frigidaire refrigerator manual: Shop Till You Drop Elaine Viets, 2024-04-25 BIMBOS, BUSTIERS, AND BOTOX! MURDER MOST FASHIONABLE... Author Elaine Viets kicks off this funny and fresh cozy series—about a woman on the run from her ex—with a rollicking tale of crime and vanity in the shadow world of wannabe molls. When unlikely sleuth Helen Hawthorne flees St. Louis, she fetches up in Fort Lauderdale, suddenly surrounded by the beautiful and the Botoxed. They all shop at the same place—Juliana's, the overpriced boutique where Helen works. And they're all looking for a wealthy wise guy to take to the cleaners. It's a dead-end job with no perks—but one that pays in cash. A little shady, but it beats leaving a paper trail. Turns out shady's only the beginning. Juliana's holds more secrets than a confessional, beginning with theft and drug sales, progressing to ever more ambitious scams, and inevitably, given the escalating level of crime, the murder of a felonious fashionista. The good news is there's a reward—and Helen needs money. The bad is that she could die before she collects it. Readers will find Helen the perfect cozy protagonist—an ordinary woman squeezed by circumstance, feeling her way as she takes control of her life whatever way she has to do it, innocent yet growing savvier by the second. You root hard for her as she settles into the role of amateur detective because you just can't help identifying with her and hoping you'd rise to the occasion as well. And you'll laugh out loud at the sly way author Viets skewers the South Florida culture of vanity and money. Fans of everywoman heroines like those created by Joanna Campbell Slan, Donna Andrews, Joanne Fluke, CeeCee James, Jana DeLeon, and Janet Evanovich will fall in love with this plucky investigator. And they can settle in for a long and beautiful relationship. The best news is the series is fifteen books strong, and counting!

Levitin, 2016-09-06 Winner of the Mavis Gallant Prize for Non-Fiction Winner of the 2017 National Business Book Award Shortlisted for the 2016/2017 Donner Prize From the bestselling author of The Organized Mind, the must-have book about how to analyze who and what to trust in the age of information overload. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo-facts, distortions and outright lies from reliable information? In A Field Guide to Lies, neuroscientist Daniel Levitin outlines the many pitfalls of the information age and provides the means to spot and avoid them. Levitin groups his field guide into two categories—statistical information and faulty arguments—ultimately showing how science is the bedrock of critical thinking. It is easy to lie with stats and graphs as few people take the time to look

under the hood and see how they work. And, just because there's a number on something, doesn't mean that the number was arrived at properly. Logic can help to evaluate whether or not a chain of reasoning is valid. And infoliteracy teaches us that not all sources of information are equal, and that biases can distort data. Faced with a world too eager to flood us with information, the best response is to be prepared. A Field Guide to Lies helps us avoid learning a lot of things that aren't true.
