better living through chemistry dupont

better living through chemistry dupont is a phrase that has become synonymous with innovation, progress, and the transformative power of chemical science. DuPont, a global leader in the chemical industry, has long been dedicated to improving everyday life through groundbreaking research and sustainable solutions. This article explores the history, impact, and future prospects of DuPont's contributions to society, highlighting how its commitment to better living through chemistry has shaped industries and enhanced quality of life worldwide. From advanced materials to agricultural innovations, DuPont's legacy is a testament to the potential of chemistry to address global challenges. The following sections will delve into the origins of the slogan, key innovations, sustainability efforts, and the company's role in modern science.

- The Origins and Significance of "Better Living Through Chemistry"
- DuPont's Major Innovations and Contributions
- Sustainability and Environmental Responsibility at DuPont
- The Role of DuPont in Modern Chemical Science
- Future Directions for Better Living Through Chemistry

The Origins and Significance of "Better Living Through Chemistry"

The phrase "better living through chemistry" originated in the mid-20th century as a marketing slogan that encapsulated the promise of chemical innovation to improve human life. DuPont, a pioneer in chemical manufacturing, adopted this slogan to communicate its vision of enhancing daily living through scientific advancements. The expression reflected optimism about the ability of chemistry to solve problems ranging from health and safety to convenience and comfort.

Historical Context and Adoption by DuPont

In the post-World War II era, the chemical industry experienced rapid growth, and DuPont was at the forefront of this expansion. The slogan was popularized during the 1940s and 1950s, coinciding with the introduction of numerous synthetic materials and chemical products. These innovations revolutionized industries such as textiles, automotive, and agriculture, offering new possibilities that were previously unattainable.

Impact on Public Perception of Chemistry

The slogan played a key role in shaping public attitudes towards chemistry, fostering trust and excitement about scientific progress. It emphasized chemistry's practical benefits, such as improved household products, safer materials, and enhanced food production. However, over time, the phrase also sparked debate about environmental and health concerns related to chemical usage, prompting a more balanced understanding of the industry's responsibilities.

DuPont's Major Innovations and Contributions

DuPont's legacy in better living through chemistry is marked by numerous groundbreaking inventions and contributions across multiple sectors. The company's commitment to research and development has delivered materials and solutions that have transformed everyday products and industrial processes.

Polymer and Material Science Breakthroughs

DuPont is renowned for its development of synthetic polymers such as nylon, Kevlar, Teflon, and Lycra. These materials have become integral to various applications due to their durability, flexibility, and unique properties. For example, Kevlar is widely used in protective gear and aerospace, while Teflon has revolutionized non-stick cookware and industrial coatings.

Agricultural Innovations

In the agricultural sector, DuPont has played a significant role in enhancing crop yields and pest management through chemical solutions. The company's development of herbicides, insecticides, and seed treatments has contributed to more efficient and sustainable farming practices, supporting global food security.

Industrial and Consumer Products

Beyond materials and agriculture, DuPont's chemical expertise extends to electronics, automotive components, and consumer goods. Innovations in coatings, adhesives, and specialty chemicals have improved product performance and lifespan, contributing to better living standards worldwide.

- Nylon revolutionized textiles and manufacturing
- Kevlar enhanced personal safety and defense
- Teflon transformed cooking and industrial applications
- Advanced polymers for electronics and automotive industries

Sustainability and Environmental Responsibility at DuPont

Reflecting evolving societal expectations, DuPont has increasingly prioritized sustainability in its pursuit of better living through chemistry. The company recognizes the environmental impacts of chemical production and strives to develop eco-friendly technologies and reduce its carbon footprint.

Commitment to Green Chemistry

DuPont invests in green chemistry initiatives that focus on designing products and processes that minimize hazardous substances and waste. This approach aims to create safer chemicals that maintain performance while reducing environmental and health risks.

Energy Efficiency and Emission Reductions

The company has implemented measures to improve energy efficiency across its operations, targeting reductions in greenhouse gas emissions and resource consumption. DuPont's sustainability goals align with global efforts to combat climate change and promote responsible industrial practices.

