**current issues and enduring questions: The Thinking Crisis** T. Ellen Hill, Joel L. Shatzky, 2001 The objectives of *The Thinking Crisis* are: to examine the reasons for the decline in the quality of student writing by what is taught—and learned—in high school; to demonstrate the consequences of this decline by examining current student writing in college; to compare this writing with student writing of twenty years ago; to suggest ways in which this disconnection between what a teacher teaches and what a student needs to learn can be ameliorated. We believe that this book is unique in its approach to problems that we see in student writing today in that it neither advocates nor rejects the present pedagogy in the schools; but it argues that this pedagogy be properly implemented. While many of the ideas advanced today for improving writing are sound, they are often misinterpreted and poorly taught. We also argue that the lowering of the level of student reading by the general abandonment of classic texts in the curriculum has contributed to the decline in thinking, reading and writing.

**current issues and enduring questions: The Oxford Handbook of Practical Ethics** Hugh LaFollette, 2005-09-15 This is a guide to contemporary thought on ethical issues in all areas of human activity - personal, medical, sexual, social, political, judicial, and international, from the natural world to the world of business.

**current issues and enduring questions: Ethnicity, Race, Religion** Katherine M. Hockey, David G. Horrell, 2018-06-28 This book is open access and available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). It is funded by Knowledge Unlatched. Religion, ethnicity and race are facets of human identity that have become increasingly contested in the study of the Bible - largely due to the modern discipline of biblical studies having developed in the context of Western Europe, concurrent with the emergence of various racial and imperial ideologies. The essays in this volume address Western domination by focusing on historical facets of ethnicity and race in antiquity, the identities of Jews and Christians, and the critique of scholarly ideologies and racial assumptions which have shaped this branch of study. The contributors critique various Western European and North American contexts, and bring fresh perspectives from other global contexts, providing insights into how

biblical studies can escape its enmeshment in often racist notions of ethnicity, race, empire, nationhood and religion. Covering issues ranging from translation and racial stereotyping to analysing the significance of race in Genesis and the problems of an imperialist perspective, this volume is vital not only for biblical scholars but those invested in Christian, Jewish and Muslim identity.

**current issues and enduring questions: *Searching Paul*** Kathy Ehrensperger, 2019-10-29  
Firmly rooted in his ancestral Jewish traditions, Paul interacted with, and was involved in vivid communication primarily with non-Jews, who through Christ were associated with the one God of Israel. In the highly diverse cultural, linguistic, social, and political world of the Roman Empire, Paul's activities are seen as those of a cultural translator embedded in his own social and symbolic world and simultaneously conversant with the diverse, mainly Greek and Roman world, of the non-Jewish nations. In this role he negotiates the Jewish message of the Christ event into the particular everyday life of his addressees. Informed by socio-historical research, cultural studies, and gender studies Kathy Ehrensperger explores in her collection of essays aspects of this process based on the hermeneutical presupposition that the Pauline texts are rooted in the social particularities of everyday life of the people involved in the Christ-movement, and that his theologizing has to be understood from within this context.

**current issues and enduring questions: *Against Epistemic Apartheid*** Reiland Rabaka, 2010-05-10  
In this intellectual history-making volume, multiple award-winning W. E. B. Du Bois scholar Reiland Rabaka offers the first book-length treatment of Du Bois's seminal sociological discourse: from Du Bois as inventor of the sociology of race to Du Bois as the first sociologist of American religion; from Du Bois as a pioneer of urban and rural sociology to Du Bois as innovator of the sociology of gender and inaugurator of intersectional sociology; and, finally, from Du Bois as groundbreaking sociologist of education and critical criminologist to Du Bois as dialectical critic of the disciplinary decadence of sociology and the American academy. *Against Epistemic Apartheid* brings new and intensive archival research into critical dialogue with the watershed work of classical and contemporary, male and female, black and white, national and international sociologists and critical social theorists' Du Bois studies. *Against Epistemic Apartheid* offers an accessible introduction to Du Bois's major contributions to sociology and, therefore, will be of interest to scholars and students not only in sociology, but also African American studies, American studies, cultural studies, critical race studies, gender studies, and postcolonial studies, as well as scholars and students in traditional disciplines such as history, philosophy, political science, economics, education, and religion.

