

preceptor training for nurses

preceptor training for nurses is an essential component in healthcare education that equips experienced nurses with the skills necessary to effectively mentor and guide newly hired or student nurses. This specialized training focuses on developing competencies in communication, leadership, clinical teaching, and evaluation to ensure the delivery of high-quality patient care. Preceptor training not only enhances the confidence and abilities of novice nurses but also supports the professional growth of preceptors themselves. The process involves structured programs that address adult learning principles, feedback mechanisms, and role modeling. In this article, a comprehensive exploration of preceptor training for nurses will be provided, covering its importance, core components, training methodologies, challenges, and best practices. This information is crucial for healthcare institutions aiming to improve nurse retention, patient outcomes, and overall clinical education. The following sections will delve into these key aspects in detail.

- The Importance of Preceptor Training for Nurses
- Core Components of Effective Preceptor Training
- Training Methodologies and Techniques
- Challenges in Preceptor Training and How to Overcome Them
- Best Practices for Implementing Preceptor Training Programs

The Importance of Preceptor Training for Nurses

Preceptor training for nurses plays a vital role in bridging the gap between academic knowledge and real-world clinical practice. It ensures that new nurses receive proper guidance, fostering their clinical judgment, critical thinking, and patient care skills. Trained preceptors serve as role models, demonstrating professional behavior and ethical standards that novice nurses can emulate. Furthermore, organizations that invest in preceptor programs often experience improved nurse satisfaction and reduced turnover rates, which are critical factors in maintaining a stable and competent workforce. The structured support provided through preceptor training also helps reduce workplace errors and enhances patient safety. Overall, this training aligns clinical practice with educational objectives, benefiting both healthcare providers and patients alike.

Enhancing Clinical Competence

Preceptor training equips nurse mentors with strategies to effectively teach clinical skills, ensuring that new nurses develop competence in various procedures and protocols. This targeted instruction helps new nurses gain confidence and reduces the learning curve in fast-paced healthcare environments.

Supporting Professional Development

Beyond clinical skills, preceptor training fosters leadership and communication abilities among preceptors. These skills are essential for creating a supportive learning environment and empowering novice nurses to take initiative in their roles.

Core Components of Effective Preceptor Training

An effective preceptor training program incorporates several fundamental components designed to prepare experienced nurses for their mentorship roles. These elements address both the educational and interpersonal aspects of preceptorship, ensuring a comprehensive approach to nurse development.

Adult Learning Principles

Understanding how adults learn is crucial for preceptors. Training includes instruction on adult learning theories such as experiential learning, self-directed learning, and transformational learning to tailor teaching methods that engage adult learners effectively.

Communication and Feedback Skills

Clear communication and constructive feedback are foundational to successful preceptorship. Training programs emphasize techniques for providing timely, specific, and respectful feedback that encourages growth and addresses areas needing improvement.

Clinical Teaching Strategies

Preceptors learn various teaching methodologies including demonstration, guided practice, case-based learning, and simulation to enhance clinical instruction and accommodate diverse learning styles.

Evaluation and Assessment

Competent preceptors must assess the progress of their learners accurately. Training covers performance evaluation tools, documentation, and strategies for identifying learning gaps and tailoring support accordingly.

Training Methodologies and Techniques

Preceptor training for nurses utilizes a blend of instructional methods designed to maximize learning retention and practical application. These methodologies combine theoretical knowledge with experiential learning to simulate real-life scenarios and challenges.

Workshops and Seminars

Interactive workshops provide a platform for preceptors to actively engage in discussions, role-playing, and problem-solving exercises that enhance teaching and leadership skills.

Simulation-Based Learning

Simulation offers a risk-free environment where preceptors can practice clinical teaching techniques and respond to complex patient care situations, refining their instructional abilities.

Mentorship and Peer Support

Many programs incorporate mentorship elements where novice preceptors receive guidance from seasoned mentors, fostering continuous learning and professional development.

Online and Blended Learning

To accommodate varying schedules and learning preferences, online modules and blended learning approaches provide flexible access to training materials and assessments.

