in my business you don t trust anybody: Deep Secrets Niobe Way, 2013-05-06 Boys are emotionally illiterate and don't want intimate friendships. In this empirically grounded challenge to our stereotypes about boys and men, Niobe Way reveals the intense intimacy among teenage boys

especially during early and middle adolescence. Boys not only share their deepest secrets and feelings with their closest male friends, they claim that without them they would go Òwacko.Ó Yet as boys become men, they become distrustful, lose these friendships, and feel isolated and alone. Drawing from hundreds of interviews conducted throughout adolescence with black, Latino, white, and Asian American boys, *Deep Secrets* reveals the ways in which we have been telling ourselves a false story about boys, friendships, and human nature. BoysÕ descriptions of their male friendships sound more like Òsomething out of *Love Story* than *Lord of the Flies*.Ó Yet in late adolescence, boys feel they have to Òman upÓ by becoming stoic and independent. Vulnerable emotions and intimate friendships are for girls and gay men. ÒNo homoÓ becomes their mantra. These findings are alarming, given what we know about links between friendships and health, and even longevity. Rather than a Òboy crisis,Ó Way argues that boys are experiencing a Òcrisis of connectionÓ because they live in a culture where human needs and capacities are given a sex (female) and a sexuality (gay), and thus discouraged for those who are neither. Way argues that the solution lies with exposing the inaccuracies of our gender stereotypes and fostering these critical relationships and fundamental human skills.

Using rich interviews and participant observation, Patrick Ferrucci examines institutions with funding mechanisms that range from traditional mogul ownership and online-only nonprofits to staff-owned cooperatives and hedge fund control. The variations in market models have frayed the tenets of professionalization, with unique work cultures emerging from each organization's focus on its mission and the implantation of its own processes and ethical guidelines. As a result, the field of American journalism no longer shares uniform newsgathering practices and a common identity, a break with the past that affects what information we consume today and what the press will become tomorrow.
