

mathematical programming symposium canada

2024

mathematical programming symposium canada 2024 represents a pivotal event for academics, researchers, and professionals involved in optimization, operations research, and mathematical programming disciplines. This symposium is set to gather leading experts and emerging scholars from across Canada and around the world to share advancements, explore innovative methodologies, and foster collaborations in the field of mathematical programming. Attendees can expect a comprehensive program including keynote speeches, technical sessions, workshops, and networking opportunities designed to address both theoretical foundations and practical applications. The 2024 edition will highlight cutting-edge research trends, computational techniques, and real-world problem-solving strategies. This article provides an in-depth overview of the mathematical programming symposium canada 2024, covering its objectives, thematic focus, key participants, and logistical details. The following table of contents outlines the major sections discussed below.

• Overview of Mathematical Programming Symposium Canada 2024	1
• Key Themes and Topics	5
• Event Structure and Program Highlights	10
• Speakers and Participants	15
• Registration, Venue, and Dates	20
• Opportunities for Collaboration and Networking	25

Overview of Mathematical Programming Symposium Canada 2024

The mathematical programming symposium canada 2024 is an annual conference dedicated to advancing research and development in mathematical programming and optimization. It serves as a platform for knowledge exchange among researchers, industry practitioners, and students interested in mathematical models, algorithms, and computational methods. The symposium emphasizes both theoretical innovations and practical implementations, spanning various sectors such as logistics, finance, energy, and manufacturing.

Organized by leading Canadian academic institutions in collaboration with professional societies, this event fosters an environment conducive to interdisciplinary dialogue. The 2024 symposium continues the tradition of excellence by integrating emerging topics in machine learning, data-driven optimization, and stochastic programming into its agenda. It aims to contribute significantly to the global discourse on optimization techniques and their applications in solving complex decision-making problems.

Historical Context and Significance

Since its inception, the mathematical programming symposium canada has played a crucial role in shaping research directions within Canada and internationally. Each year, it attracts a diverse group of participants who present their latest findings, discuss challenges, and set future research agendas. The 2024 symposium builds on this legacy by introducing new thematic areas and expanding its outreach to industry stakeholders.

Objectives of the 2024 Symposium

The primary objectives of the mathematical programming symposium canada 2024 include:

- Promoting cutting-edge research in mathematical programming and optimization techniques.

- Facilitating collaboration between academia and industry to address real-world problems.
- Encouraging the development and dissemination of novel algorithms and computational tools.
- Providing a forum for young researchers and students to present their work and network with experts.
- Highlighting interdisciplinary approaches integrating optimization with data science and artificial intelligence.

Key Themes and Topics

The mathematical programming symposium canada 2024 covers a broad spectrum of themes reflecting current trends and challenges in the field. The program is designed to address both foundational and applied aspects of mathematical programming.

Optimization Theory and Algorithms

Sessions under this theme focus on the development and analysis of optimization algorithms, including linear, nonlinear, integer, and combinatorial optimization methods. Researchers will present advances in convergence theory, complexity analysis, and algorithmic frameworks tailored for large-scale and high-dimensional problems.

Stochastic and Robust Optimization

Given the uncertainty inherent in many practical problems, stochastic programming and robust optimization constitute vital areas of research. Presentations will explore models and solution techniques that incorporate randomness, uncertainty sets, and risk measures to enhance decision-

making robustness.

Applications in Industry and Technology

The symposium recognizes the importance of translating theoretical progress into impactful applications. Topics include supply chain optimization, energy systems management, financial engineering, machine learning integration, and healthcare logistics optimization.

Emerging Trends and Interdisciplinary Approaches

Innovative intersections of mathematical programming with artificial intelligence, data analytics, and computational sciences will be emphasized. This includes research on optimization in neural networks, reinforcement learning, and data-driven optimization methodologies.

Event Structure and Program Highlights

The mathematical programming symposium canada 2024 is structured to maximize engagement and knowledge dissemination through a variety of session formats.

Keynote Lectures

Renowned experts in mathematical programming and related disciplines will deliver keynote addresses highlighting recent breakthroughs, future directions, and challenges. These talks set the tone for the symposium and inspire in-depth discussions.

Technical Sessions and Paper Presentations

The core scientific program consists of parallel technical sessions where participants present peer-

reviewed papers. These sessions enable detailed exploration of specific topics, fostering scholarly exchange and critique.