Challenges in Preceptor Training and How to Overcome Them

Despite its benefits, preceptor training for nurses faces several challenges that can impact its effectiveness. Addressing these obstacles is essential to maintain successful preceptorship programs.

Time Constraints and Workload

Preceptors often juggle clinical duties alongside mentorship responsibilities, leading to time constraints. Solutions include organizational support for dedicated preceptor time and workload adjustments to balance responsibilities.

Inadequate Preparation

Some preceptors may feel unprepared for their teaching role due to insufficient training. Comprehensive, ongoing education and refresher courses help build confidence and competence.

Resistance to Change

Resistance from staff or institutional culture can hinder adoption of new preceptor training

initiatives. Promoting the value of preceptorship through leadership endorsement and showcasing positive outcomes encourages acceptance.

Lack of Standardization

Varying training quality and inconsistent evaluation methods can undermine program effectiveness. Establishing standardized curricula and assessment criteria ensures uniformity and quality control.

Best Practices for Implementing Preceptor Training Programs

Successful preceptor training programs incorporate strategic planning and continuous evaluation to optimize learning outcomes and nurse retention. The following best practices are widely recognized in healthcare education settings.

1. **Comprehensive Curriculum Development:** Design curricula that cover essential topics such as adult learning, communication, clinical teaching, and evaluation.
2. **Ongoing Support and Resources:** Provide access to educational materials, mentorship, and peer networks to sustain preceptor development.
3. **Regular Feedback and Evaluation:** Implement mechanisms for assessing preceptor performance and learner progress to identify improvement areas.
4. **Leadership Engagement:** Secure commitment from organizational leaders to prioritize and support preceptor training initiatives.
5. **Recognition and Incentives:** Acknowledge preceptors' contributions through awards, certifications, or career advancement opportunities.

Integration with Organizational Goals

Aligning preceptor training with broader institutional objectives such as quality improvement and staff development enhances program relevance and sustainability.

Utilizing Technology

Incorporating digital tools for training delivery, tracking, and communication streamlines program management and accessibility.

Frequently Asked Questions

What is preceptor training for nurses?

Preceptor training for nurses is a specialized program designed to prepare experienced nurses to mentor and guide new nursing staff or students, enhancing their clinical skills and professional development.

Why is preceptor training important in nursing?

Preceptor training is important because it equips experienced nurses with the teaching, communication, and leadership skills necessary to effectively support and educate new nurses, leading to improved patient care and staff retention.

What are the key components of an effective preceptor training program?

Key components include communication skills, adult learning principles, clinical teaching strategies, feedback and evaluation techniques, conflict resolution, and cultural competence.

How does preceptor training impact patient care?

Preceptor training improves patient care by ensuring that new nurses receive proper guidance and supervision, which enhances their clinical competence, confidence, and adherence to safety protocols.

Who should attend preceptor training for nurses?

Experienced nurses who are assigned to mentor or supervise new nurses, nursing students, or newly hired staff should attend preceptor training to develop the necessary skills for effective mentorship.

How long does preceptor training for nurses typically last?

Preceptor training programs can vary in length but typically range from a few hours to several days, depending on the depth and format of the training.

Are there certifications available for nurse preceptors?

Yes, some organizations offer certification programs for nurse preceptors that validate their skills and knowledge in clinical teaching and mentorship.

What challenges do nurse preceptors face, and how does training help?

Nurse preceptors may face challenges such as balancing clinical duties with teaching, managing diverse learning styles, and providing constructive feedback. Training helps by equipping them with strategies to effectively handle these challenges.

Additional Resources

1. *Preceptor Development: A Guide for Clinical Educators*

This book offers comprehensive guidance for nurses who serve as preceptors, focusing on developing effective teaching strategies and fostering supportive learning environments. It covers essential topics such as communication skills, adult learning principles, and feedback techniques. Preceptors will find practical tools to enhance their mentorship and improve student outcomes.

