prayer for good health test results: *Thinking Is Authorized!* Nash Khatri, 2007-09-06 This is intended to be a thought-provoking book that does not favor one religion over another or a non-believer over a believer. It is not about good versus evil, or foolish versus wise. Rather, it is a philosophical and concept-oriented work that contains a variety of perspectives that may not have been considered before or may have been taken for granted. It is meant to promote self-determination of what we believe regarding nature, life, God, the future, death, prayer, and the afterlife, since the popularity of a belief does not unquestionably convert that belief into truth. While not necessarily trying to do the thinking for others, this book attempts to raise awareness and jumpstart our understanding of these concepts from an objective viewpoint.
