the public schoolboy, a figure made ubiquitous by a huge body of fictional, biographical, and journalistic work, had a disproportionate role to play in the development of social perceptions of adolescence and in forming ideas of how young people should be educated to become citizens in an age of increasing democracy. With attention to an admirably wide range of popular books as well as examples from the periodical press, Jenny Holt begins with a discussion of the ideas of late-eighteenth-century social radicals, and ends with the First World War, when the more 'serious' public school literature, which sought to involve juvenile readers in complex social and political issues, declined suddenly in popularity. Along the way, Jenny Holt considers the influence of Victorian Evangelical thought, Social Darwinism, and the early-twentieth-century National Efficiency movement on concepts of adolescence. Whether it is shedding new light on well-known texts by Thomas Hughes and Rudyard Kipling, providing a fascinating discussion of works written by boys themselves, or supplying historical context for the development of the concept of adolescence, this book will engage not only scholars of childhood and children's literature but Victorianists and those interested in the history of educational practice.

10 importance of civic education: We Want to Do More Than Survive Bettina L. Love, 2019-02-19 Winner of the 2020 Society of Professors of Education Outstanding Book Award Drawing

on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life's work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, *We Want to Do More Than Survive* introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.

William Toledo details how the design team wrote and taught this curricular unit in the midst of contentious socio-political contexts and how themes from these greater contexts entered classrooms, along with proposing conceptual frameworks for teaching civic perspective-taking in these instances.
