Kunze, Linda Mizejewski, Aviva Orenstein, Raúl Pérez, Philip Scepanski, Susan Seizer, Monique Taylor, Ila Tyagi, and Timothy J. Viator Stand-up comedians have a long history of walking a careful line between serious and playful engagement with social issues: Lenny Bruce questioned the symbolic valence of racial slurs, Dick Gregory took time away from the stage to speak alongside Martin Luther King Jr., and—more recently—Tig Notaro challenged popular notions of damaged or abject bodies. Stand-up comedians deploy humor to open up difficult topics for broader examination, which only underscores the social and cultural importance of their work. *Taking a Stand: Contemporary US Stand-Up Comedians as Public Intellectuals* draws together essays that contribute to the analysis of the stand-up comedian as public intellectual since the 1980s. The chapters explore stand-up comedians as contributors to and shapers of public discourse via their live performances, podcasts, social media presence, and political activism. Each chapter highlights a stand-up comedian and their ongoing discussion of a cultural issue or expression of a political ideology/standpoint: Lisa Lampanelli's use of problematic postracial humor, Aziz Ansari's merging of sociology and technology, or Maria Bamford's emphasis on mental health, to name just a few. *Taking a Stand* offers a starting point for understanding the work stand-up comedians do as well as its reach beyond the stage. Comedians influence discourse, perspectives, even public policy on myriad issues, and this book sets out to take those jokes seriously.

hypothetical questions to ask my mom: *Transforming Identities* Stephen J. Pape, Camille L. Bryant, Ranjini Mahinda JohnBull, Karen S. Karp, 2023-10-09 2024 SPE Outstanding Book Award Honorable Mention *Transforming Identities* is the story of one doctoral program that was developed to transform the individuals who participated in the program personally and professionally, leading to improved ways of working within their professional practice. The book details the components of the program believed to have contributed to students' transformed personal and professional identities. The description of the program serves as a frame for 14 individual, compelling stories of transformation. These stories include identities experienced during the program, programmatic components that were mechanisms for change, and the impact of these alums' transformation on their professional organizations. In the final chapter, the editors look across the alums' stories of transformation to inform those who are developing/redeveloping doctor of education programs. Mechanisms of change highlighted by these former students include courses, communities of practice, advisers, and comprehensive examination. The book also synthesizes alums' descriptions of the phases of their transformation, what it means to be a scholar-practitioner, and what meaningful contributions "look like" within their professional contexts. The Johns Hopkins University (JHU) Doctor of Education (EdD) program was created with the expressed programmatic outcome of developing leaders who possess the knowledge, skills, and dispositions to rigorously examine educational problems of practice with stakeholders within their context of professional practice. *Transforming Identities* frames this discussion of identity transformation from an improvement science perspective as depicted by Bryk et al. (2015) (see also Author et al., 2022). Using this framework for the Applied Dissertation, the program supported its scholar-practitioners to partner with their colleagues in educational institutions and to independently take on the challenges and opportunities they encountered in their work within their context of professional practice. The initial chapters in the book provide an overview of the EdD program, to frame the remaining chapters in which graduates from the program describe their inspirational stories of transformation. They describe the ways in which the program components, including their dissertation, transformed their identity as well as their work within their context of professional practice. These stories present the ways in which these change agents within their organizations have served as insiders who, with greater knowledge and access to knowledge, were able to become the bridge between research and practice, and practice and research and thereby change their organizations from the inside. These stories of transformation highlight how their skills and insights accurately identify the variability in the contexts in which their problem of practice is situated, the variability in the successes of interventions within similar contexts, and the most appropriate way to move the organization forward toward improved outcomes. Each chapter tells the author's story of transformation from practitioner to scholar-practitioner through the dissertation study and beyond.

This can't be happening to me! Katherine silently screamed as she heard Colonel Favors say something about the military press corps, a subpoena, and gag order. Now on autopilot, Katherine took the court subpoena from Colonel Favors's outstretched hand and was assured it was "just a formality." How could meeting and falling so deeply in love with one man—no, wait!—one extraordinary man, end in such heart-wrenching betrayal, unconscionable crime, and worldwide sensationalism? Movies were made of lesser stuff than this! Katherine closed her eyes for a few seconds. Lord, please forgive me for my part in all this and grant me the courage to do what I know I must do, she silently prayed. Opening her eyes, a fiery determination set in Katherine's jaw—nothing was going to stop her from righting all the wrongs committed by Navy Captain Roger D. Edwards and seeing justice done.
