Gilbert, 2024-08-09 Research in Communication Sciences and Disorders: Methods for Systematic Inquiry, Fifth Edition is a comprehensive yet accessible text meant for instructors and students of research methods in the field of communication sciences and disorders. This innovative book reflects the current emphasis on evidence-based practice in speech-language pathology and audiology. Each chapter has a set of updated review questions or case scenarios that can be used as homework, probe questions in class, or as a basis for group activities. In addition, the authors provide lists of supplemental readings from the research literature in the field. New to the Fifth Edition New chapter titled Research on Assessments and Diagnostic Approaches Additional visual representations for key topics Additional case examples in the chapter review questions Main objectives at the beginning of each chapter Diverse and inclusive language in relation to research Disclaimer: Please note that ancillary content such as eFlashcards and printable forms and documents may not be included as in the print version of this book.
