be smith interim leadership: Customer first programme Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2010-12-07 Under the Customer First Programme, delivery of grants and loans to higher education students in England is being transferred from local authorities to the Student Loans Company (the Company), a non-departmental public body of the Department for Business, Innovation and Skills (the Department). In 2009 the Company began assessing applications from new students; by 2011 it will be responsible for applications from all students in England. Performance in processing applications and communicating with students in this first year was completely unacceptable. Many students waited weeks or months for their financial support. Fewer than half of all applications were fully processed by the start of term, and applications took on average a third longer to process than local authorities had achieved. The Company answered fewer than half the calls it received in 2009; in September 87% of calls went unanswered. Disabled students suffered disproportionately in 2009, as the Company devoted too few staff to processing their applications. The Company also demonstrated a number of IT failings in 2009: most importantly, it did not sufficiently test its crucial document scanning - the failure of which was the catalyst for the failure of the entire system. The Department underestimated the risks in centralising the service, the Programme Board lacked skills and experience, and there was poor communication between the Programme Board, the Company's Board, and the Department. There has been limited improvement in 2010 but uncertainties remain over the Company's ability to deliver and maintain a service that provides value for money.

Richard E. Bennett presents new facts and ideas that challenge old assumptions—particularly that life on the frontier encouraged American individualism. With an excellent command of primary sources, Bennett assesses the role of women in a pioneer society and the Mormon strategies for survival in a harsh environment as they planned their emigration, coped with internal dissension and Indian agents, and dealt with tribes of the region. This was, says Bennett, “Mormonism in the raw on the way to what it would be later.” Now available in paperback for the first time, with a new introduction by the author, *Mormons at the Missouri* received the Francis M. and Emily Chipman Award from the Mormon History Association and was honored as a Choice Outstanding Academic Title by the American Library Association.

be smith interim leadership: The Tories Timothy Heppell, 2014-03-13 This book offers a comprehensive and accessible study of the electoral strategies, governing approaches and ideological thought of the British Conservative Party from Winston Churchill to David Cameron. Timothy Heppell integrates a chronological narrative with theoretical evaluation, examining the interplay between the ideology of Conservatism and the political practice of the Conservative Party both in government and in opposition. He considers the ethos of the Party within the context of statecraft theory, looking at the art of winning elections and of governing competently. The book opens with an examination of the triumph and subsequent degeneration of one-nation Conservatism in the 1945 to 1965 period, and closes with an analysis of the party's re-entry into government as a coalition with the Liberal Democrats in 2010, and of the developing ideology and approach of the Cameron-led Tory party in government.

be smith interim leadership: *Leadership and Cultural Change* Ramona Houmanfar, Mark Mattaini, 2018-10-16 Contemporary confluences of leadership decision-making and citizenship behavior often unintentionally contribute to the depletion of the world's resources - escalating health, education, and social crises, as well as community, societal, and cultural struggles - to adapt to emerging global shifts. Leadership and management practices in this context affect the wellbeing of organizational members (e.g., their safety, health, financial security, etc.) but also entail positive or negative impacts on consumer practices and collective community well-being (e.g., education, obesity, cancer, safe or green driving, energy conservation, diversity based health care, etc.). Decision-making in most businesses and organizations is largely responsive to demands for short-term profit or cost minimization. On the consumer side, both cultural values and the corporate marketing practices that sustain them encourage high levels of consumption necessary to sustain corporate practices. In exploring the emerging applications of behavior science to these challenges, this book showcases emerging work by internationally recognized scholars on leadership and cultural change. The book will aid organizations and leaders in creating new models of stewardship, and will open opportunities for innovation while adapting and responding to growing social upheaval, technological advances, and environmental concerns, as well as crises in the global economy, health, education, and environment. This book was originally published as a special issue of the Journal of Organizational Behavior Management.

The author has taken three analytical concepts- the goals' continuum, the strategic options' continuum and the interaction within and between the three levels of the conflict system.