2. *The Nurse Preceptor's Handbook: Practical Tools for Student Success*

Designed for both new and experienced nurse preceptors, this handbook provides practical advice and resources to facilitate clinical teaching. It includes case studies, evaluation forms, and strategies for managing challenging situations. The book emphasizes building confident, competent nursing professionals through effective preceptorship.

3. *Clinical Teaching Strategies in Nursing*

This text explores various teaching methodologies tailored for the clinical nursing environment. It addresses the challenges preceptors face and offers evidence-based approaches to support student learning. Readers will gain insights into fostering critical thinking, clinical judgment, and professional development in nursing students.

4. *Effective Preceptorship in Nursing: A Practical Approach*

Offering a step-by-step approach, this book guides nurse preceptors through the process of mentoring students from orientation to competency. It highlights the roles and responsibilities of preceptors and provides strategies for assessment and feedback. The book promotes a collaborative learning atmosphere to enhance clinical education.

5. *Mentoring and Precepting in Nursing: A Guide to Best Practice*

This resource delves into the relationship between mentoring and precepting, outlining best practices for both roles. It addresses how to build trust, provide constructive feedback, and support professional growth. The book is valuable for nurses seeking to improve their mentorship skills and foster positive learning experiences.

6. *Precepting the Novice Nurse: Strategies for Success*

Focused on guiding new nurses, this book equips preceptors with strategies to support novice practitioners transitioning into clinical roles. It covers common challenges and offers solutions to enhance confidence and competence. Preceptors learn to tailor their teaching to individual learning styles and needs.

7. *Building Competence Through Preceptorship*

This text emphasizes the development of clinical competence through structured preceptorship programs. It outlines frameworks for effective clinical teaching and assessment, ensuring students meet professional standards. The book includes tools for reflective practice and continuous improvement for both preceptors and learners.

8. *The Art and Science of Preceptorship in Nursing*

Balancing theory and practical application, this book explores the foundations of preceptorship as both an art and a science. It discusses the importance of emotional intelligence, communication, and evidence-based teaching methods. Preceptors gain a deeper understanding of their impact on student learning and professional socialization.

9. *Preceptor Training Essentials: Preparing Nurses for Clinical Teaching*

This essential guide focuses on preparing nurses to take on preceptorship roles with confidence and competence. It covers adult learning theory, assessment techniques, and conflict resolution skills. The book is filled with checklists, templates, and examples to support effective clinical instruction and mentorship.

preceptor training for nurses: *Nursing Preceptorship* Florence Myrick, Olive Yonge, 2005 This concise, yet comprehensive reference provides nurses with a resource for their role in the preceptorship experience, whether they are the preceptors, preceptees, teachers of the educational programs, or administrators of the practice agencies. The book discusses the different dimensions of preceptorship as well as addresses directly the teaching-learning climate, goals and objectives of preceptorship, and the nature of the teaching-learning experience. Other areas covered are a look at the student as a learner and the all-important area of communication. A final bonus chapter offers useful suggestions on the setting up or instituting of a preceptorship program.

preceptor training for nurses: *The Role of the Preceptor* Jean Pieri Flynn, Madonna C. Stack, 2006 This book contains two new chapters on preceptorship in home care settings and distance learning programs. It exemplifies the second edition of this how-to guide for nursing faculty and clinicians. Flynn and Stack provide a useful and easy-to-follow framework for not only developing and implementing preceptor programs, but also for learning how to precept students and facilitate the development of nursing expertise in both preceptors and preceptees. This second edition includes information on precepting, mentoring, and teaching; a model preceptor program, which includes charts, tables; and a special section on internships, residencies, and mentoring in the nursing program. Overall, the concept of how preceptorship aids in nursing education is shown throughout this book - Provided by the Publisher.

