Culture is seen as the medium through which people live and make meaning of their lives. In this book,

analyses focus on the mutual constitution of people's memories and the social-cultural worlds to which they belong. The complex relationship between culture and memory is explored in: the concept of memory and its relation to evolution, neurology and history; life course changes in memory from its development in childhood to its decline in old age; and the national and transnational organization of collective memory and identity through narratives propagated in political discourse, the classroom, and the media.

in flanders fields poem analysis: *Testing the Boundaries* Patricia 'Iolana, Samuel Tongue, 2011-01-18 As individuals, we have the ability (although not always the opportunity) to create our own paradigmatic image of the Divine; moreover, as a society we can alter, transform, or even replace those paradigms. Progressive movements exist in nearly every faith tradition—moving towards the future of our world and our belief systems; these movements include both radical and reformist thinkers, and they are challenging the lenses that we employ to image, worship, connect with and understand the Divine. With so many possible interpretations and paradigms competing for social acceptance and support, the choice must be made carefully and wisely, bearing in mind the inevitability of change whilst remaining open to pluralities of thought and practice. This is especially important when it comes to the future of theology and religious studies—in particular to the relations between the various global faith traditions. In *Testing the Boundaries*, ten scholars explore the praxis of faith including our image of Self in relation to the Divine, our relation to the religious Other, our struggle for religious identity in new locales, the limits of language and translations in sacred texts, our responsibility to nature, our nomadic and transitory tendencies, traditions in the academy, and our interreligious relationships. They test the boundaries of traditional theology and their interdisciplinary fields—dancing in the liminal space where possibilities gather.

in flanders fields poem analysis: *Social Imaginaries in a Globalizing World* Hans Alma, Guido Vanheeswijck, 2018-08-06 How to study the contemporary dynamics between the religious, the nonreligious and the secular in a globalizing world? Obviously, their relationship is not an empirical datum, liable to the procedures of verification or of logical deduction. We are in need of alternative conceptual and methodological tools. This volume argues that the concept of 'social imaginary' as it is used by Charles Taylor, is of utmost importance as a methodological tool to understand these dynamics. The first section is dedicated to the conceptual clarification of Taylor's notion of social imaginaries both through a historical study of their genealogy and through conceptual analysis. In the second section, we clarify the relation of 'social imaginaries' to the concept of (religious) worldviewing, understood as a process of truth seeking. Furthermore, we discuss the practical usefulness of the concept of social imaginaries for cultural scientists, by focusing on the concept of human rights as a secular social imaginary. In the third and final section, we relate Taylor's view on the role of social imaginaries and the new paths it opens up for religious studies to other analyses of the secular-religious divide, as they nowadays mainly come to the fore in the debates on what is coined as the 'post-secular.'

in flanders fields poem analysis: *Catching the Torch* Neta Gordon, 2014-03-25 *Catching the Torch* examines contemporary novels and plays written about Canada's participation in World War I. Exploring such works as Jane Urquhart's *The Underpainter* and *The Stone Carvers*, Jack Hodgins's *Broken Ground*, Kevin Kerr's *Unity* (1918), Stephen Massicotte's *Mary's Wedding*, and Frances Itani's *Deafening*, the book considers how writers have dealt with the compelling myth that the Canadian nation was born in the trenches of the Great War. In contrast to British and European remembrances of WWI, which tend to regard it as a cataclysmic destroyer of innocence, or Australian myths that promote an ideal of outsize masculinity, physical bravery, and white superiority, contemporary Canadian texts conjure up notions of distinctively Canadian values: tolerance of ethnic difference, the ability to do one's duty without complaint or arrogance, and the inclination to show moral as well as physical courage. Paradoxically, Canadians are shown to decry the horrors of war while making use of its productive cultural effects. Through a close analysis of the

way sacrifice, service, and the commemoration of war are represented in these literary works, *Catching the Torch* argues that iterations of a secure mythic notion of national identity, one that is articulated via the representation of straightforward civic and military participation, work to counter current anxieties about the stability of the nation-state, in particular anxieties about the failure of the ideal of a national character.
