image of parent teacher conference: The Rights of the Child and the Changing Image of Childhood Philip E. Veerman, 2021-11-01 In this book Philip E. Veerman presents and discusses milestones in the evolution of children's rights, as well as the work of a number of important pioneers in this field in order to examine whether the concept of childhood has changed in our century. With Samuel Shye's 'Systemic Quality of Life Model' as a conceptual framework and uniform standard, more than forty Declarations and Conventions are analysed and compared. Veerman thus unfolds an exciting picture of the changing image of childhood, starting at the beginning of this century and culminating in the United Nations Convention on the Rights of the Child of 1989, and the World Summit for Children of 1990. Finally the author proposes, together with Samuel Shye, a Declaration on the Rights of the Child based on the 'Systemic Quality of Life Model'. All the important Declarations and Conventions are reprinted as appendices. This makes Veerman's study a complete and up-to-date textbook on children's right. Dr. Veerman is the coordinator of the Israel Section of Defence for Children International (DCI) and Fellow of the Youth Policy Center of Haifa University.

Although literacy, as a fundamental issue in education, has received abundant attention in the last few decades, most publications to date have focused on monolingual classrooms. Language teacher educators have a responsibility to prepare teachers to be culturally responsive and flexible so they can adapt to the range of settings and variety of learners they will encounter in their careers while also bravely questioning the assumptions they are encountering about multilingual literacy development and instruction. *The Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms* is an essential scholarly publication that explores the multifaceted nature of literacy development across the lifespan in a range of multilingual contexts.
