Overview of Pelvic Floor Therapy

Pelvic floor therapy is a specialized form of physical therapy that focuses on strengthening and rehabilitating the muscles of the pelvic floor. This therapeutic approach is often prescribed for patients experiencing urinary incontinence, pelvic pain, postpartum recovery, fecal incontinence, or pelvic organ prolapse. The therapy typically involves manual techniques, biofeedback, electrical stimulation, and patient education to restore function and alleviate symptoms. Given the specialized nature of pelvic floor therapy, accurate coding using appropriate CPT codes is essential for correct billing and insurance reimbursement.

Definition and Purpose of Pelvic Floor Therapy

Pelvic floor therapy aims to improve muscle coordination, strength, and endurance of the pelvic region. The pelvic floor muscles support the bladder, uterus, rectum, and other organs, and dysfunction can lead to significant discomfort and impaired quality of life. Therapy interventions may include

exercises, manual therapy, and neuromuscular re-education, all designed to restore normal pelvic function.

Medical Conditions Treated with Pelvic Floor Therapy

Common conditions treated by pelvic floor therapy include:

- Urinary incontinence
- Pelvic organ prolapse
- Chronic pelvic pain
- Post-surgical rehabilitation
- Postpartum recovery
- Fecal incontinence

Common CPT Codes for Pelvic Floor Therapy

Identifying the correct CPT code for pelvic floor therapy is vital for accurate medical billing. There is no single CPT code exclusively dedicated to pelvic floor therapy; instead, several codes are applicable depending on the specific treatment rendered. These codes mainly fall under the physical therapy and neuromuscular re-education categories.

Physical Therapy Evaluation Codes

Before therapy sessions commence, an evaluation is often performed to assess the patient's condition.

- **97161** - Physical therapy evaluation, low complexity
- **97162** - Physical therapy evaluation, moderate complexity
- **97163** - Physical therapy evaluation, high complexity

These codes correspond to different levels of complexity based on the patient's history, examination, and clinical decision-making.

Therapeutic Procedures and Re-education

Pelvic floor therapy treatments are typically reported using the following CPT codes:

- **97110** - Therapeutic exercises to develop strength and endurance, range of motion, and flexibility
- **97530** - Therapeutic activities, direct one-on-one patient contact to improve functional performance
- **97112** - Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and proprioception
- **90911** - Biofeedback training, perineum and/or lower pelvic floor (commonly used for pelvic floor re-education)

Additional Modalities

Additional CPT codes may apply for adjunctive therapies used in pelvic floor rehabilitation:

- **97014** - Electrical stimulation, unattended
- **97032** - Electrical stimulation, manual, one or more areas
- **97535** - Self-care/home management training

Billing and Documentation Guidelines

Proper billing for pelvic floor therapy requires thorough documentation to justify the use of specific CPT codes and to support medical necessity. Physical therapists and healthcare providers must maintain detailed records of evaluation findings, treatment plans, modalities applied, patient progress, and clinical outcomes.

Documentation Requirements

Essential components of documentation include:

- Initial evaluation report indicating diagnosis and treatment goals
- Detailed description of therapeutic exercises and modalities used

- Duration and frequency of therapy sessions
- Patient response and progress notes
- Rationale for continued therapy or discharge

Time-Based Coding Considerations

Many CPT codes for pelvic floor therapy are time-based, meaning the amount of time spent performing the service impacts coding and billing. It is important to track the duration of each treatment session accurately, as incorrect time reporting can lead to claim denials or audits.

Insurance and Reimbursement Considerations

Insurance coverage for pelvic floor therapy varies by payer and policy. Most commercial insurers and Medicare recognize pelvic floor therapy as a medically necessary service when documented appropriately. However, prior authorization or specific documentation may be required depending on the insurer's guidelines.

Medicare Coverage for Pelvic Floor Therapy

Medicare Part B generally covers pelvic floor therapy when it is prescribed by a physician and provided by a qualified therapist. Documentation must demonstrate medical necessity, and therapy must be reasonable and necessary to treat a diagnosed condition.

Private Insurance and Payer Variations

Private insurance companies may have unique rules and benefit limitations. Providers should verify coverage details, including:

- Pre-authorization requirements
- Number of allowable therapy visits
- Specific CPT and diagnosis codes accepted
- Co-payments and deductibles

Understanding these factors helps prevent claim denials and delays in reimbursement.

Frequently Asked Questions About CPT Coding for Pelvic Floor Therapy

Several common questions arise regarding the use of CPT codes for pelvic floor therapy. Addressing these inquiries helps clarify the coding process and improves billing accuracy.

Is There a Single CPT Code for Pelvic Floor Therapy?

No, pelvic floor therapy is coded using a combination of CPT codes that describe evaluation, therapeutic exercises, neuromuscular re-education, and biofeedback. Selecting the correct code depends on the specific services provided during the session.

