in motion property management: Fire Sale Philip McKernan, 2010-10-12 The ads are everywhere. US real estate at rock-bottom prices. Posh homes in gated communities devalued 50% from a year ago. US real estate agents with nowhere to go in their own backyard are targeting Canada and other countries to attract buyers to the land of the foreclosed and the home of the bushwhacked. As the US housing market remains in crisis and foreign currencies increase in strength relative to the US dollar, foreign investment into real estate in America is reaching new highs, particularly in the sunbelt states. The opportunity to invest in these properties, either as an investment property or a vacation home, is made even more attractive in light of the record number of distressed properties (AKA foreclosures) on the market or in the pipeline due to high levels of unemployment in the US, high consumer debt, and ongoing fallout from the subprime crisis. But what does opportunity really look like? What due diligence must an investor do to buy with confidence? What are the pitfalls? The legal and tax considerations? While the property and price may look good on paper, how can you ensure that your investment is a sound one? Philip McKernan and his crack team of experts teach you everything you need to know about investing in distressed properties in the United States, including sourcing distressed properties; building the right team of real estate agent, finance expert, lawyer, and accountant; understanding the tax and legal issues; and having an exit strategy. Make sure you're getting the best deals possible and avoiding any nasty surprises. Be prepared and aware, with *Fire Sale: How to Buy US Foreclosures*.

in motion property management: Designing San Francisco Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco Designing San Francisco is the untold story of the formative postwar decades when U.S. cities took their modern shape amid clashing visions of the future. In this pathbreaking and richly illustrated book, Alison Isenberg shifts the focus from architects and city planners—those most often hailed in histories of urban development and design—to the unsung artists, activists, and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s. Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs—put simply, development versus preservation—and have followed New York City models. Now Isenberg turns our attention west to colorful, pioneering, and contentious San Francisco, where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square, Golden Gateway, and the Transamerica Pyramid. When large-scale redevelopment came to low-rise San Francisco in the 1950s, the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals, including architectural model makers, real estate publicists, graphic designers, photographers, property managers, builders, sculptors, public-interest lawyers, alternative press writers, and preservationists. Isenberg explores how these centrally engaged arts professionals brought new ideas to city, regional, and national planning and shaped novel projects across urban, suburban, and rural borders. San Francisco's rebuilding galvanized far-reaching critiques of the inequitable competition for scarce urban land, and propelled debates over responsible public land stewardship. Isenberg challenges many truisms of this renewal era—especially the presumed male domination of postwar urban design, showing how women collaborated in city building long before feminism's impact in the 1970s. An evocative portrait of one

of the world's great cities, Designing San Francisco provides a new paradigm for understanding past and present struggles to define the urban future.

in motion property management: Business Improvement Districts Goktug Morcol, Lorlene Hoyt, Jack W. Meek, Ulf Zimmermann, 2017-09-29 Initiated and governed by property or business owners under the authorization of state and local governments, business improvement districts (BIDs) have received a very mixed reception. To some, they are innovative examples of self-governance and public-private partnerships; to others, they are yet another example of the movement toward the privatization of what should be inherent government responsibilities. Among the first books to present a collection of scholarly work on the subject, Business Improvement Districts: Research, Theories, and Controversies brings together renowned leaders in the field to compile the highest-quality theoretical, legal, and empirical studies into one comprehensive volume. Investigating fundamental concerns at the core of the debate, as well as potential solutions, this groundbreaking resource: Tackles the need for improved problem solving and efficiency in service delivery Examines new and innovative policy tools for both the public and private sectors Evaluates whether BIDs do ignore the needs and voices of residential property owners Discusses the challenge created by social segregation in cities Addresses lack of accountability by BIDs to the public and elected representatives From different perspectives, leading practitioners and academics analyze the pros and cons of BIDs both in the United States and around the world. They look at their impact on urban planning and retail revitalization, consider their legal implications, and explore ways to measure BID performance. Filled with case studies of urban centers including San Diego, Atlanta, New York, Toronto, and Capetown, and state models such as New Jersey and Pennsylvania, this examination bring together essential information for researchers as well as those leaders and policy makers looking to adopt a BID model or improve one already in place.