Collaborations and Global Impact

DuPont collaborates with governments, NGOs, and industry partners to advance sustainability standards and share innovations. These partnerships enable the company to contribute to large-scale environmental solutions and support communities worldwide.

The Role of DuPont in Modern Chemical Science

DuPont remains a leader in chemical research, continuously pushing the boundaries of science to deliver innovative solutions. The company integrates advanced technologies such as biotechnology, nanotechnology, and data analytics to accelerate product development and improve performance.

Research and Development Focus Areas

Key R&D areas include sustainable materials, life sciences, electronics, and safety technologies. DuPont's research teams work to address contemporary challenges such as resource scarcity, environmental protection, and human health, maintaining the company's relevance in a rapidly changing world.

Education and Workforce Development

DuPont supports scientific education and workforce development initiatives to cultivate future generations of chemists and engineers. This investment ensures a continuous pipeline of talent to sustain innovation and uphold the principles of better living through chemistry.

Future Directions for Better Living Through Chemistry

Looking ahead, DuPont is poised to expand its impact by embracing cuttingedge technologies and deepening its commitment to sustainability. The company aims to harness digital transformation, artificial intelligence, and circular economy principles to create more efficient and responsible chemical solutions.

Emerging Technologies and Innovation

Advancements in bio-based materials, smart chemicals, and precision agriculture represent promising frontiers for DuPont. These innovations have the potential to further improve quality of life while reducing environmental impact.

Global Challenges and DuPont's Role

As global challenges such as climate change, population growth, and resource depletion intensify, DuPont's role in delivering better living through chemistry becomes increasingly critical. The company's strategic focus on sustainable innovation positions it to contribute meaningfully to a healthier and more resilient future.

Frequently Asked Questions

What does the slogan 'Better Living Through Chemistry' mean in relation to DuPont?

The slogan 'Better Living Through Chemistry' was used by DuPont to emphasize the positive impact of chemical innovations on everyday life, highlighting how their products and technologies improved health, agriculture, and industry.

Is 'Better Living Through Chemistry' still used by

DuPont today?

No, DuPont has moved away from the slogan 'Better Living Through Chemistry' as the company has evolved and rebranded, focusing more on sustainability and advanced materials rather than just chemical products.

What are some notable products from DuPont that embody 'Better Living Through Chemistry'?

Notable DuPont products include Kevlar, Teflon, Nomex, and various agricultural chemicals, which have contributed to safety, non-stick cookware, protective clothing, and improved crop yields respectively.

Has DuPont faced any controversies related to 'Better Living Through Chemistry'?

Yes, DuPont has faced controversies, particularly related to environmental and health impacts of some chemicals like perfluorooctanoic acid (PFOA) used in Teflon production, leading to lawsuits and regulatory scrutiny.

How did 'Better Living Through Chemistry' influence public perception of the chemical industry?

The slogan helped position the chemical industry, and DuPont specifically, as innovators improving quality of life, but over time growing environmental and health concerns have led to more critical public scrutiny.

What role does sustainability play in DuPont's current corporate philosophy compared to the 'Better Living Through Chemistry' era?

DuPont today emphasizes sustainability, environmental responsibility, and safer chemistry, reflecting a shift from the original slogan's focus on chemical progress to a broader commitment to sustainable innovation.

Additional Resources

- 1. Better Living Through Chemistry: The DuPont Story
 This book delves into the history of DuPont, highlighting how the company
 revolutionized the chemical industry and impacted everyday life. It covers
 major innovations, from nylon to Teflon, and explores how chemistry
 transformed consumer products and industrial processes. The narrative
 showcases the balance between scientific progress and corporate
 responsibility.
- 2. Chemistry and Progress: DuPont's Role in Modern Living

Focusing on DuPont's contributions to modern society, this title examines key chemical breakthroughs that have enhanced quality of life. It discusses the development of sustainable materials, agricultural chemicals, and advanced polymers. The book also touches on the ethical considerations and environmental impact of chemical manufacturing.

