Monks, Alexandra Reed Lajoux, 2011-04-27 Corporate Valuation for Portfolio Investment The valuation of securities . . . is as big a subject as they come, running in multi?-dimensions from qualitative to psychological, from static todynamic, from one dominant measure to a complex soup, and using measures that range from those that are internal to the observer to those determined bythe markets. In Corporate Valuation for Portfolio Investment, Bob andhis worthy coauthor cover the full range of valuation methods. From the Foreword by Dean LeBaron Corporate valuation for portfolio investment means determining the present value of future worth. While this may sound like a straightforward task, in reality, it takes time and hard-earned experience to effectively perform this essential financial function. Robert Monks and Alexandra Lajoux understand the difficulty of this endeavor. That's why they have created Corporate Valuation for Portfolio Investment. Filled with in-depth insights and expert advice, this reliable guide addresses the many facets of valuation and reveals what it takes to determine the value of corporate equity securities for the purpose of portfolio investment. Written with the professional investor in mind, Corporate Valuation for Portfolio Investment takes you through a wide range of approaches including those primarily based in assets, earnings, cash flow, and securities prices and discusses hybrid valuation techniques that combine aspects of these four main sources of valuation information. Along the way, it also examines the importance of qualitative measures such as governance and details a variety of special situations in the life cycle of businesses, including stock splits, spin-offs, and pension funding. If you're seeking superior returns from investments in corporate equity, then you have to have a firm understanding of valuation. With Corporate Valuation for Portfolio Investment as your guide, you'll be in a better position to improve your sense of a company's worth and the possible price ranges for buy, sell, and hold decisions.

This book provides state-of-the-art primers on single tranche collateralized debt obligations (CDOs), collateralized loan obligations (CLOs), credit derivatives (such as credit default swaps and swaptions), and iBoxx indexes. Filled with in-depth insight and expert advice, The Structured Credit Handbook covers all aspects of the synthetic arbitrage CDO market, including new instruments such as CDO2. Readers will also gain a firm understanding of the investment rationale, risks, and rewards associated with CDO investments through this valuable resource. The exploding use of credit derivatives and collateralized debt obligations (CDOs) has transformed the world of credit, creating an $18 trillion market almost overnight and resulting in innumerable investment and career opportunities globally. The Structured Credit Handbook provides the reader with a comprehensive and clear roadmap to today's new credit landscape. The full spectrum of structured credit products, from single-name CDS to CDOs, is explained in a simple, clear fashion that is free from the financial jargon and mathematical complexity which characterize many other derivative texts. The handbook begins with an in-depth explanation of the building blocks of the structured credit markets, single-name default swaps and indexes, and it culminates with complex products such as credit options, synthetic tranches, CDOs based on bank loans and asset-backed securities, and CDO-squareds. Written by experienced practitioners who have participated in this market since its infancy, each of the thirteen chapters introduces and analyzes a new product and explains its practical applications. A rich set of real-life case studies illustrate the application of each product in a concrete market setting. The book may be used in a semester-long course on structured credit as part of a business or finance curriculum. Whether you are a market professional, a university student or faculty member, or simply a financially savvy layperson, look no further for an up-to-date and thorough introduction to this rapidly growing and exciting field. Dr. Arvind Rajan, Managing Director, Citigroup Global Markets, is engaged in proprietary trading of Structured Credit products, and until recently, was global head of Structured Credit Research and Strategy at Citigroup. Glen McDermott (New York, NY) is Director of Fixed Income Sales and the former head of CDO Research at Citigroup Global Markets Inc. Ratul Roy is head of CDO Strategy for Citigroup Global Markets and has spent the prior nine years in structuring or analyzing CDOs and other structured credit products.

This book is an effort to rescue public stock markets in the EU and the US. There should be more companies with publicly-traded shares and more direct share ownership. Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US, the book proposes ways to create a new regulatory regime designed to help firms and facilitate people's capitalism. Through its comparative and historical study of regulation and legal practices, the book helps to understand the evolution of public stock markets from the nineteenth century to the present day. The book identifies design principles that reflect prior regulation. While continental European company law has produced many enduring design principles, the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors. The book therefore proposes a new set of design principles to serve contemporary societal needs.