preceptor training for nurses: *The Preceptor Program Builder* Diana Swihart, Solimar Figueroa, 2014 The Preceptor Program Builder: Essential Tools for a Successful Preceptor Program Diana Swihart, PhD, DMin, MSN, APN CS, RN-BC Solimar Figueroa, MHA, MSN, BSN, RN The Preceptor Program Builder provides professional development staff the keys to creating a successful preceptor program in the healthcare environment. In this essential package, you will find the core tools, best practices, processes, adaptable forms, and training materials for developing and evaluating preceptors, information for preparing preceptors for certification through portfolio-building, and a tested framework for preceptor programs. Use this resource to develop a preceptor program for any population, such as nurses or pharmacists. The book provides a core design for developing preceptors that can be applied to any program and discipline where preceptors orient or transition new employees, students, or persons transitioning into a new role or position. This work moves beyond previous editions' focus on single disciplines and invites all groups, disciplines, and professions to create a framework built on practical tools, definitions, principles, and concepts for training preceptors and building formal preceptorships. This resource will help you: Design preceptor training programs from the ground up Revitalize existing preceptor training with new curricula, including fully customizable PowerPoint(R) training and preceptor workbooks Assess the quality of preceptors and evaluate the training effectiveness Develop a

preceptor certification Overall Program Builder objectives: Recognize the components of a preceptorship and the value added to a healthcare organization Prepare preceptors for the roles and responsibilities defined by an effective preceptor program Employ critical thinking skills and evidence-based practices within a preceptor program Apply effective feedback, competency assessment, and performance evaluation techniques Outline effective strategies for successful communication within the professional team Implement a preceptor program within a practice setting Build a preceptor program that promotes professional development and the eventual transition from preceptor to mentor What's new The Preceptor Program Builder is a professional quality, occupation-agnostic system for building a preceptor program in the healthcare industry. This resource represents a foundation for the future. Key changes compared to previous editions of the Nurse Preceptor Program Builder: Evidence-based guidance and a methodology based on research Discussion of the advancement of preceptoring as a specialty Presentation of the new Married State Preceptorship Model and the research related to its development Tips and tools for establishing preceptorships across any discipline, not just nursing How to develop a portfolio How to prepare for preceptor certification Nursing Contact Hours: HCPro is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation. This educational activity for 3.6 nursing contact hours is provided by HCPro. Nursing contact hours for this activity are valid from April 1, 2014 - April 1, 2016. For further information on how to obtain your contact hours, please see the Instructional Guide on the download page after purchasing the book.

preceptor training for nurses: Staff Development Nursing Secrets Kristen L. O'Shea, 2002-06-13 Staff Development Nursing Secrets is a practical guide for nurse educators working in staff development. The question and answer format helps provide readers with specific answers to their everyday questions and challenges. The text explores the state of today's healthcare world and identifies the myriad of competencies and skills necessary for a nurse educator to succeed. In addition, nurse educators will gain useful tips and knowledge regarding the planning, implementation and evaluation of many types of educational programming. The text concludes with a section on the nuts and bolts of common staff development programs. Engaging, interactive Q & A format Concise answers with valuable pearls, tips, memory aids, and secrets 22 succinct chapters written for quick review All the most important, need-to-know questions and answers in the proven format of the highly acclaimed Secret Series® Thorough, highly detailed index

preceptor training for nurses: The Nurse Preceptor Toolkit - E-Book Beth Heuer, Cynthia A. Danford, 2024-06-25 Develop the skills necessary for precepting RN and APRN students and new orientees! The Nurse Preceptor Toolkit is written by and for RN and APRN clinicians and faculty members from a variety of levels, specialties, and settings. Using real-life examples and practical tips, this comprehensive resource answers the questions preceptors often ask when interacting with students of all levels, as well as new orientees. Within its pages, you'll find everything you need to develop and solidify the clinical teaching skills essential to becoming an effective preceptor. - This completely new book serves as a comprehensive resource for precepting both RN and APRN students and new orientees. - Coverage addresses questions preceptors have asked when interacting with students of all levels, as well as with new orientees. - Content is written by and for RN and APRN clinicians and faculty members from a variety of levels, specialties, and settings. - Real-life examples and practical tips guide the development and solidification of the clinical teaching skills needed to become an effective preceptor. - Coverage of essential precepting topics includes effective communication, flexibility, time management skills, providing feedback and support, an understanding of different adult learning styles, and the ability to confidently evaluate student knowledge and competencies. - Chapter objectives serve as advance organizers to help prepare you for the content that follows. - Exemplars model excellence in clinical precepting through contributor-authored stories of successful faculty-preceptor-learner partnerships related to the content of each chapter. - Boxes highlight tips from successful preceptors. - Appendices provide ready-to-use tools to enhance the preceptor-learner experience.