- 3. Innovations in Chemistry: DuPont's Path to Better Living
 This book highlights the innovative spirit driving DuPont's research and
 development. It provides an overview of landmark products that changed
 industries such as textiles, electronics, and pharmaceuticals. Readers gain
 insight into how chemistry can solve real-world problems and improve daily
 living standards.
- 4. The Science Behind Better Living: DuPont's Chemical Revolution Exploring the scientific foundations of DuPont's success, this title explains the chemistry behind their most famous inventions. It breaks down complex chemical processes in an accessible way for general readers. The book also discusses the company's ongoing efforts to create safer and more sustainable products.
- 5. DuPont and the Chemistry of Everyday Life
 This book connects DuPont's chemical innovations with the products people use
 every day. From household items to medical devices, it illustrates how
 chemistry enhances convenience, safety, and health. The narrative also
 reflects on the challenges faced by the industry in maintaining public trust.
- 6. Better Living Through Sustainable Chemistry: Lessons from DuPont Focusing on sustainability, this title discusses how DuPont integrates green chemistry principles into its operations. It covers advances in biodegradable materials, renewable resources, and waste reduction methods. The book serves as a case study for how large chemical companies can lead environmental stewardship.
- 7. The DuPont Legacy: Chemistry, Innovation, and Society
 This comprehensive history traces DuPont's journey from a gunpowder
 manufacturer to a global chemical powerhouse. It emphasizes the interplay
 between scientific discovery, corporate strategy, and societal impact. The
 book also profiles key figures who shaped both the company and the chemistry
 industry.
- 8. From Molecules to Markets: DuPont's Impact on Better Living
 This title explores how DuPont translates scientific research into commercial products that improve life quality. It discusses the challenges of scaling up chemical production and meeting consumer needs. The book highlights case studies of successful product launches and market transformations.
- 9. Better Living Through Chemistry: Ethical Challenges at DuPont Addressing the complex ethical issues surrounding chemical manufacturing, this book examines controversies and regulatory battles faced by DuPont. It discusses environmental incidents, worker safety, and product liability. The narrative provides a balanced view of the company's efforts to align

better living through chemistry dupont: "Better Living" William L. Bird, 1999 Better Living: Advertising, Media, and the New Vocabulary of Business Leadership, 1935-1955 is a history of how big business learned to be both entertaining and persuasive when talking to the public. Examining the years from the Depression to postwar prosperity, Better Living follows the dissemination of a politically competitive claim of more, new, and better in industry and in life. Beginning with the changes in business-government relations during the New Deal, this study looks at the ways in which politically active corporations and their leaders learned how to speak - at a time when speaking was not enough. Using archival sources such as the NBC, Ford Motor Company, DuPont, and Franklin Delano Roosevelt collections, William L. Bird, Jr., establishes the importance of industrial films and their role in public relations and employee relations, as well as the use of dramatic radio productions in corporate public relations. The author examines the interplay between general mass radio and print advertising, radio program sponsorship and scriptwriting, sponsored motion pictures and television entertainment, as well as exhibitions and industrial fairs and the role these media played in shaping ideas about American business and political and cultural institutions in this country for the decades to come. --Book Jacket.

better living through chemistry dupont: New York's 1939-1940 World's Fair Andrew F. Wood, 2004 The 1939-1940 New York World's Fair promised a new age of global communication, nationwide superhighways, and suburban living-and it delivered. Crafted by designers such as Walter Dorwin Teague, Norman Bel Geddes, and Raymond Loewy, the twelve-hundred-acre fair in Flushing Meadows sold visitors a streamlined world of consumer goods-teardrop cars and smoking robots, electric dishwashers and nylon stockings-manufactured by companies such as Westinghouse, General Motors, and AT&T. In New York's 1939-1940 World's Fair, insightful narrative accompanies dazzling postcards, advertisements, and illustrations of Democracity, Futurama, the Lagoon of Nations, and the famed Trylon and Perisphere, recalling the promise and optimism of a fair that enchanted forty-five million visitors.