Workshops and Tutorials

Pre-conference and concurrent workshops offer hands-on learning opportunities focused on specialized methods, software tools, and emerging research areas. Tutorials provide comprehensive overviews of foundational topics and novel techniques.

Panel Discussions and Poster Sessions

Panel discussions encourage debate on topical issues, including ethical considerations and the future landscape of mathematical programming. Poster sessions provide a platform for early-career researchers to showcase preliminary results and receive feedback.

Speakers and Participants

The mathematical programming symposium canada 2024 attracts a diverse and distinguished group of attendees, including international scholars, industry leaders, and government representatives.

Distinguished Speakers

The lineup features prominent academics known for their contributions to optimization theory and applications, as well as practitioners from sectors leveraging mathematical programming for strategic advantage. These speakers bring cutting-edge insights and real-world perspectives to the event.

Attendee Profile

Participants include professors, researchers, graduate students, data scientists, engineers, and decision-makers interested in optimization. The interdisciplinary nature of the symposium encourages collaboration across fields such as computer science, economics, and engineering.

Opportunities for Students and Early-Career Researchers

Special sessions and awards are dedicated to supporting young researchers. These opportunities facilitate career development, mentorship, and exposure to the broader optimization community.

Registration, Venue, and Dates

Details regarding registration procedures, venue location, and event scheduling are crucial for prospective attendees planning to participate in the mathematical programming symposium canada 2024.

Registration Process

Registration for the symposium is accessible online, with early-bird discounts available for advance sign-ups. Different categories include full conference passes, one-day registrations, and student rates. Payment methods and cancellation policies are clearly outlined to accommodate participants' needs.

Venue Information

The 2024 symposium will be hosted at a premier conference facility in a major Canadian city known for its academic and technological infrastructure. The venue offers state-of-the-art meeting rooms, exhibition spaces, and amenities conducive to professional gatherings.

Event Dates and Schedule

The symposium is scheduled over several days, typically spanning three to four days in the spring or summer of 2024. The detailed agenda includes opening and closing ceremonies, keynote sessions, parallel technical tracks, and social events to foster community building.

Opportunities for Collaboration and Networking

One of the primary benefits of the mathematical programming symposium canada 2024 lies in its facilitation of professional connections and collaborative ventures.

Networking Events

Dedicated networking sessions, coffee breaks, and social receptions provide informal settings for participants to meet peers, discuss shared interests, and explore partnerships. Such interactions often lead to joint research projects and industry collaborations.

Industry Engagement

Corporate sponsors and industry representatives participate actively, showcasing applications of mathematical programming in business contexts. This engagement offers attendees insights into market trends and potential career opportunities.

Collaborative Research Initiatives

The symposium encourages the formation of research consortia and interdisciplinary teams to tackle complex optimization challenges. Collaborative workshops and special interest groups facilitate sustained cooperation beyond the event.

Benefits of Participation

1. Access to the latest research and technological advances.
2. Expanded professional network spanning academia and industry.
3. Opportunities for publication and presentation of original work.
4. Exposure to funding and career development resources.
5. Enhanced visibility within the global mathematical programming community.

Frequently Asked Questions

What is the Mathematical Programming Symposium Canada 2024?

The Mathematical Programming Symposium Canada 2024 is a conference focused on recent advances and research in mathematical programming, optimization, and related fields, bringing together researchers, practitioners, and students from Canada and around the world.

When and where will the Mathematical Programming Symposium Canada 2024 be held?

The symposium is scheduled to take place in 2024 at a designated venue in Canada. Specific dates and location details are typically announced on the official event website or organizing committee's page.

Who should attend the Mathematical Programming Symposium Canada 2024?

The symposium is ideal for researchers, academics, industry professionals, graduate students, and anyone interested in mathematical programming, optimization techniques, and their applications.

What are the main topics covered at the Mathematical Programming Symposium Canada 2024?

Key topics include linear and nonlinear programming, integer and combinatorial optimization, stochastic programming, algorithmic development, applications in engineering, economics, data science, and emerging trends in optimization.

How can I submit a paper or abstract to the Mathematical Programming Symposium Canada 2024?

Submission guidelines are usually provided on the symposium's official website. Authors are typically required to submit abstracts or full papers through an online portal by a specified deadline for peer review and consideration.

