Understanding Non Verbal Communication Boards

Non verbal communication boards are assistive tools designed to enable communication without the use of spoken words. They typically consist of a collection of symbols, pictures, or written words arranged in a format that users can point to or indicate to convey messages. These boards serve as an alternative or augmentative communication method, particularly for individuals with speech disorders, autism spectrum disorder, cerebral palsy, or other conditions that affect verbal communication.

Definition and Purpose

A free non verbal communication board is a resource that provides visual elements to assist users in expressing themselves. The primary purpose is to bridge communication gaps by offering a simple, intuitive interface that can be used in various settings. These boards reduce frustration and increase independence by allowing individuals to participate more fully in conversations and daily activities.

Key Features

Effective communication boards share several key features, including:

- Clear and recognizable symbols or images
- Logical arrangement to facilitate quick selection
- Durability and portability for everyday use
- Accessibility for users with varying motor skills
- Compatibility with different communication needs and languages

Types of Free Non Verbal Communication Boards

There are various types of free non verbal communication boards, each designed to cater to different communication requirements and user abilities. Selecting the appropriate type depends on the user's cognitive level, motor skills, and the communication context.

Picture-Based Communication Boards

Picture-based boards use photographs or illustrations to represent common objects, actions, or emotions. They are particularly useful for individuals who respond well to visual stimuli and may have limited literacy skills. These boards often include categories such as food, feelings, activities, and requests.

Symbol-Based Communication Boards

Symbol-based boards incorporate standardized symbols such as those from the Picture Communication Symbols (PCS) or the Widgit Symbol sets. These symbols are designed to be universally understood and are often used in educational and therapeutic settings. Symbol boards support more complex sentence formation and abstract concepts.

Text-Based Communication Boards

Text-based boards are suitable for users who can read and write but have speech difficulties. These boards contain words or phrases organized by topic or function, allowing users to construct sentences or express specific ideas. They may also include alphabet boards for spelling out messages.

Hybrid Communication Boards

Hybrid boards combine pictures, symbols, and text to accommodate a wider range of users and communication scenarios. This versatility makes them effective for progressive learning and adapting to changing communication needs.

Applications and Benefits

Free non verbal communication boards have broad applications across different environments and offer numerous benefits to users, caregivers, and professionals alike.

Educational Settings

In schools, communication boards support students with special needs by facilitating classroom participation and social interaction. They assist teachers in delivering instructions and encourage peer communication, thereby fostering an inclusive learning environment.

Therapeutic Use

Speech-language pathologists and therapists use communication boards as part of intervention strategies to enhance language development and social skills. These tools help track progress and provide consistent communication support during therapy sessions.

Home and Community Use

At home or in community settings, communication boards enable users to express daily needs, preferences, and emotions more effectively. They promote independence and improve quality of life by reducing communication barriers in various social contexts.

Benefits Summary

- Improves communication for non-speaking individuals
- Reduces frustration and behavioral issues
- Enhances social interaction and inclusion
- Supports language development and cognitive skills

- Provides a cost-effective and accessible communication solution

How to Access and Use Free Non Verbal Communication Boards

Accessing and using free non verbal communication boards involves identifying suitable resources and understanding the best practices for implementation to maximize their effectiveness.

Sources for Free Communication Boards

Numerous organizations, educational institutions, and therapy centers offer free non verbal communication boards. These resources may be downloadable PDFs, printable templates, or interactive digital applications. Popular platforms provide a variety of board styles tailored to different age groups and needs.

Implementing the Boards

Successful use of communication boards requires training for both users and facilitators. Key steps include:

1. Introducing the board gradually and explaining its use
2. Encouraging frequent practice in natural settings
3. Customizing content to reflect the user's preferences and vocabulary
4. Monitoring progress and adjusting complexity as needed
5. Incorporating the board into daily routines and interactions

Tips for Effective Use

To enhance communication through free non verbal communication boards, consider the following tips:

- Ensure symbols or pictures are large and clear
- Position the board within easy reach and view of the user
- Use consistent terminology and symbols

- Encourage caregivers and peers to learn and use the board
- Integrate the board with other communication methods when possible

Customization and Best Practices

Customizing free non verbal communication boards ensures they meet individual needs and improve user engagement. Best practices emphasize personalization and adaptability.