**current issues and enduring questions: *Environmental Justice*** , 1996

**current issues and enduring questions: *Terror and Taboo*** Joseba Zulaika, William Douglass, 2016-04-22  
*Terror and Taboo* is about the mythology of terrorism; it is an exploration of the ways we talk about terrorism. It offers incontestable evidence to support the idea that we give power to terrorism by the way we write and talk about it. According to Zulaika and Douglass, we make terrorism worse by the way we represent it in the media and in everyday conversation. Through their examination of terrorism, they propose to remove the taboos surrounding terrorism. *Terror and Taboo* is full of examples to ground the authors premise, ranging from specific examples, such as tendency to talk more about where Timothy McVeigh shopped for weapons than about the international traffic in arms by legitimate nations, to more theoretical interpretations that will be familiar to readers of cultural studies books.

**current issues and enduring questions: *Dictionary of Modern American Philosophers*** John R. Shook, 2005-01-01  
The *Dictionary of Modern American Philosophers* includes both academic and non-academic philosophers, and a large number of female and minority thinkers whose work has

been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields, before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.

**current issues and enduring questions:** *Debate and Critical Analysis* Robert James Branham, 2013-10-16 Rather than approach debate primarily as a form of interscholastic competition, this unique book identifies it as an activity that occurs in many settings: scientific conferences, newspaper op-ed pages, classrooms, courts of law, and everyday domestic life. Debate is discussed as an integral part of academic inquiry in all disciplines. As in all fields of study, various competing views are advanced and supported; Debate and Critical Analysis is designed to better prepare the student to assess and engage them. This text posits four characteristics of true debate -- argument development, clash, extension, and perspective -- which form the basic structure of the book. Each concept or aspect of argument covered is illustrated by an example drawn from contemporary or historical sources, allowing the reader to actually see the techniques and strategies at work. All popular forms of competitive debate, including policy, Lincoln-Douglas, value-oriented, and parliamentary, are discussed in detail -- as embedded in the actual topical controversies with which they are concerned. In this way, the student can learn the structures, reasoning processes, and strategies that may be employed, as well as the practical affairs of debating, from brief-writing to the flowsheet.

**current issues and enduring questions:** *In the Wake of Violence* Cheryl R. Jorgensen-Earp, 2008-06-01 How acts of violence are rhetorically managed by social movements: In the Wake of Violence explores the immediate and longer term aftermath of violence committed by independent radicals involved in single-issue movements. Cheryl R. Jorgensen-Earp explores several specific incidents in recent history—the arson of a Vail ski resort by environmentalists, the murder of Dr. John Britton by an antiabortion activist, and the torching of a University of California research laboratory by animal rights activists among them—to discover how the perpetrators of the violence and the majority of reformers involved in their movements rhetorically framed the violent act for a potentially outraged public. In the Wake of Violence, claims Jorgensen-Earp, the perpetrators are often forthcoming with both explanations for and a defense of their actions, casting themselves as righteous actors or martyrs for a cause. However, ardent reformers within the same cause might look with genuine revulsion at the actions of their own radical wing. This study claims that the nonviolent majority in single-issue reform movements employs a predictable constellation of rhetorical strategies to manage the impact of radical fringe violence. The primary goal of this rhetoric is to avoid a backlash against the larger movement by a public alienated by violent acts. In examining specific rhetorical responses by the nonviolent majority in antiabortion, animal welfare, environmental reform, abolition, and women's suffrage movements, Jorgensen-Earp considers a wide range of discourse types—from newspaper articles, interviews, and editorials to private letters; from editorial cartoons to the homemade signs of movement activists; and from speeches to modern Internet sites. She discovers that the image restoration techniques brought to bear for a reform cause are similar to those employed by a corporation accused of wrongdoing. Ultimately, she finds that the majority of proponents of the causes she examines believe that the violence can or will be condoned and that it must be rhetorically mitigated.

**current issues and enduring questions:** *Asian and Feminist Philosophies in Dialogue* Jennifer

McWeeny, Ashby Butnor, 2014-04-22 In this collection of original essays, international scholars put Asian traditions, such as Hinduism, Buddhism, Daoism, and Confucianism, into conversation with one or more contemporary feminist philosophies, founding a new mode of inquiry that attends to diverse voices and the complex global relationships that define our world. These cross-cultural meditations focus on the liberation of persons from suffering, oppression, illusion, harmful conventions and desires, and other impediments to full personhood by deploying a methodology that traverses multiple philosophical styles, historical texts, and frames of reference. Hailing from the discipline of philosophy in addition to Asian, gender, and religious studies, the contributors offer a fresh take on the classic concerns of free will, consciousness, knowledge, objectivity, sexual difference, embodiment, selfhood, the state, morality, and hermeneutics. One of the first anthologies to embody the practice of feminist comparative philosophy, this collection creatively and effectively engages with global, cultural, and gender differences within the realms of scholarly inquiry and theory construction.