Are there networking opportunities at the Mathematical Programming Symposium Canada 2024?

Yes, the symposium offers numerous networking opportunities including keynote sessions, panel discussions, workshops, social events, and poster presentations, facilitating collaboration among attendees.

Where can I find more information or register for the Mathematical Programming Symposium Canada 2024?

More information and registration details can be found on the official symposium website or through

announcements by the organizing committee, often hosted by Canadian mathematical societies or academic institutions.

Additional Resources

1. *Advances in Mathematical Programming: Proceedings of the Canada 2024 Symposium*

This comprehensive volume compiles the latest research presented at the Mathematical Programming Symposium Canada 2024. It covers a range of topics including optimization algorithms, integer programming, and nonlinear programming. The book serves as a valuable resource for researchers and practitioners interested in cutting-edge developments and practical applications in mathematical programming.

2. *Optimization Techniques in Mathematical Programming: Canada Symposium Insights*

Focusing on optimization methods discussed during the 2024 Canadian symposium, this book explores both classical and modern techniques. It highlights advancements in linear, nonlinear, and combinatorial optimization, with real-world case studies. Readers will gain a deeper understanding of how these techniques are shaping decision-making processes across various industries.

3. *Mathematical Programming and Data Science: Innovations from Canada 2024*

This title bridges the gap between mathematical programming and data science, showcasing innovative approaches presented at the 2024 symposium. Topics include machine learning integration, big data optimization, and stochastic programming. The book is ideal for those interested in the intersection of mathematical modeling and data-driven solutions.

4. *Integer and Combinatorial Optimization: Highlights from the Canadian Symposium 2024*

Dedicated to integer and combinatorial optimization, this collection features pioneering research from the 2024 event. It covers theory, algorithms, and applications in scheduling, network design, and resource allocation. The book provides insights into solving complex discrete optimization problems efficiently.

5. *Nonlinear Programming Advances: Canadian Symposium Perspectives 2024*

This book offers an in-depth look at nonlinear programming advancements discussed at the 2024 Canadian symposium. It addresses new algorithms, convergence analysis, and applications in engineering and economics. Readers will find detailed theoretical developments alongside practical implementation strategies.

6. Stochastic Programming and Uncertainty Modeling: Canada 2024 Symposium Contributions

Focusing on stochastic programming, this volume presents cutting-edge research on modeling uncertainty in optimization problems. Topics include scenario generation, risk measures, and robust optimization techniques highlighted at the 2024 symposium. It is essential for those working with uncertain or dynamic environments.

7. Mathematical Programming Software and Computational Tools: Canada Symposium 2024

This book reviews state-of-the-art software and computational tools featured at the 2024 symposium. It discusses algorithm implementation, high-performance computing, and software frameworks that facilitate solving complex mathematical programming problems. The text is beneficial for computational mathematicians and software developers.

8. Applications of Mathematical Programming in Industry: Insights from Canada 2024

Highlighting practical applications presented at the symposium, this book explores how mathematical programming techniques optimize operations in manufacturing, logistics, finance, and energy sectors. Case studies demonstrate the impact of these methods in solving real-world challenges. The book is a useful guide for industry professionals and applied researchers.

9. Emerging Trends in Mathematical Programming: Canadian Symposium 2024 Review

This forward-looking volume identifies emerging research directions and trends discussed during the 2024 symposium. It covers topics such as quantum optimization, multi-objective programming, and interdisciplinary approaches. The book is aimed at academics and practitioners seeking to stay at the forefront of mathematical programming research.

mathematical programming symposium canada 2024: Proceedings of the Canadian Society for Civil Engineering Annual Conference 2023, Volume 3 Serge Desjardins, Gérard J. Poitras, Mazdak Nik-Bakht, 2024-10-15 This book comprises the proceedings of the Annual Conference of the Canadian Society for Civil Engineering 2023. The contents of this volume focus on the specialty track in construction with topics on modular and offsite construction, BIM, construction planning and project management, construction automation, AI and robotics in construction, sustainable construction, asset management, and construction safety, among others. This volume will prove a valuable resource for researchers and professionals.