Can Multiple CPT Codes Be Billed in One Session?

Yes, multiple CPT codes can be billed if distinct, separate services are provided. However, proper documentation must support the medical necessity and time spent on each service, and payer policies should be reviewed to avoid bundling or duplication issues.

What Diagnosis Codes Are Commonly Used With Pelvic Floor Therapy?

Common ICD-10 diagnosis codes used with pelvic floor therapy include:

- N39.3 - Stress incontinence (female) (male)
- N81.4 - Pelvic organ prolapse, unspecified
- R10.2 - Pelvic and perineal pain
- K59.0 - Constipation
- R32 - Unspecified urinary incontinence

Accurate diagnosis coding supports medical necessity and proper reimbursement.

Frequently Asked Questions

What is the CPT code for pelvic floor therapy?

The most commonly used CPT codes for pelvic floor therapy are 97110 (therapeutic exercises) and 97140 (manual therapy), often combined with biofeedback codes such as 90911 or 90912.

Are there specific CPT codes dedicated solely to pelvic floor therapy?

There are no unique CPT codes exclusively for pelvic floor therapy; instead, it is billed using general physical therapy codes like 97110, 97112, 97140, and sometimes biofeedback codes like 90911.

Can biofeedback for pelvic floor therapy be billed separately?

Yes, biofeedback for pelvic floor therapy can be billed separately using CPT codes 90911 (biofeedback training by any modality) or 90912 (additional 15 minutes).

How is pelvic floor therapy documented for insurance claims?

Documentation should include the CPT codes used (e.g., 97110, 97140), the medical necessity, treatment goals, patient progress, and specific interventions related to pelvic floor rehabilitation.

Is pelvic floor therapy covered by insurance using these CPT codes?

Coverage varies by insurer, but many insurance companies cover pelvic floor therapy when medically necessary and billed with appropriate CPT codes like 97110 and 97140, often requiring physician referral.

What CPT code is used for therapeutic exercises in pelvic floor therapy?

The CPT code 97110 is used for therapeutic exercises, which includes pelvic floor muscle strengthening and coordination exercises.

Can pelvic floor physical therapy be billed under a physical therapy evaluation code?

Yes, initial evaluations for pelvic floor therapy can be billed using evaluation codes such as 97161, 97162, or 97163, depending on complexity.

Are there any recent updates to CPT codes related to pelvic floor therapy?

As of 2024, there have been no new CPT codes specifically for pelvic floor therapy; providers continue to use standard physical therapy and biofeedback codes for billing.

cpt code for pelvic floor therapy: Advanced Health Assessment of Women, Third Edition Helen Carcio, R. Mimi Secor, 2014-10-10 This is the only truly comprehensive advanced text for the assessment of women's health, written for such primary care providers as nurse practitioners, physician assistants, and certified nurses/midwives. It encompasses both foundational and cutting-edge physical and psychosocial information in a clear and concise outline format, and is unique in its presentation of more advanced techniques and procedures not addressed in standard graduate assessment texts. Keeping pace with the expanding scope of advanced practice, the third edition provides several completely new chapters authored by renowned specialists, expanded chapters, and updates. This includes new information on contraception, domestic violence, health history of special populations, lesbian health, evaluation of the pelvic floor, aging and menopause, bleeding irregularities, infertility, skin aesthetics, pelvic pain, and health guidelines. With an integrated approach to treatment, the authors delineate the expanded roles of advanced health care providers, including guidance for situations when a practitioner must decide whether to act independently, co-manage, consult, or refer. The authors provide in-depth descriptions enhanced by

plentiful tables and figures of each assessment skill and technique along with its underlying rationale. Basic techniques are augmented by the inclusion of possible alterations for a particular procedure. On a continuum from simple to complex, the text is divided into 11 units that cover basic women's health assessment down to the cellular level, health history, prenatal assessment, investigative procedures including sonohysteroscopy and simple cystometrogram, and several chapters on specific women's health concerns. A special chapter on urinary incontinence includes diagnosis of bladder dysfunction. Sample assessment forms are integrated throughout, as are comprehensive lists of equipment required for each procedure along with information on patient preparation and follow-up. New to the Third Edition: Updated assessment guidelines New chapters on lesbian health, dysfunctional uterine bleeding, polycystic ovarian syndrome, skin aesthetics, and pelvic pain Information on new contraception devices New information on domestic violence, health history of special populations, and vaginal microscopy Cervical cancer screening, menopause assessment, and osteoporosis screening Expanded information on evaluation of the pelvic floor Expanded information on aging and menopause Updates on infertility and information on BRCA gene testing Key Features: Provides detailed descriptions of advanced assessment techniques enhanced with plentiful tables and figures Presents the rationale for all assessments and procedures Delineates clinical procedures on the leading edge of the expanded role of the advanced practice clinician Includes unique chapters about selection and insertion of the vaginal pessary, intrauterine insemination procedure, and donor insemination Covers such advanced skills as vulvar exam and biopsy, endometrial biopsy, acrochordonectomy, polypectomy, and colposcopy