preceptor training for nurses: Total Quality Management for Home Care Elaine R. Davis, 1994 Donna Peters, a noted expert in outcomes and data management in home health care, and Tad McKeon, author of Home Health Financial Management, team up to assess the current home health care environment in light of quality, cost, and data collection issues. The most prevalent sources of data including outcomes measurement, professional standards, regulatory requirements, consumer expectations, care guidelines, and activity-based costing are examined. The book addresses how one uses data to derive information that can be used to improve performance and examines how to use data to achieve excellence, not just to satisfy regulators.

preceptor training for nurses: Developing Online Courses in Nursing Education, Fourth Edition Carol O'Neil, Cheryl Fisher, Cheryl A. Fisher, Matthew Rietschel, 2019-06-21 Addresses importance of new technology and changing structures of online learning This authoritative text shows nurse educators and students how to teach in the online environment, using best practices and the latest technology. The fourth edition discusses the importance of lifelong learning and the relationship to flexible online learning environments, which are changing the dynamics of education. This valuable resource provides updated strategies for organizing and disseminating course content and examines such topics as massive open online courses (MOOCs), certificates, badges, and stackable degrees. The fourth edition also provides the latest evidence-based research examining student-teacher interactions, course management, web-based resources, and best practices. Chapters include real-world examples and applications of these concepts. New to the Fourth Edition: Delivers four new chapters on the changing role of the nurse educator, changing faculty roles, designing flexible learning environments, and using technology to meet the needs of students Addresses the interaction between nurse educators and instructional designers Provides enhanced understanding of design, design strategies, and technology Includes updated best practices for pedagogy, interaction, reconceptualizing course content, student assessment, course evaluation, and more Underscores the importance of lifelong learning and flexible, creative learning environments Key Features: Demonstrates foundational concepts for using technology to teach online Delineates pathways for using online modalities to engineer learning Delivers theories and frameworks guiding the development and use of a flexible environment Identifies guiding structures for maximizing learning in online environments Defines the distinct role of the online educator Promotes best use of technology according to the needs of the learner Includes abundant examples and reflective questions Supplemental instructor's manual included

preceptor training for nurses: Mastering Precepting, Third Edition Beth Ulrich, 2023-06-30 "This book is brilliant, relevant, and a must-have resource for all preceptors and those supporting the lifelong learning journey of preceptors. This edition provides updated strategies for all preceptors and the ability to develop meaningful action plans to enhance the learning journeys." -Sylvain Trepanier DNP, RN, CENP, FAONL, FAAN SVP, Chief Nursing Officer Providence, Renton, Washington "In today's turbulent healthcare environment, preceptors play a crucial role in the successful professional transition of nurses. The nurse tenure in acute care settings has dropped over the past years, and many of today's preceptors are new to their roles. Precepting is both an art and a science. This new edition of Mastering Precepting provides an evidence-based road map for preceptor development and strategies to avoid preceptor burnout." -Rose O. Sherman EdD, RN, NEA-BC, FAAN Professor Emeritus Florida Atlantic University Editor-in-Chief, Nurse Leader "Once we expected faculty to monitor students, for new graduates to 'figure it out,' and for a nurse with any experience to transition anywhere needed. Then, as we focused on safety and quality, we realized all those individuals needed support of some kind to acquire the new expected competencies of the role in that setting. Once again, that is what Dr. Ulrich and her colleagues have done in the third edition of Mastering Precepting, with just the right balance of theory and practicality to make this a most useful book." -Patricia S. Yoder-Wise, EdD, RN, NEA-BC, ANEF, FAONL, FAAN Professor and Dean Emerita, Texas Tech University Health Sciences Center Co-Founder and Vice President, the Nurses Legacy Institute Editor-in-Chief, The Journal of Continuing Education in Nursing Preceptors have the power and opportunity to inspire nurses and