better living through chemistry dupont: <u>Clean(ish)</u> Gin Stephens, 2022-01-04 Clean(ish) leads readers to a focus on real foods and a healthier home environment free of obvious toxins, without fixating on perfection. By living clean(ish), our bodies' natural processes become streamlined and more effective, while we enjoy a vibrant life. In Gin Stephens's New York Times bestseller Fast. Feast. Repeat., she showed you how to fast (completely) clean as part of an intermittent fasting lifestyle. Now, whether you're an intermittent faster or not, Gin shows you how to become clean(ish) where it counts: you'll learn how to shift your choices so you're not burdening

your body with a bucket of chemicals, additives, and obesogens it wasn't designed to handle. Instead of aiming for perfection (which is impossible) or changing everything at once (which is hard, and rarely leads to lasting results), you'll cut through the confusion, lose the fear, and embrace the freedom that comes from becoming clean(ish). As you learn how to lower your toxic load through small changes, smart swaps, and simple solutions, you'll evolve simply and naturally toward a clean(ish) lifestyle that works for your body and your life!

better living through chemistry dupont: Stuff Chip Colwel, 2023-11-16 Over 3 million years ago, our ancestors realised that rocks could be broken apart for sharp edges, to cut and slice meat. The discovery made for a good meal. It also changed the fate of our species and our planet. In this lively and learned book, Chip Colwell charts three great leaps in humankind's relationship with objects and belongings, from the discovery of tools to the production of endless commodities. How did we start out as primates who needed nothing, and end up as people who need everything? With colourful characters, astonishing archaeological discoveries, and reflections from philosophy and culture, Colwell's quest for answers takes readers to places both spectacular and strange: the Italian cave featuring the world's first painted art; a Hong Kong skyscraper where a priestess channels the gods; a mountain of trash whose height rivals Big Ben or the Statue of Liberty. Humans make stuff, but our stuff makes us human—and our love affair with things may be our downfall. With landfills brimming and oceans drowning in plastic, now is the time for a fourth and final leap for humanity: to reevaluate our relationship to the things that make, and could break, our world.

better living through chemistry dupont: Lycra Kaori O'Connor, 2011-04-06 The Anthropology of Stuff is part of a new Series dedicated to innovative, unconventional ways to connect undergraduate students and their lived concerns about our social world to the power of social science ideas and evidence. Our goal with the project is to help spark social science imaginations and in doing so, new avenues for meaningful thought and action. Each Stuff title is a short (100 page) mini text illuminating for students the network of people and activities that create their material world. Lycra describes the development of a specific fabric, but in the process provides students with rare insights into U.S. corporate history, the changing image of women in America, and how a seemingly doomed product came to occupy a position never imagined by its inventors and contained in the wardrobe of virtually every American. And it will generate lively discussion of the story of the relationship between technology, science and society over the past half a century.

better living through chemistry dupont: Fountain Creek Jim O'Donnell, 2024-10-29 Jim O'Donnell sets off from his childhood home in Pueblo, Colorado exploring the history, ecology, and commodification of Fountain Creek—challenging us to reexamine how we relate to the world around us and how we might break free to a brighter future. Over the past two hundred years, society has taken what was once a sacred relationship with water and morphed rivers into trashed, overused commodities. Now, the rivers humans depend on may no longer be up to the task. Now what? The Colorado's Fountain Creek is a waterway that lived through the worst of human interaction. It has been dammed, diverted, poisoned, reduced, and much more and yet, it has endured. Fountain Creek looks both to the past and the future for guidance and asks humans to rethink the relationship with the brooks, streams, creeks, and rivers that give us life.

