Letter to the Reader Semple Math is a complete, basic-skills mathematics program for students of all ages and all learning abilities. We use a carefully ordered sequence of associative mnemonics in order to embed an accurate understanding of math concepts and skills in the long-term memory of our students, hence the expression, Simply Unforgettable. We do not ask students to memorize math facts through repetition. We do not use learning by rote methods that teach only to a student's short-term memory. We have never encountered a math program or a supplemental material based entirely on learning by association, nor have we ever encountered a program that has enjoyed our level of success with all students across the learning spectrum. Now in its 25th year, the program has undergone both a business reorganization and a long-awaited revision of the Level One Teacher's Manual by the original author, Jan Semple.
