images of leadership quotes: *Images of Joshua in the Bible and Their Reception* Zev Farber, 2016-07-11 The central theme of the book is the relationship between a hero or cultural icon and the cultures in which he or she is venerated. On one hand, a hero cannot remain a static character if he or she is to appeal to diverse and dynamic communities. On the other hand, a traditional icon should retain some basic features in order to remain recognizable. Joshua son of Nun is an iconic figure of Israelite cultural memory described at length in the Hebrew Bible and venerated in numerous religious traditions. This book uses Joshua as a test case. It tackles reception and redaction history, focusing on the use and development of Joshua's character and the deployment of his various images in the narratives and texts of several religious traditions. I look for continuities and discontinuities between traditions, as well as cross-pollination and polemic. The first two chapters look at Joshua's portrayal in biblical literature, using both synchronic (literary analysis) as well as diachronic (Überlieferungsgeschichte and redaction/source criticism) methodologies. The other four chapters focus on the reception history of Joshua in Second Temple and Hellenistic Jewish literature, in the medieval (Arabic) Samaritan Book of Joshua, in the New Testament and Church Fathers, and in Rabbinic literature.

images of leadership quotes: *Deconstructing Images of the Global South Through Media Representations and Communication* Endong, Floribert Patrick C., 2019-12-06 The human condition has continued to improve phenomenally in today's world with the development of technology and medicine. This includes developing countries in areas such as Africa, Asia, and South America. Despite the emergence of economy, education, and infrastructure in these regions, media outlets continue to forego their advancements in favor of the negativities that plague these states such as poverty, hunger, and corruption. There is a need to research international media portrayals of the less developed world to ascertain the myth that these areas are still struggling. *Deconstructing Images of the Global South Through Media Representations and Communication* provides emerging research exploring the theoretical and practical aspects of how global media analyzes developing countries. Featuring coverage on a broad range of topics such as cultural affirmation, online platforms, and audience perception, this book is ideally designed for communications specialists, journalists, broadcasters, newscasters, conflict photographers, media practitioners, policymakers, international relation experts, column writers/editors, students, politicians, government officials, researchers, and academicians seeking current research on the world's perception of developing countries through media coverage.

images of leadership quotes: *Leadership Reconsidered* Ruth A. Tucker, 2008-12-01 While books and articles on leadership abound, most of them are written by successful men who look at the world through the lens of a Western business model. The standard for success is based on the bottom line--financial growth in both the personal and corporate realms. This perspective has infected Christian leadership literature as well. In *Leadership Reconsidered*, Ruth A. Tucker calls for a revised definition--one that abandons the love of power and success for the eternal value of legacy. She challenges the assumption that a leader must by definition have followers, be an extrovert, crave recognition, and dominate others. Instead, legacy encompasses the values of behind-the-scenes influence that are available to everyone and last beyond the grave. This unique and refreshing perspective on leadership is accessible and engaging and will make an impact on anyone who takes it to heart.

images of leadership quotes: Leadership: Three Key Employee-Centered Elements with Case Studies Marc Summerfield, 2020-09-18 Leadership: Three Key Employee-Centered Elements with Case Studies describes three key employee-centered elements (the "employee-centered triad"), which when judiciously and continuously applied, not only improve a leader's chances of creating a fulfilling workplace (a worthy singular goal) but also set the stage for meaningful and enduring change. The three elements are Connection, Gratitude, and Responsiveness. Each element is portrayed via a case study. The book is intended to be a guide for successful human relations for all leaders, but especially for those embarking upon their first leadership challenge in professions such as healthcare, hospitality, engineering, manufacturing, and construction. The three elements don't necessarily compose the complete range of employee-centered human-relations behaviors, but they do provide a substantial start on the path to success—a foundation to build on. The book can be used for self-study, for leadership development, or as a textbook.

images of leadership quotes: Why Leaders Choose War Jonathan Renshon, 2006-05-30 Preventive war has a long history in international politics, but until it became an instrumental part of the Bush Doctrine, it was mostly overlooked. Renshon argues that the best avenue for understanding decisions to initiate preventive action is through a close examination of the individual leader responsible for such decisions. In this work, he develops a theory of psychological motivations for preventive action. By examining five situations, including the Iraq war, he pinpoints the factors that matter most in decisions to take preventive military action. There have been preventive wars throughout history, but the motivations behind them have remained elusive, and many crucial questions remain unanswered. What exactly constitutes preventive action? What differentiates preventive action from pre-emptive action? Are there significant differences between preventive strikes and full-on preventive wars? What is the relationship of preventive action to traditional concepts of deterrence, compellence, and international law? Finally, why do states initiate preventive action? Renshon argues that the best avenue for understanding decisions to initiate preventive action is through a close examination of the individual leader responsible for such decisions.

images of leadership quotes: Steeltown U.S.A Sherry Lee Linkon, John Russo, 2002 Once the symbol of a robust steel industry and blue-collar economy, Youngstown, Ohio, and its famous Jeannette Blast Furnace have become key icons in the tragic tale of American deindustrialization.

Sherry Lee Linkon and John Russo examine the inevitable tension between those discordant visions, which continue to exert great power over Steeltown's citizens as they struggle to redefine their lives. When the Jenny was shut down in 1978, 50,000 Youngstown workers lost their jobs, cutting the heart out of the local economy. Even as the community organized a nationally recognized effort to save the mills, the city was rocked by economic devastation, runaway crime, and mob scandal, problems that persist twenty-five years later. In the midst of these struggles the Jenny remained standing as a proud symbol of the community's glory days, still a dominant force in the construction of both individual and collective identities in Youngstown. Focusing on stories and images that both reflect and perpetuate how Youngstown understands itself as a community, Sherry Lee Linkon and John Russo have forged a historical and cultural study of the relationship between community, memory, work, and confl
