hypothetical questions to ask parents: Out of the Mouths of Slaves John Baugh, 1999 When the Oakland, California, school board called African American English Ebonics and claimed that it is not a black dialect or any dialect of English, they reignited a debate over language, race, and culture that reaches back to the era of slavery in the United States. In this book, John Baugh, an authority on African American English, sets new parameters for the debate by dissecting and challenging many of the prevailing myths about African American language and its place in American society. Baugh's inquiry ranges from the origins of African American English among slaves and their descendants to its recent adoption by standard English speakers of various races. Some of the topics he considers include practices and malpractices for educating language minority students, linguistic discrimination in the administration of justice, cross-cultural communication between Blacks and whites, and specific linguistic aspects of African American English. This detailed overview of the main points of debate about African American language will be important reading for both scholars and the concerned public.

hypothetical questions to ask parents: *Empirical Linguistics* Geoffrey Sampson, 2002-09-12 Linguistics has become an empirical science again after several decades when it was preoccupied with speakers' hazy intuitions about language structure. With a mixture of English-language case studies and more theoretical analyses, Geoffrey Sampson gives an overview of some of the new findings and insights about the nature of language which are emerging from investigations of real-life speech and writing, often (although not always) using computers and electronic language samples (corpora). Concrete evidence is brought to bear to resolve long-standing questions such as Is there one English language or many Englishes? and Do different social groups use characteristically elaborated or restricted language codes? Sampson shows readers how to use some of the new techniques for themselves, giving a step-by-step recipe-book method for applying a quantitative technique that was invented by Alan Turing in the World War II code-breaking work at Bletchley Park and has been rediscovered and widely applied in linguistics fifty years later.

hypothetical questions to ask parents: *Trust and Betrayal in the Treatment of Child Abuse* Laurie K. MacKinnon, 1998-01-23 Offering a practical new approach to the management of child-at-risk cases, this book illuminates how parents perceive therapists and child protection workers and why, from their own point of view, they so frequently refuse to cooperate with intervention. Amply illustrated by case examples and interviews with parents, the book helps readers overcome common difficulties associated with the referral process while maximizing parents' cooperation and motivation for therapy. MacKinnon challenges dominant professional discourses that attribute abuse to parents' pathology or dysfunction, showing instead how family violence and the referral process itself are inextricably linked to dynamics of gender, class, power, and powerlessness. Readers learn to develop an effective relationship discourse with families, giving voice to the experience of each member and eliciting their commitment to nonviolence, fairness, and equality. Special attention is given to the therapist's role as a power broker who can prevent problems and intervene in difficulties between families and child protection agencies.

hypothetical questions to ask parents: *The Home Education Handbook* Gill Hines, Alison Baverstock, 2019-03-21 'Home-educators want to provide a high quality learning experience for their children and this handbook is an excellent resource for making this aspiration a reality' - Dr Adam

Boddison, Chief Executive of National Association of Special Educational Needs If you are thinking of home educating your child, your initial surprise may be at how easy it is to turn intention into reality. Once you have deregistered your child, you are largely left to get on with delivering education from home, as you see best. This book is full of practical guidance for parents, based on the authors' long experience of working with children and young people; their parents, teachers and schools. It will help you plan what is taught, as well as when and how. The authors not only consider how to benefit from the opportunities home education provides, but also suggest creative ways to fill the potential gaps that might arise from not being part of the traditional school system. The Home Education Handbook covers everything from the socialisation of home-educated children to advice on supporting the motivation and resilience of all involved. This is a book that every parent who is considering home education or flexi-schooling, or is simply keen to ensure that their child gets the best education possible, needs to read.

hypothetical questions to ask parents: 101 Solution-Focused Questions for Help with Trauma

Fredrike Bannink, 2015-10-19 A step-by-step guide to conducting successful solution-focused therapy for survivors of traumatic experiences. This book aims to help therapists working with clients who struggle with trauma by offering them solution-focused (SF) viewpoints and skills. The book invites all professionals to change their focus from what is wrong to what is right with their clients, and from what isn't working to what is working in their lives. The book contains 101 solution-focused questions (and more) for help with trauma, with a focus on the clients' preferred future and the pathways to get there. As Insoo Kim Berg put it in her foreword for Fredrike Bannink's highly successful 1001 Solution-Focused Questions: Handbook for Solution-Focused Interviewing, "SFBT is based on the respectful assumption that clients have the inner resources to construct highly individualized and uniquely effective solutions to their problems." From the more than 2,000 questions she has collected over the years, Bannink has selected the 101 most relevant for each subject. Much of the material in the 3-volume set is unique and did not appear in the earlier work, inviting therapists to open themselves to a new light on interviewing clients.

hypothetical questions to ask parents: **1001 Solution-Focused Questions** Fredrike Bannink, 2011-10-10 An invaluable resource for conducting successful solution-focused therapy. Drawing on nearly 30 years of clinical practice, Bannink compiles solution-focused questions and protocols that are formulated to elicit the client's expertise on the issue(s) that brought him or her to therapy. Categorized for general use and for use with specific types of clients—such as children, couples, and families, and those who have suffered trauma or who might benefit from medication—the questions demonstrate how the precise use of language is an important tool in solution-focused interviewing. Exercises and homework suggestions invite self-reflection and experimentation with the solution-focused model, while case studies illustrate the model's effectiveness with a wide variety of clients. 1001 Solution-Focused Questions equips clinicians with a toolbox full of ready-to-use approaches, so they're prepared to provide support as clients find their own way to a better future.
