big ideas math blue answers: *Mastering Formative Assessment Moves* Brent Duckor, Carrie Holmberg, 2017-06-27 How do you know if students are with you at the beginning, middle, and end of a lesson? Can formative assessment offer a key to better teaching and learning during instruction? Educators Brent Duckor and Carrie Holmberg invite you on the journey to becoming a formative assessor. They encourage you to focus on these seven research-based, high-leverage formative assessment moves: Priming--building on background knowledge and creating a formative assessment-rich, equitable classroom culture Posing--asking questions in relation to learning targets across the curriculum that elicit Habits of Mind Pausing--waiting after powerful questions and rich tasks to encourage more student responses by supporting them to think aloud and use speaking and listening skills related to academic language Probing--deepening discussions, asking for elaborations, and making connections using sentence frames and starters Bouncing--sampling student responses systematically to broaden participation, manage flow of conversation, and gather more "soft data" for instructional use Tagging--describing and recording student responses without judgment and making public how students with different styles and needs approach learning in real-time Binning--interpreting student responses with a wide range of tools, categorizing misconceptions and "p-prims," and using classroom generated data to make more valid and reliable instructional decisions on next steps in the lesson and unit Each chapter explores a classroom-tested move, including foundational research, explaining how and when to best use it, and describing what it looks like in practice. big ideas math blue answers: *Speculative Light* Amy J. Elias, 2024-12-13 Over the course of a thirty-eight-year friendship, painter Beauford Delaney and writer James Baldwin shared their private lives and shaped one another's artistic values. *Speculative Light* brings together scholars, critics, and artists who analyze the stylistic and historical import of Delaney's and Baldwin's works and

examine how this friendship fundamentally shaped the pair's ideas about art and life. The book's contributors explore how the two men, sharing identities as queer Black American artists, first in New York and then as expatriates in France, created a speculative space in their work to think about more just and creative Black futures. Essay topics and issues range from masculinity, queerness, Blackness, and Americanness to the relationship between jazz, painting, and writing. Throughout, the contributors establish a positive history for Delaney's and Baldwin's arts that refuses a subordinate role to white artists of the modernist avant-garde. Ultimately, *Speculative Light* demonstrates that Delaney and Baldwin's bond provides revolutionary grounds for theorizing contemporary Black art and life. Contributors.