better living through chemistry dupont: Persuasive Advertising J. Armstrong, 2010-05-26 Written by a leading authority, this book is a comprehensive and definitive guide to advertising that incorporates a vast amount of research and expert opinion. It draws upon the evidence to establish principles that can be applied to achieve successful and effective advertising and evaluates all of the relevant attributes and aspects of this.

better living through chemistry dupont: Rewilding the Way Todd Wynward, 2015-09-01 Get a free chapter here. When did we become so tame? How has "the good life" come to mean addiction to screens and status, fossil fuels and financial fitness? Can we break free to become the joyful and prophetic people God calls us to be? Trek along with wilderness guide Todd Wynward as he "rewilds" the Jesus Way. Seek the feral foundations of Scripture and the lessons that the prophets

and disciples gleaned from wilderness testing. Packed with inspiring stories of how contemporary people and groups are caring for the land and each other, Rewilding the Way issues a call to action. Read about how reskilling and local food covenants are transforming churches, and how place-based activism and creative housing are nurturing communities. Learn from those who are recovering from affluenza, replacing visions of personal wealth with the commonwealth of the earth and restoring their humble place in the community of creation. Do you despair about life on our changing planet? Join the hopeful band of seekers of God and makers of change who are rewilding the Way. Watch an interview with author Todd Wynward:

better living through chemistry dupont: Managing Global Innovation Roman Boutellier, Oliver Gassmann, Maximilian von Zedtwitz, 2013-06-29 Globalization has changed the face of R&D. Local knowledge clusters are not only tapped by multinationals but increasingly by small and medium-sized companies as well. Global R&D networks speed up the evolution of technology and ask for new management concepts. Modern communication technologies create the global village, but customers become more fastidious and request their own specific products, well localized, well tuned into their present business. Integrated technology is required to cope with these needs. The danger of over-engineering has never been as great as today. The question is frequently not whether some new features are technically feasible but whether customers are willing to accept and pay for it. The first edition of Managing Global Innovation was sold out after few months, clearly indicating the search for solutions to these challenges. This second edition has been revised for clarity and actuality. We have taken care to work in recent research findings as well as updating the case studies where appropriate. This book is based on the growing importance of industrial global innovation and the lack of concepts to manage it. For this book we conducted 320 interviews in 40 technology-based, highly internationalized companies, including additional interviews in 1998 and 1999 for the second edition. Dur interview partners were R&D managers and research directors from companies in Europe, USA and Japan.

better living through chemistry dupont: The Advertising Age Encyclopedia of Advertising John McDonough, Karen Egolf, 2015-06-18 For a full list of entries and contributors, a generous selection of sample entries, and more, visit the The Advertising Age Encyclopedia of Advertising website. Featuring nearly 600 extensively illustrated entries, The Advertising Age Encyclopedia of Advertising provides detailed historic surveys of the world's leading agencies and major advertisers, as well as brand and market histories; it also profiles the influential men and women in advertising, overviews advertising in the major countries of the world, covers important issues affecting the field, and discusses the key aspects of methodology, practice, strategy, and theory. Also includes a color insert.

better living through chemistry dupont: Transformative Science Teaching Daniel Morales-Doyle, 2024-05-23 A call to action championing equity and social justice in K-12 science curriculum

better living through chemistry dupont: Synthetic Sophia Roosth, 2017-03-01 In the final years of the twentieth century, émigrés from engineering and computer science devoted themselves to biology and resolved that if the aim of biology is to understand life, then making life would yield better theories than experimentation. Armed with the latest biotechnology techniques, these scientists treated biological media as elements for design and manufacture: viruses named for computers, bacterial genomes encoding passages from James Joyce, chimeric yeast buckling under the metabolic strain of genes harvested from wormwood, petunias, and microbes from Icelandic thermal pools. In Synthetic: How Life Got Made, cultural anthropologist Sophia Roosth reveals how synthetic biologists make new living things in order to understand better how life works. The first book-length ethnographic study of this discipline, Synthetic documents the social, cultural, rhetorical, economic, and imaginative transformations biology has undergone in the post-genomic age. Roosth traces this new science from its origins at MIT to start-ups, laboratories, conferences, and hackers' garages across the United States—even to contemporary efforts to resurrect extinct species. Her careful research reveals that rather than opening up a limitless new field, these

biologists' own experimental tactics circularly determine the biological features, theories, and limits they fasten upon. Exploring the life sciences emblematic of our time, Synthetic tells the origin story of the astonishing claim that biological making fosters biological knowing.