mathematical programming symposium canada 2024: *Integer Programming and Combinatorial Optimization* Nicole Megow,

mathematical programming symposium canada 2024: *34th European Symposium on Computer Aided Process Engineering /15th International Symposium on Process Systems Engineering* Flavio Manenti, G.V. Rex Reklaitis, 2024-06-27 The 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering, contains the papers presented at the 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering joint event. It is a valuable resource for chemical engineers, chemical process engineers, researchers in industry and academia, students, and consultants for chemical industries. - Presents findings and discussions from the 34th European Symposium on Computer Aided Process Engineering / 15th International Symposium on Process Systems Engineering joint event

mathematical programming symposium canada 2024: Proceedings of the 15th International Marine Design Conference Austin A. Kana, 2024-08-22 The 15th International Marine Design Conference (IMDC-2024) was organized by the Department of Maritime and Transport Technology, Delft University of Technology, and was hosted by the Netherlands Defence Materiel Organisation at the Marine Etablissement Amsterdam (MEA). The aim of the IMDC is to promote all aspects of marine design as an engineering discipline. The focus of IMDC-2024 is on the key design challenges and opportunities in the maritime field with special emphasis on the following themes. Ship design methodology issues such as: design spiral, systems engineering, set-based design, design optimisation, concurrent design, modular design, configuration based design, or 'fuzzy' design aspects. Novel marine design concepts, such as: hull form design, transport ships, service vessels, naval vessels, yachts and cruise ships, or specialized and complex vessels. Offshore design methodology, such as applications to: offshore wind turbines, semi-submersibles, floating fish farms, or floating cities. Influence of energy transition on maritime design, including both zero emission and high power and energy systems. Influence of unmanned and autonomous transition on maritime design. Influence of digital transition on maritime design, such as: digital shadows and twins, model-based systems engineering, AI, ML and big data. Influence of regulations on maritime design. Maritime design education

mathematical programming symposium canada 2024: Programming Languages and Systems Viktor Vafeiadis, 2025-04-30 The open access book set LNCS 15694 + LNCS 15695 constitutes the proceedings of the 34th European Symposium on Programming, ESOP 2025, which was held as part of the International Joint Conferences on Theory and Practice of Software, ETAPS 2025, in Hamilton, Canada, during May 3-8, 2025. The 30 full papers included in the proceedings

were carefully reviewed and selected from a total of 88 submissions. The proceedings also contain two short artifact reports. The papers focus on aspects of programming language research such as programming paradigms and styles; methods and tools to specify and reason about programs and languages; programming language foundations; methods and tools for implementation, concurrency and distribution; and applications and emerging topics.

mathematical programming symposium canada 2024: Programming Languages and Systems Stephanie Weirich, 2024-04-04 The two-volume open access book set LNCS 14576 + 14577 constitutes the proceedings of the 33rd European Symposium on Programming, ESOP 2024, which was held during April 6-11, 2024, in Luxembourg, as part of the European Joint Conferences on Theory and Practice of Software, ETAPS 2024. The 25 full papers and 1 fresh perspective paper presented in these proceedings were carefully reviewed and selected from 72 submissions. The papers were organized in topical sections as follows: Part I: Effects and modal types; bidirectional typing and session types; dependent types; Part II: Quantum programming and domain-specific languages; verification; program analysis; abstract interpretation.

mathematical programming symposium canada 2024: Intelligent Data Engineering and Automated Learning - IDEAL 2024 Vicente Julian, David Camacho, Hujun Yin, Juan M. Alberola, Vitor Beires Nogueira, Paulo Novais, Antonio Tallón-Ballesteros, 2024-11-19 This two-volume set, LNCS 15346 and LNCS 15347, constitutes the proceedings of the 25th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2024, held in Valencia, Spain, during November 20-22, 2024. The 86 full papers and 6 short papers presented in this book were carefully reviewed and selected from 130 submissions. IDEAL 2024 is focusing on Big Data Analytics and Privacy, Machine Learning & Deep Learning for Real-World Applications, Data Mining and Pattern Recognition, Information Retrieval and Management, Bio and Neuro-Informatics, and Hybrid Intelligent Systems and Agents.

mathematical programming symposium canada 2024: Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich, 1999 Contains essential bibliographic and access information on serials published throughout the world.