Personalizing Content

Customization involves selecting relevant vocabulary, images, and categories that reflect the user's environment, interests, and communication goals. Personalization increases motivation and relevance, facilitating more natural communication.

Adapting for Different Abilities

Boards should be adapted for motor skills by considering size, spacing, and selection methods (e.g., pointing, eye gaze, or partner-assisted scanning). Accessibility features, such as tactile elements or color coding, can also enhance usability.

Regular Review and Updating

Communication needs evolve over time, making it essential to review and update boards regularly. This process ensures vocabulary remains current and aligned with the user's developmental progress and changing environments.

Collaboration with Professionals

Working with speech therapists, educators, and caregivers helps optimize the design and implementation of communication boards. Professional input supports evidence-based practices and addresses specific challenges effectively.

free non verbal communication board: Not Just Talking Sioban Boyce, 2017-07-12 This innovative approach to dealing with communication difficulties was devised by the author following encounters with increased numbers of children who had learned to talk, but still were unable to communicate effectively. This new theory of communication development devised in the late 1990s has been successfully used by the author and a wide range of educators and promotes the good use of non-verbal skills in children. This programme changes the lives of the children (in the family and at school) who benefit from it. The book will look at: Non-verbal communication theory; Normal and disordered development; Problems arising - behaviour; social skills; emotions; education; in the family; Prevention; Assessment; and, Intervention. Generally those children with poor non-verbal skill development will have limited ability to communicate effectively in all situations and may even be 'shut down', i.e not attempting to communicate unless they choose to. This flagship book provides a whole new perspective and presents a concrete alternative approach to tackling the fundamentals from which communication difficulties arise.

free non verbal communication board: Children's Boards in Museums José Antonio Gordillo Martorell, 2025-07-24 Children's Boards in Museums outlines the innovative concept of a “Children's Board”, in which children actively participate in a museum by sharing perspectives that expand the typical circle of voices and decision-makers. Drawing on research conducted with children between the ages of 7 and 12 from diverse socio-economic contexts, and cultures over the last decade, the author presents some of the most inspiring examples of children-centred museums around the world. This book describes the many ways in which children can improve the museum, explaining how they can help to transform it into a friendlier place that is closer to the needs of the community, more respectful of nature, and capable of listening to and valuing every visitor. This book offers an innovative way of thinking about children in museums and explains how children's

participation in areas of the museum that have otherwise been considered exclusive to its staff - such as strategy, human resources, funding, management, and evaluation - can enhance those areas, making the museum a significantly better place. *Children's Boards in Museums* is essential reading for academics and students who are engaged in the study of museums, heritage, culture, and children. It will also be of interest to professionals who are looking to facilitate a new kind of relationship between their institution and the children who visit it.

free non verbal communication board: **How to Be, and Remain, a Compassionate Educator** Anne Emerson, 2025-04-17 As educators, the attitude with which we approach our work has considerable impact on the outcome for students. Our assumptions and expectations influence learning both positively and negatively. This book adopts a compassionate acceptance that all children, no matter what they say, don't say, or do, are doing the best they can in that moment. It is in the adults' power, and their responsibility, to understand children and barriers they experience in their learning. By exploring neuroscience, psychology, and learning theory, we can increase our awareness of brain organisation and function to help us understand why a child isn't doing what we

have asked. With understanding comes both our compassion and ability to support. The case studies and examples from the author's practice illustrate how we can learn from effective strategies for neurodivergent children to build insight into all pupils. When we adopt a non-judgemental and encouraging approach, we form positive collaborative relationships with children and their families that increase engagement with and enjoyment of learning and reduces our own frustration and stress. This book is valuable reading for all educators, equipping them with an understanding that allows them to work flexibly and creatively to meet the learning and emotional needs of all pupils.
