medicaid sc provider manual: *Aggregated Discontent* Harron Walker, 2025-05-20 A searing journey through the highs and lows of twenty-first century womanhood from an award-winning journalist beloved for her unflinchingly honest and often comedic appraisals of pop culture, identity, and disillusionment “A delicious reading experience—like hearing your smartest friend eviscerate the worst person you know.”—Sabrina Imbler, author of *How Far the Light Reaches* “Such a brilliant writer, with so many surprising moves.”—Torrey Peters, author of *Detransition, Baby* After a brief fling with corporate stability in her twenty-something cis era, Harron Walker has transitioned into a terminally single freelancer and part-time shopgirl. She's in the throes of her second adolescence and its requisite daily spirals. She wants it all, otherwise known as: basic human rights, a stable job with good pay and healthcare benefits, someone to love, the ability to feel safe and secure, the pursuit of satisfaction and maybe even contentment. And when she starts to acquire those things—well, as *The Monkey's Paw* famously asked, What could go wrong? In sixteen wholly original essays that blend memoir, cultural criticism, investigative journalism, and a dash of fanfiction, Walker places her own experiences within the larger context of the pressing and underdiscussed aspects of contemporary American womanhood that make up daily life. She recounts an attempt to eviscerate a corporation's attempt at pinkwashing their way into bath bomb sales while simultaneously confronting her “pick me” impulse to do so. She interrogates her relationship to labor, from the irony of working in a transphobic workplace in order to cover gender-affirming surgery to the cruel specter of the girlboss that none of us ever think we'll become. She explores the allure and violence of assimilating into white womanhood in all its hegemonic glory, exposes the ways in which the truth of trans women's reproductive healthcare is erased in favor of reactionary narratives, and considers how our agency is stripped from us—by governments, employers, partners, and ourselves—purely on account of our bodies. With razor-sharp, biting prose that's as uncompromising as it is playful, Walker grapples with questions of love, sex, fertility, labor, embodiment, community, autonomy, and body fluids from her particular vantagepoint: often at the margins, conditionally at the center.

medicaid sc provider manual: *Early Medical Abortion, Equality of Access, and the Telemedical Imperative* Jordan A. Parsons, Elizabeth Chloe Romanis, 2021-10-21 Telemedicine has recently become a key focus of healthcare systems globally, heavily influenced by the COVID-19 pandemic and the increased need for remote care pathways. Implementing telemedicine can bring myriad benefits for both patients and providers, and has the potential to make a huge impact by improving access to abortion care. In both the United Kingdom and United States, abortion is heavily regulated—exceptionally so when compared to other routine healthcare. This regulation has had the impact of exacerbating the social and geographical circumstances that can make access to abortion services difficult. This book examines telemedical provision of early medical abortion, alongside the access barriers created by laws in the United Kingdom and United States. It critically appraises a series of developments in this rapidly evolving subject, providing an up-to-date and well-informed analysis. In doing so, it argues that there is a moral imperative to introduce, retain, or reinstate (as applicable) telemedical early medical abortion.

The primary goal of these services is to stabilize and improve psychological symptoms of distress and to engage individuals in an appropriate treatment service to address the problem that led to the crisis. Core crisis services include: 23-hour crisis stabilization/observation beds, short term crisis residential services and crisis stabilization, mobile crisis services, 24/7 crisis hotlines, warm lines, psychiatric advance directive statements, and peer crisis services. The research base on the effectiveness of crisis services is growing. There is evidence that crisis stabilization, community-based residential crisis care, and mobile crisis services can divert individuals from unnecessary hospitalizations and ensure the least restrictive treatment option is available to people experiencing behavioral health crises.
