frontline education substitute teacher training: How Chinese Acquire and Improve Mathematics Knowledge for Teaching Yeping Li, Rongjin Huang, 2018-05-16 While the importance of knowledge for effective instruction has long been acknowledged, and the concept and structure of mathematics knowledge for teaching are far from being new, the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically. The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge. To improve this situation with needed consideration about a system context and policies, *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers' life-long professional learning process in China. The book includes such chapters that can help readers to make possible connections of teachers' mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context. *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* brings invaluable inspirations and insights to mathematics educators and teacher educators who wish to help teachers improve their knowledge, and to researchers who study this important topic beyond a static knowledge conception.

frontline education substitute teacher training: Getting Schools to Work Better Yifei Yan, 2024-03-15 Yifei Yan's ambitious multi-method case study of government middle schools in Beijing and Delhi provides fresh insights into how educational accountability can be designed to work, in part and as a whole. Getting schools to work better is a challenge just about everywhere. Many policy experts prescribe measures for strengthening school accountability, either through government command and control or through alternative market and societal actors. In challenging this conventional wisdom, this book examines how China and India are tackling the challenge with a specific focus on supporting teachers along with traditional accountability-strengthening measures. The book draws implications from its case studies for how education systems can be designed towards the fulfilment of Sustainable Development Goal 4. It further develops the concept of Accountability 3.0 to elucidate a novel and more holistic reconceptualisation of the appropriate means needed to fulfil multiple purposes of accountability, in which providing support to frontline workers is viewed as an integral component. This book will appeal to a wide spectrum of scholars and practitioners in the fields of comparative education, public administration, public policy and development studies, among others. It will be especially interesting to those from the developing world facing similar accountability challenges as described. frontline education substitute teacher training: As They Were M. J. Mobley, 2022-04-29 A company of infantryman is one of the most powerful and versatile weapons at a nation's disposal. Capable of any number of tasks assigned to them, these are men for whom the mission always comes first. These are men of honor, men of loyalty, created for one purpose: destroy the enemies of their nation in armed conflict. But what happens when divisions begin to become evident in the heart and soul of these men? What happens when they begin to question their creation, question their reality, and question all they have been trained to hold dear? For the commander of Combat Outpost Chemera, these questions become all too real when events begin to spiral out of control during operations in several isolated mountain villages in the war-torn nation they have been sent to occupy. Boredom, poor decision making, treasonous actions, and the grim reality of death lurking around every corner send the captain spiraling into his books, into his childhood memories, and into an examination of his military career. How were we meant to live our lives? What gives us real purpose? Sometimes the experience of war is the only way to find the answer.