other healthcare providers to achieve greatness. Effective precepting programs depend on two critical groups: those who organize and manage the programs and those who support, teach, and coach. Beth Ulrich and her team of expert contributing authors provide the knowledge, tools, skills, and wisdom both groups need for success. Written for staff nurses and other care providers, managers, and educators, this third edition of *Mastering Precepting* teaches preceptors both the science and art of precepting and empowers them to seek the support they need to be effective. For managers, it emphasizes the importance of providing preceptors with positive and supportive experiences. For educators, it provides the information and knowledge required to develop and improve preceptor programs.

TABLE OF CONTENTS Chapter 1: The Preceptor Role Chapter 2: Learning: The Foundation of Precepting Chapter 3: Core Precepting Concepts Chapter 4: Precepting Strategies Chapter 5: Developing a Professional Identity Chapter 6: Having a Plan: Developing and Using Goals, Objectives, and Outcomes Chapter 7: Communication Chapter 8: Coaching Chapter 9: Effectively Using Instructional Technologies Chapter 10: Precepting Specific Learner Populations Chapter 11: Precepting Advanced Practice Registered Nurses Chapter 12: Assessing and Addressing Preceptee Behavior and Motivation Chapter 13: Pragmatics of Precepting Chapter 14: Self-Care for Preceptors Chapter 15: The NPD Practitioner: Responsibility for Preceptor Programs Chapter 16: For Managers: Selecting, Supporting, and Sustaining Preceptors Chapter 17: Preceptor Development

ABOUT THE AUTHOR Beth Tamplet Ulrich, EdD, RN, FACHE, FAONL, FAAN, is a Professor at the University of Texas Medical Branch School of Nursing in Galveston in the DNP Program, and Editor-in-Chief of the *Nephrology Nursing Journal*. She is a nationally recognized thought leader who is known for her research studying nursing work environments and the experiences of new graduate nurses as they transition from nursing school into the workforce.

preceptor training for nurses: Avoiding Common Nursing Errors Jeannie Scruggs Garber, Monty Gross, Anthony D. Slonim, 2010 This handbook succinctly describes over 500 common errors made by nurses and offers practical, easy-to-remember tips for avoiding these errors. Coverage includes the entire scope of nursing practice—administration, medications, process of care, behavioral and psychiatric, cardiology, critical care, endocrine, gastroenterology and nutrition, hematology-oncology, infectious diseases, nephrology, neurology, pulmonary, preoperative, operative, and postoperative care, emergency nursing, obstetrics and gynecology, and pediatric nursing. The book can easily be read immediately before the start of a rotation or used for quick reference. Each error is described in a quick-reading one-page entry that includes a brief clinical scenario and tips on how to avoid or resolve the problem. Illustrations are included where appropriate.

preceptor training for nurses: Cases on Educational Technology Planning, Design, and Implementation: A Project Management Perspective Benson, Angela D., Moore, Joi L., Williams van Rooij, Shahron, 2013-06-30 Whether utilizing electronic tools for K-12 classrooms, learning management systems in higher education institutions, or training and performance improvement for business organizations, technology maintains an important aspect in the delivery of education and training in both school and non-school settings. *Cases on Educational Technology Planning, Design, and Implementation: A Project Management Perspective* provides strategies for addressing the challenges and pitfalls faced when planning, designing, and implementing learning and educational technology projects. The case studies in this publication aim to provide instructors, practitioners in K-12 and higher education, business managers as well as students interested in implementing education technology projects.

preceptor training for nurses: Quality and Safety Education for Nurses, Third Edition Patricia Kelly Vana, Beth A. Vottero, Gerry Altmiller, 2022-01-27 I congratulate the editors of [this book] on their commitment to continuously updating the resources needed by nursing leaders, faculty, and students who seek to develop or enhance their quality and safety competencies. The chapters and the contents of this edition align magnificently with new domains of the AACN accreditation standards (2021). Whatever your level of education or role in nursing, this textbook is rich in resources to support your growth. -Linda Cronenwett, PhD, RN (ret.), FAAN Professor & Dean