cpt code for pelvic floor therapy: Advanced Health Assessment of Women, Fourth Edition Helen Carcio, R. Mimi Secor, 2018-09-07 Written for nurse practitioners, physician assistants, nurse midwives, and other primary care providers, this new edition of *Advanced Health Assessment of Women*, continues to deliver the clinical skills required to care for the unique healthcare needs of women. This text delves into the growing role of the advanced practice clinician, establishing a foundation for and an understanding of the rationale behind the techniques and procedures described. Master's level and doctoral level curricula provide basic content for the advanced practice clinician but may not provide sufficient education and training regarding advanced women's health skills and procedures. This practical manual is designed to fill that gap, linking theory to clinical practice using critical thinking. Using a clear and concise outline format, *Advanced Health Assessment of Women* avoids unnecessary jargon and cuts straight to the clinical skills, techniques, and procedures the advanced practice provider needs to know. Content progresses from simple to complex, covering basic assessment and physiology, health history, physical examination, and specific investigative procedures. Each technique and procedure outlined contains detailed descriptions, strategies for patient preparation, and recommended follow up, accompanied by a comprehensive list of equipment. In this new edition, all content has been reviewed and expanded to reflect the most updated evidence-based clinical practice guidelines. Key Features: Clinical procedures that are on the leading edge in the expanded role of the advanced practice clinician Detailed descriptions of advanced assessment techniques with plentiful tables and figures Special chapter on urinary incontinence includes diagnosis of bladder dysfunction Appendices contain patient information handouts and practice forms that can be adapted for practice Unique chapter: selection and insertion of the vaginal pessary New to this edition: NEW Chapter: Assessment of Transgender Persons Revisions of clinical guidelines and procedures for menopause, cervical cancer screening, and osteoporosis chapters Treatment summary sections for selected chapters such as PCOS, AUB, vulvodynia, obesity, and urinary incontinence

cpt code for pelvic floor therapy: Occupational Therapy and Women's Health Sabina Khan, 2025-03-28 This innovative and comprehensive textbook provides a detailed exploration of the role of occupational therapy in addressing the unique needs of women across the lifespan. Structured into 14 parts, the book begins with the foundations of women's health, delving into its historical evolution, the significance of gender equality in medical research, the implications of employment on women's well-being, intricate sociocultural influences, and the intersection of women and occupation

from an occupational therapy perspective. Following this foundational context, the book journeys through diverse areas such as gynecological and obstetric health management, endocrine health, autoimmune conditions, non-cisgender health in the context of women's health, mental health and biopsychosocial aspects, cardiovascular health, sleep, weight, and lifestyle factors, oncology, neurological health, women's health across the lifespan, inter-partner violence and trauma-informed care, and special topics in women's health. Women's health is a universal concern that transcends geographical boundaries, cultural differences, and socioeconomic disparities, and this important book will be key reading for both students and practitioners of occupational therapy.

Explanations of coding concepts are followed by practice exercises to reinforce understanding of the material. In addition to coverage of reimbursement, ICD-10-CM, CPT, HCPCS, and inpatient coding, an Evolve website includes 30-day access to TruCode® Encoder Essentials. No other text so thoroughly covers all coding sets in one source! - A step-by-step approach makes it easier to build your skills and remember the material. - 30-day trial access to TruCode® Encoder Essentials gives you experience with using an encoder (in addition to separate encoder practice exercises on the Evolve website). - Learning Objective Review questions are included at the end of each chapter. - UNIQUE! Concrete real-life coding reports (cleared of any confidential information) simulate the reports you will encounter as a coder and help you apply coding principles to actual cases. - Instructor-led assessments on the companion Evolve website provide additional assessment options in classroom settings (answers and rationales provided at the discretion of your instructor). - UNIQUE! Four coding-question variations — covering both single-code questions and multiple-code questions and scenarios — develop your coding ability and critical thinking skills. - Over 450 total illustrations help you understand the types of medical conditions and procedures being coded, along with examples taken directly from Elsevier's professional ICD-10 and HCPCS manuals. - Official Guidelines for Coding and Reporting boxes show the official guidelines wording for inpatient and outpatient coding alongside in-text explanations. - UNIQUE! Coders' Index in the back of the book makes it easy to quickly locate specific codes. - Exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts and emphasize key information. - Valuable tips and advice are offered in features such as From the Trenches, Coding Shots, Stop!, Caution!, Check This Out, and CMS Rules. - Sample electronic health record screenshots (located in Appendix D) show examples similar to the EHRs you will encounter in the workplace. - NEW! Updated content includes the latest coding information available, promoting accurate coding and success on the job. - NEW! Glossary review questions are included at the end of each chapter.