better living through chemistry dupont: They Poisoned the World Mariah Blake, 2025-05-06 A landmark investigation of the chemical industry's decades-long campaign to hide the dangers of forever chemicals, told through the story of a small town on the frontlines of an epic public health crisis In 2014, after losing several friends and relatives to cancer, an unassuming insurance underwriter in Hoosick Falls, New York, began to suspect that the local water supply was polluted. When he tested his tap water, he discovered dangerous levels of forever chemicals. This set off a chain of events that led to 100 million Americans learning their drinking water was tainted. Although the discovery came as a shock to most, the U.S. government and the manufacturers of these toxic chemicals—used in everything from lipstick and cookware to children's clothing—had known about their hazards for decades. In They Poisoned the World, investigative journalist Mariah Blake tells the astonishing story of this cover-up, tracing its roots back to the Manhattan Project and through the postwar years, as industry scientists discovered that these chemicals refused to break down and were saturating the blood of virtually every human being. By the 1980s, manufacturers were secretly testing their workers and finding links to birth defects, cancer, and other serious diseases. At every step, the industry's deceptions were aided by our government's appallingly lax regulatory system—a system that has made us all guinea pigs in a vast, uncontrolled chemistry experiment. Drawing on years of on-the-ground reporting and tens of thousands of documents, Blake interweaves the secret history of forever chemicals with the moving story of how a lone village took on the chemical giants—and won. From the beloved local doctor to the young mother who took her fight all the way to the nation's capital, citizen activists in Hoosick Falls and beyond have ignited the most powerful grassroots environmental movement since Silent Spring. Humane and revelatory, this book will provoke outrage—and hopefully inspire the change we need to protect the health of every American for generations to come.

better living through chemistry dupont: Enchanted by Cinema Jan-Christopher Horak, Andréas-Benjamin Seyfert, 2024-05-03 William Thiele is remembered today as the father of the sound film operetta with seminal classics such as Drei von der Tankstelle (1930). While often considered among the most accomplished directors of Late Weimar cinema, as an Austrian Jew he was vilified during the onset of the Nazi regime in 1933 and fled to the United States where he continued making films until the end of his career in 1960. Enchanted by Cinema closely examines the European musical film pioneer's work and his cross-cultural perspective across forty years of filmography in Berlin and Hollywood to account for his popularity while discussing issues of ethnicity, exile, comedy, music, gender, and race.

better living through chemistry dupont: New Deal Radio David Goodman, Joy Elizabeth Hayes, 2022-05-13 New Deal Radio examines the federal government's involvement in broadcasting during the New Deal period, looking at the U.S. Office of Education's Educational Radio Project. The fact that the United States never developed a national public broadcaster, has remained a central problem of US broadcasting history. Rather than ponder what might have been, authors Joy Hayes and David Goodman look at what did happen. There was in fact a great deal of government involvement in broadcasting in the US before 1945 at local, state, and federal levels. Among the federal agencies on the air were the Department of Agriculture, the National Park Service, the Works Progress Administration (WPA) and the Federal Theatre Project. Contextualizing the different series aired by the Educational Radio Project as part of a unified project about radio and citizenship is crucial to understanding them. New Deal Radio argues that this distinctive government commercial partnership amounted to a critical intervention in US broadcasting and an important chapter in the evolution of public radio in America.

