cra clinical research associate training: *Handbook: The Duty for "Sponsor Oversight" in Clinical Research* Doris Breiner, 2022-07-11 The evidence that the sponsor of a clinical trial fulfills the obligation to perform oversight of, e.g. a CRO that carries out outsourced study activities on behalf of the sponsor is not new. Nevertheless, the addendum to the ICH-GCP has explicitly included this as a sponsor responsibility under point 5.2.2. It applies to all sponsors of a clinical trial, independent of the kind of the clinical trial, whether commercial or academic study, if the study activities are outsourced to a CRO. The goal is to ensure the patient safety and data integrity. The review of the sponsor's oversight is also subject to e.g. an inspection by an authority. The first edition of this manual is based on a master's thesis within the framework of the university master's program Clinical Research. The concept developed is certainly not completely new but is based, inter alia. to already discussed measures or publications, as example, by the English authority MHRA. It is intended to serve as an example to illustrate how the sponsor's duty of supervision can be implemented simply and efficiently in rather small, medium-sized companies. Of course, every company has to decide for itself how to implement it.

cra clinical research associate training: Platform Trial Designs in Drug Development Zoran Antonijevic, Robert A. Beckman, 2018-12-07 Platform trials test multiple therapies in one indication, one therapy for multiple indications, or both. These novel clinical trial designs can dramatically increase the cost-effectiveness of drug development, leading to life-altering medicines for people suffering from serious illnesses, possibly at lower cost. Currently, the cost of drug development is unsustainable. Furthermore, there are particular problems in rare diseases and small biomarker defined subsets in oncology, where the required sample sizes for traditional clinical trial designs may not be feasible. The editors recruited the key innovators in this domain. The 20 articles discuss trial designs from perspectives as diverse as quantum computing, patient's rights to information, and international health. The book begins with an overview of platform trials from multiple perspectives. It then describes impacts of platform trials on the pharmaceutical industry's key stakeholders: patients, regulators, and payers. Next it provides advanced statistical methods that address multiple aspects of platform trials, before concluding with a pharmaceutical executive's perspective on platform trials. Except for the statistical methods section, only a basic qualitative knowledge of clinical trials is needed to appreciate the important concepts and novel ideas presented.

cra clinical research associate training: Central Two Zero Seven Nine Out Paul Canning, 2021-07-22 What sort of a life do you make for yourself when there is no focus? How does your life pan out as you ride the vicissitudes of a dog eat dog, cut throat employment market? How do you chase your dreams into adulthood to find love, happiness and success, when you carry inside yourself a childhood, dejected, insecure, unstable and with what tiny morsel of confidence you possess - in tatters, because you've been at the mercy of a bullying control freak - your own father? I have survived so much mental anguish with confidence renewed following a difficult and painful education in Blackpool. After handwriting 100 letters, I landed my first job - cutting my teeth as a London-based portrait and wedding photographer in early summer 1986. A life on the ocean wave then beckoned, which turned me from nervous novice ship's photographer to expert smudger working aboard cruise liners worldwide. In 1990 I settled down, met the girl of my dreams and landed a fabulous job - Metropolitan Police Service forensic photographer. In the late 1990s I qualified as a Hendon-based instructor, leaving the police in 2004 to set up a business. If that wasn't enough, I then retrained as a medical photographer in 2008 and I'm now a medical photography manager working for Blackpool Teaching Hospitals NHS Foundation Trust. Both journey and path to success have been a miracle in the making.
