big ideas math oklahoma: Patriots, Politics, and the Oklahoma City Bombing Stuart A. Wright, 2007-06-11 This book explores social movements by analyzing an escalating spiral of tension between the Patriot movement and the state centered on the mutual framing of conflict as 'warfare'. By examining the social construction of 'warfare' as a principal script or frame defining the movement-state dynamic, Stuart A. Wright explains how this highly charged confluence of a war narrative engendered a kind of symbiosis leading to the escalation of a mutual threat that culminated in the Oklahoma City bombing. Wright offers a unique perspective on the events leading up to the bombing because he served as a consultant to Timothy McVeigh's defense team for eighteen months and draws on primary data based on face-to-face interviews with McVeigh. The book contends that McVeigh was firmly entrenched in the Patriot movement and was part of a network of 'warrior cells' that planned and implemented the bombing.

big ideas math oklahoma: Kids David L. Kirp, 2011-03 It may take a village to raise a child, but most American families are struggling, with diminishing social support, to do the job on their own. While parents work longer hours for less and the costs of childcare, healthcare, and college skyrocket, the share of the U.S. budget spent on kids has fallen 22 percent since 1960. More and more children may well not make it to a healthy, productive adulthood. That's terrible for them--and for us as well. It doesn't have to be this way. In this book, renowned expert David L. Kirp clarifies the importance of investing wisely in children. He outlines a visionary Kids First policy agenda that's guided by a golden rule principle: Every child deserves what's good enough for a child you love. And he offers lively and inspiring, on-the-ground accounts of five big cradle-to-college initiatives that can change the arc of all children's lives: strong support for parents; high-quality early education; linking schools and communities to improve what both offer children; giving all youngsters access to a caring and stable adult mentor; and providing kids a nest egg to help pay for college or kick-start a career.