mathematical programming symposium canada 2024: AI Verification Guy Avni, Mirco Giacobbe, Taylor T. Johnson, Guy Katz, Anna Lukina, Nina Narodytska, Christian Schilling, 2024-07-16 This LNCS volume constitutes the proceedings of the First International Symposium on AI Verification, SAIV 2024, in Montreal, QC, Canada, during July 2024. The scope of the topics was broadly categorized into two groups. The first group, formal methods for artificial intelligence, comprised: formal specifications for systems with AI components; formal methods for analyzing systems with AI components; formal synthesis methods of AI components; testing approaches for systems with AI components; statistical approaches for analyzing systems with AI components; and approaches for enhancing the explainability of systems with AI components. The second group, artificial intelligence for formal methods, comprised: AI methods for formal verification; AI methods for formal synthesis; AI methods for safe control; and AI methods for falsification.

mathematical programming symposium canada 2024: Proceedings of International Conference on Decision Aid and Artificial Intelligence (ICODAI 2024) Saoussen Krichen, Hajer Ben-Romdhane, Issam Nouaouri, 2025-02-21 This open access volume contains the select proceedings of the The International Conference on Decision Aid and Artificial Intelligence (ICODAI 2024). It emphasizes the importance of AI in both healthcare and education sectors, fostering knowledge exchange and implementing intelligent decision-support technologies to enhance patient care and educational outcomes.

mathematical programming symposium canada 2024: Integer Programming and Related Areas A Classified Bibliography 1976-1978 D. Hausmann, 2012-12-06

mathematical programming symposium canada 2024: Addressing Modern Challenges in the Mathematical, Statistical, and Computational Sciences D. Marc Kilgour, Herb Kunze, Roman N. Makarov, Roderick Melnik, Xu Wang, 2025-09-24 This proceedings volume features a selection of peer-reviewed papers presented at the 6th AMMCS-International Conference on Applied

Mathematics, Modeling, and Computational Science, held in Waterloo, Canada, from August 14–18, 2023. The papers delve into topics where mathematical modeling and applications play a pivotal role, including computational models in physics and chemistry, statistical models in life science, analysis in science and engineering, and finance and social science methods, among others. Since 2011, the AMMCS conference series has provided a unique platform for technical discussions and the exchange of ideas in all areas related to mathematical, statistical, and computational sciences, modeling, and simulation. Esteemed researchers, industrialists, engineers, and students have presented their latest research and engaged with experts in the field, fostering interdisciplinary collaborations that address the challenges of modern science, technology, and society. This book is a valuable resource for academics and practitioners who are interested in the latest developments in these fields.

mathematical programming symposium canada 2024: Forest Harvest Scheduling Pete Bettinger, 2025-07-01 This book provides a synthesis of methods that have been used in both practice and research to develop forest harvest schedules (plans of action) and to assess alternative policy scenarios. Beginning with exact mathematical methods (linear, mixed integer, and goal programming), the book provides a brief history of their conception, followed by an approachable description of the processes commonly employed to search a solution space for the optimal solution to a problem. Hill-climbing, random search, and binary search processes are then described as relatively simple alternatives to the exact methods. Heuristic search processes (threshold accepting, simulated annealing, tabu search, and genetic algorithms) are then described as semi-rational, biased alternatives to solving forest harvest scheduling problems. The closing remarks of the book provide context for the use of forest harvest scheduling in addressing today's contemporary forest management issues. In addition to a set of common-sense principles that are introduced throughout the book, provided in the book is a fifty-question exam associated with the content introduced.

mathematical programming symposium canada 2024: Tools and Algorithms for the Construction and Analysis of Systems Arie Gurfinkel, Marijn Heule, 2025-04-30 The open access book set LNCS 15696, 15697 and 15698 constitutes the proceedings of the 31st International Conference on Tools and Algorithms for the Construction and Analysis of Systems, TACAS 2025, which was held as part of the International Joint Conferences on Theory and Practice of Software, ETAPS 2025, during May 3-8, 2025, in Hamilton, Canada. The 46 papers presented were carefully reviewed and selected from 148 submissions. The proceedings also include 14 papers from the Software Verification competition which was held as part of TACAS. The papers were organized in topical sections as follows: Part I: Program analysis, ATP and rewriting; model checking; LTL; verification; Part II: SAT and SMT solving; proofs and certificates; synthesis; equivalence checking; games; Part III: Verification; quantum and GPU; 14th Competition on Software Verification, SV-COMP 2025.