better living through chemistry dupont: The 18 Immutable Laws of Corporate Reputation Ronald J. Alsop, 2010-05-11 A veteran Wall Street Journal editor and authority on branding, marketing and reputation provides the 18 crucial rules for companies to follow in developing and

protecting their reputation, which can be their most valuable asset or their worst nightmare. A must read book for senior executives, consultants, advertising, public relations, and marketing professionals. From Enron and WorldCom to the Catholic Church and Major League Baseball, reputation crises have never been more widespread. Now Ronald J. Alsop, a veteran Wall Street Journal authority on branding and reputation management, explains the dangers—and gives organizations the eighteen crucial laws to follow in developing and protecting their reputations. Consider this example of a simple decision made by a low-ranking employee: When rescue workers at the site of the World Trade Center disaster sought bottled water from a nearby Starbucks outlet, they complained that an employee charged them for it. In a matter of hours, the Internet had picked up the story and Starbucks' carefully cultivated worldwide reputation was quickly besmirched. This is just one instance among many of how the business world, ever more global and competitive, has become increasingly difficult to navigate. Studies have demonstrated the powerful impact of reputation on profits and stock prices, and yet less than half of all companies have a formal system for measuring reputation. Clearly, companies in every industry—from Dow Chemical to Disney to DaimlerChrystler—have much more to learn. It is still the rare company that realizes the full value of its reputation: how corporate reputation can enhance business in good times, become a protective halo in turbulent times, and be destroyed in an instant by people at the lowest or highest levels of the corporate ladder. Mr. Alsop provides eighteen thoroughly documented lessons based on years of experience covering every aspect of corporate reputation, with a clear distillation of the complex principles at the heart of a reputation. He explains: • How to protect your reputation when the inevitable crisis hits • How to cope with the many hazards in cyberspace • How to create a reputation for vision and industry leadership • How to establish a culture of ethical behavior • How to measure and monitor your ever-changing public image • How to make employees your reputation champions • How to decide when it's time to change your name The result is a book that is important not only for business executives, consultants, and advertising, public relations, and marketing professionals but also for anyone eager to learn more about the companies they work for, buy from, and invest in.

better living through chemistry dupont: *Dr. Joe's Science, Sense and Nonsense* Dr. Joe Schwarcz, 2011-05-24 When did chemical become a dirty word? Forty or so years ago, chemistry -- which had been recognized as a miracle-making boon to humanity - somehow became associated with warfare, sinister food additives, toxins and pollution. It's a situation that Dr. Joe Schwarcz aims to put into perspective. Yes, there's a downside to chemistry, he says, but this is dwarfed by its enormous benefits. Dr. Joe's new collection of commentaries will inspire an appreciation for the science of everyday life, and equip you to spot the muddled thinking, misunderstandings and deceptions in media stories and advertising claims. Does organic food really always equal better food? Are vaccines dangerous? Will the latest health fad make you ill? Do expensive wrinkle creams do the job? What are the best ways to avoid cancer? The answers to such questions often lie in an understanding of the chemistry involved. Ask Dr. Joe. Science, Sense and Nonsense celebrates chemistry's great achievements, lambastes its charlatans, and explores its essential connections to our wellbeing. And does so in authoritative, highly readable, good humoured style.

better living through chemistry dupont: This Blessed Earth Ted Genoways, 2017-09-19 Winner of the Stubbendieck Great Plains Distinguished Book Prize 2019 selection for the One Book One Nebraska and All Iowa state reading programs Genoways gives the reader a kitchen-table view of the vagaries, complexities, and frustrations of modern farming...Insightful and empathetic.
—Milwaukee Journal Sentinel The family farm lies at the heart of our national identity, and yet its future is in peril. Rick Hammond grew up on a farm, and for forty years he has raised cattle and crops on his wife's fifth-generation homestead in Nebraska, in hopes of passing it on to their four children. But as the handoff nears, their family farm—and their entire way of life—are under siege on many fronts, from shifting trade policies, to encroaching pipelines, to climate change. Following the Hammonds from harvest to harvest, Ted Genoways explores the rapidly changing world of small, traditional farming operations. He creates a vivid, nuanced portrait of a radical new landscape and

one family's fight to preserve their legacy and the life they love.
