free online professional development for teachers with certificate: Free Learning Ross Parker, David Coniam, Peter Falvey, 2021-11-29 This edited volume explores, investigates and analyses Free Learning - an innovative approach to student-directed learning which seeks to challenge educational norms from within. The volume is framed by a recognition of the urgent need for transformation of our educational systems. In traditional education, students work through a teacher-directed linear syllabus, at a pace dictated by the teacher, with summative assessment hurdles at too-frequent intervals. Progression and direction are determined solely by the teacher. In Free Learning, students determine their own learning pathway through a non-linear syllabus, which can be visualised as a mind map. Students may then complete as many units as they either have time for or are interested in, moving from one unit to another on the basis of having formatively satisfied the demands of each individual unit. This volume showcases the value and potential of Free Learning in contemporary practice and is intended to bridge theory and practice. The structure of the book reflects this complementary fit, with contributions from practitioners describing Free Learning as a learning and teaching tool in a range of educational settings, subjects and age-ranges. It also contains qualitative and quantitative analyses by researchers exploring the uptake of Free Learning and students' responses to the methodology. Researchers and educators who are interested in student-directed methodologies, especially in Asia, will find that the practical accounts and analyses of Free Learning contained within provide much food for thought with regard to redefining student learning.

free online professional development for teachers with certificate: Handbook on Statewide Systems of Support Sam Redding, Herbert J. Walberg, 2008-02-01 (published in co-operation with The Center on Innovation & Improvement) As subsequent chapters point out, the No Child Left Behind Act (NCLB) requires states to provide assistance to districts in improving the schools within their purview. Of course, the U.S. Constitution and federal laws leave the control of education largely to the states, and states have long provided support to school districts. In return for federal monies, however, NCLB requires states to provide such help under the statewide systems of support (SSOS) provision of the Act. The purposes of this Handbook are to survey the research related to statewide systems of support, to present the experience and insights of educational leaders in how such support can best be conducted, and to derive actionable principles for improving schools. It is intended for use not only by the staff of the U.S. Department of Education-sponsored Regional Centers that serve state department staff but also by the staff of school districts and schools. Also sponsored by the U.S. Department of Education, the Center on Innovation & Improvement (CII) previously developed the Handbook on Restructuring and

Substantial School Improvement (Walberg, 2007) that became the basis of CII's technical assistance to Regional Centers on this topic. CII made available for downloading Power Point presentations and web-based seminars ("webinars") based on the previous Handbook. CII's intended audiences widely employed the previous Handbook on Restructuring and Substantial School Improvement and auxiliary materials and found them useful in their technical assistance efforts to disseminate and encourage evidence-based ideas for restructuring and improving schools. With advice from the U.S. Department of Education, scholarly experts, and experienced educators in the Regional Centers, state departments of education, and school districts, the CII staff concluded that what it envisioned as the present Handbook would be similarly useful.
