polaris financial technology hyderabad: Edge Computational Intelligence for AI-Enabled IoT Systems Shrikaant Kulkarni, Jaiprakash Dwivedi, Dinda Pramanta, Yuichiro Tanaka, 2024-02-26 Edge computational intelligence is an interface between edge computing and artificial intelligence (AI) technologies. This interfacing represents a paradigm shift in the world of work by enabling a broad application areas and customer-friendly solutions. Edge computational intelligence technologies are just in their infancy. Edge Computational Intelligence for AI-Enabled IoT Systems looks at the trends and advances in edge computing and edge AI, the services rendered by them, related security and privacy issues, training algorithms, architectures, and sustainable AI-enabled IoT systems. Together, these technologies benefit from ultra-low latency, faster response times, lower bandwidth costs and resilience from network failure, and the book explains the advantages of systems and applications using intelligent IoT devices that are at the edge of a network and close to users. It explains how to make most of edge and cloud computing as complementary technologies or used in isolation for extensive and widespread applications. The advancement in IoT devices, networking facilities, parallel computation and 5G, and robust infrastructure for generalized machine learning have made it possible to employ edge computational intelligence in diverse areas and in diverse ways. The book begins with chapters that cover Edge AI services on offer as compared to conventional systems. These are followed by chapters that discuss security and privacy issues encountered during the implementation and execution of edge AI and computing services The book concludes with chapters looking at applications spread across different areas of edge AI and edge computing and also at the role of computational intelligence in AI-driven IoT systems.

polaris financial technology hyderabad: Beyond Biryani: The Making of a Globalised Hyderabad Dinesh C. Sharma, 2024 Hyderabad—the city of nawabs, the Charminar and biryani? Or a city plugged into the neural network of global technology? Hyderabad is both of those cities all at once, and there is much more to it than meets the eye. Beyond Biryani maps the journey from what was at best a proto-colonial city under a quasi-Mughal princely state till the 1940s to the modern and vibrant metropolis that Hyderabad is today. In the pages of this book, we see the beginnings of that transformation: the Britishers who steered the city in the direction of developing a scientific temper and the nawabs who championed the cause. And we discover the workings and patterns of the change: from the Chloroform Commissions to Ronald Ross's discovery of malaria; from the setting up of Osmania University, India's first vernacular university, to the newly independent India pushing for industrial laboratories, scientific research and strategic forays into nuclear fuel and missiles. Finally, we discover how, in the last thirty years, Hyderabad has taken giant leaps towards becoming a truly globalised city. An alternative history of the city of Hyderabad, Beyond Biryani is a must-read for anyone interested in how a city can catapult towards modernity while staying rooted in its cultural heritage.

polaris financial technology hyderabad: Questioning Planetary Illiberal Geographies Jason Luger, 2022-12-30 This book engages with current debates on 'planetary urbanization' and the nature of urban political theory but notably considers the implications of illiberalism on space, territory, and power. Such a focus is timely, as illiberalism (across various settings and terrains) is producing, and embedded in, increasingly complex, hybrid, multi-scalar, non-linear, and globally networked flows. Through ordinary explorations drawn from diverse empirical case studies (China, the United States, India, South Korea, and Singapore) and via mixed methodologies, the chapters in this volume seek to advance theory that moves beyond assumptions and certainties of what illiberalism is, how and where it operates, what it looks like, and how it is experienced and embodied in different contexts, offline and online. Chapters critically reflect upon themes like authoritarianism and the spatialization of illiberal power, from the grassroots up to national governments, and stress the need to move beyond normative understandings and portrayals of these terms and concepts. Presciently, this volume looks back on recent history, pre-dating the Covid-19 pandemic and some of the shocking political transformations now underway: as such, the chapters offer a valuable lens to critically consider issues like public health policies, surveillance and policing, borders and bordering, and activism and resistance. The chapters in this book were originally published as a special issue of Territory, Politics, Governance.

polaris financial technology hyderabad: Banking Resilience: New Insights On Corporate Governance, Sustainability And Digital Innovation Sabri Boubaker, Marwa Elnahass, 2024-01-23 The banking industry plays a critical role in ensuring global economic and financial stability. Effective governance is essential for mitigating bank risk-taking and limiting managerial opportunism in this industry, which is constantly under regulatory and market scrutiny. However, the complexity and diversity of banking financial instruments and transactions gives rise to substantial information asymmetries and ongoing debates regarding contemporary governance, sustainability, and data innovation issues. This book is one of the first to address these contemporary issues collectively, offering a comprehensive and holistic understanding of the challenges and opportunities facing the global banking industry. It provides new insights, evidence-based

recommendations, and future perspectives on the role of governance mechanisms, digital innovation, climate change, and green finance in shaping the industry pre- and post-COVID-19. The book is a valuable resource for a wide range of stakeholders in the banking sector, including international regulators, practitioners, policymakers, institutional investors, and auditors. It features contributions from renowned international scholars and offers a variety of theoretical, empirical, and policy-based perspectives. It provides updated evidence and new insights crucial for rethinking the global banking model and dominant regulations, and offers evidence-based recommendations and measures for promoting financial stability and resilience in this industry.
