They were not only useless as fighting men, but were also likely to be a bad influence on others. Normal methods of punishment were tried repeatedly, to little effect, and as the expanding Army began to run short of manpower new methods were tried to deal with the delinquents. In September 1941 new experimental Special Training Units were established with the aim of converting them into good soldiers through careful individual treatment and retraining. The units aimed to achieve retraining through education and not punishment, and this book, first published in 1952, is a careful analysis of the aims and results of the programme.

UFM represents a developing paradigm shift with many new parameters extending the Standard Model to a 3rd regime of Natural Science beyond Quantum Mechanics. UFM is now experimentally testable, thus putatively able to demonstrate the existence of large-scale additional dimensionality (LSXD), test for QED violating phenomena and surmount the quantum uncertainty principle leading to a new 'Age of Discovery' piling all prior ages in the historical progression: Classical Mechanics (3D) to Quantum Mechanics (4D) and now to the birth of the 3rd regime of UFM in additional dimensionality correlating with M-Theory. Many still consider the Planck-scale as the 'basement of reality'. This could only be considered true under the limitations of the Standard Model. As we methodically enter the new regime a profound understanding of the multiverse and additional dimensionality beckons.
