Subtraction

Subtraction is the mathematical operation of finding the difference between numbers by taking one quantity away from another. Represented by the minus sign "-", it is essential for calculations involving decreases, deficits, or comparisons.

Square

In mathematics, "square" can refer to two related concepts: a number raised to the power of two or a geometric figure with four equal sides and right angles. Squaring a number means multiplying it by itself, such as 4 squared (4^2) equals 16.

Series

A "series" is the sum of the terms of a sequence. It is a critical concept in calculus and mathematical analysis, where infinite and finite series are studied to understand convergence and summation properties.