mathematical programming symposium canada 2024: Automated Reasoning Christoph Benzmüller, Marijn J.H. Heule, Renate A. Schmidt, 2024-06-30 This two-volume set of LNAI 14739-14740 constitute the proceedings of the 12th International Joint Conference on Automated Reasoning, IJCAR 2024, held in Nancy, France, during July 3-6, 2024. The 39 full research papers and 6 short papers presented in this book were carefully reviewed and selected from 115 submissions. The papers focus on the following topics: theorem proving and tools; SAT, SMT and Quantifier Elimination; Intuitionistic Logics and Modal Logics; Calculi, Proof Theory and Decision Procedures; and Unification, Rewriting and Computational Models. This book is open access.

mathematical programming symposium canada 2024: Technology and Innovation in Learning, Teaching and Education Arsénio Reis, José P. Cravino, Leontios Hadjileontiadis, Paulo Martins, Sofia B. Dias, Sofia Hadjileontiadou, Tassos Mikropoulos, 2025-08-21 The three-volume set CCIS 2479-2481 constitutes the proceedings of the 4th International Conference on Technology and Innovation in Learning, Teaching and Education, TECH-EDU 2024, held in Abu Dhabi, United Arab Emirates, during November 13–15, 2024. The 79 full papers presented in this volume were carefully reviewed and selected from 167 submissions. The papers are organized in the following topical

sections: Part I: Artificial Intelligence in Education; Emerging Technologies and Learning Environments. Part II: Open Education, Digital Resources and Online Assessment; Pedagogical and Curricular Innovation. Part III: Technology Integration and Educational Policy.

mathematical programming symposium canada 2024: 4th International Conference "Coordinating Engineering for Sustainability and Resilience" & Midterm Conference of CircularB "Implementation of Circular Economy in the Built Environment" Viorel Ungureanu, Luís Bragança, Charalambos Baniotopoulos, Khairedin M. Abdalla, 2024-05-09 This open access book gathers the proceedings of the 4th International Conference "Coordinating Engineering for Sustainability and Resilience" (CESARE) & Midterm Conference of CircularB "Implementation of Circular Economy in the Built Environment", held in Timișoara, Romania, on May 29-31, 2024, as part of the COST Action CA21103. The volume represents the state of the art of sustainability and resilience in modern and future built environment, constructions, and infrastructure, and includes topics such as structural materials and robustness, fire engineering, risk assessment, impact of climate change on the built environment, sustainable resilience of systems in the built environment, smart cities, circular economy, design strategies for product design, integration of renewable energy at building and small urban area scales, restoration & rehabilitation of historical buildings, sustainable infrastructures, wind energy structures, façade engineering, green buildings, and waste management.

mathematical programming symposium canada 2024: Disciplinary aesthetics: The role of taste and affect for teaching and learning specific school subjects Per-Olof Wickman, Per Anderhag, Cecilia Caiman, Steph Ainsworth, 2024-04-04

mathematical programming symposium canada 2024: Bihar Sakshamta Pariksha : Computer Science 2024 | Higher Secondary School Class 11-12 - Niyojit Special Teacher | 10 Practice Tests Edugorilla Prep Experts, • Best Selling Book in English Edition for Bihar Sakshamta Pariksha : Computer Science (Higher Secondary School Class 11-12) comes with objective-type questions as per the latest syllabus given by the Bihar School Examination Board (BSEB) • Bihar Sakshamta Pariksha : Computer Science (Class XI-XII) Preparation kit comes with 10 Practice Tests with the best quality content. • Increase your chances of selection by 16X. • Bihar Sakshamta Pariksha : Computer Science (Class XI-XII) comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts.

mathematical programming symposium canada 2024: Advances and Trends in Artificial Intelligence. Theory and Applications Hamido Fujita, Richard Cimler, Andres Hernandez-Matamoros, Moonis Ali, 2024-07-09 This book constitutes the refereed proceedings of the 37th International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems on Advances and Trends in Artificial Intelligence, IEA/AIE 2024, held in Hradec Kralove, Czech Republic, in July 10-12, 2024. The 38 full papers and 3 short papers presented were carefully reviewed and selected from 79 submissions. The papers focus on the following topics: Computer vision, Cyber security, Data mining, E-applications, Machine learning, Neural networks, Optimization and Various applications.