Emeritus University of North Carolina at Chapel Hill School of Nursing Former Principal Investigator, QSEN: Quality and Safety Education for Nurses (From the Foreword) This Third Edition of Quality and Safety Education for Nurses has been thoroughly updated for students in undergraduate Associate, Baccalaureate, Accelerated and BSN completion Nursing programs. There is a chapter focusing on each of the six Quality and Safety Education for Nurses (QSEN) Competency areas, with content on Nursing Leadership and Patient Care Management infused throughout the chapters. The Third Edition also includes new chapters on Systems Thinking, Implementation Science, and Population Health. It includes an Instructor's manual and Powerpoints. New to the Third Edition: New Chapters: Chapter 3: Systems Thinking Chapter 13: Implementation Science Chapter 15: Population Health and the Role of Quality and Safety Incorporates new content based on The Future of 2020-2030 Report and the 2021 AACN Essentials Contains a Competency Crosswalk connecting each chapter's content to QSEN/AACN Competencies Key Features: Supports nursing schools to fulfill accreditation standards for Quality and Safety curricula Includes Clinical Judgment Activities, Case Studies, Interviews, NCLEX-Style Questions, Figures, Tables, Bibliography, Suggested Readings, and more to clarify content Designed to be used in a stand-alone Quality and Safety course, Leadership and Management Nursing course, or as a support for Nursing courses Provides instructor package with an unfolding case study with suggestions for assignments, questions and answers for case study and critical thinking exercises, PowerPoint slides, and more

preceptor training for nurses: Leadership for Evidence-Based Innovation in Nursing and Health Professions Daniel Weberg, Sandra Davidson, 2024-10-04 The healthcare system is in need of innovative, evidence-based thinkers to transform a flawed system and improve healthcare outcomes. This book combines the two seemingly opposing concepts of innovation and evidence and provides examples, and insights that allow leaders to build capacity for transformation--

preceptor training for nurses: Myles Professional Studies for Midwifery Education and Practice Jayne E. Marshall, 2019-04-15 Myles Professional Studies for Midwifery Education and Practice Concepts and Challenges explores the non-clinical areas of the midwifery curriculum (e.g. law, ethics, leadership, employer-led supervision and professional development) in a helpful, user-friendly format brought to readers by a team of experts under the guidance of Jayne Marshall, editor of Myles Textbook for Midwives. The volume will be suitable for all student midwives, whether undertaking pre-registration education programmes or post-graduate studies, as well as practising midwives preparing for revalidation and/or undertaking CPD. Whilst prepared predominantly by contributors from the UK, Myles Professional Studies for Midwifery Education and Practice Concepts and Challenges will be suitable for an international readership. - Specialist contributors ensure accuracy and currency of key information - Underlying theory supported by a rich array of helpful learning features such as 'real-life' case studies and reflective activities - Includes the latest initiatives such as employer-led supervision and the principles of coaching - Includes a section on the ICM and EU standards of education and international regulation covering the USA, Australia, New Zealand, Africa, Denmark and Norway - Explores the global context of the midwife's scope of practice with specific examples from the UK, Canada and the USA - Includes discussion of CPD and overseas careers opportunities - Annotated reading lists and significant websites provide additional sources of information

preceptor training for nurses: Peer Review in Nursing Barbara Haag-Heitman, Vicki George, 2010-04-05 This book is Print on Demand. Orders take 4-6 weeks to fulfill. Peer Review in Nursing: Principles for a Successful Practice is the first nursing publication that approaches the definition and implementation strategies for peer review within an organizational setting. Using a professional model, with shared governance as a framework, the authors discuss the difference between manager initiated staff performance evaluation of the past and the true peer review aspects of professional practice for the future. This text follows in line with the Magnet program requirement that nurses at all levels use self appraisal performance review and peer review, including annual goal settings, for the assurance of competence and professional development page 30 of the 2008 Magnet manual. This unique text teaches nurses the skills they need to demonstrate organizational processes,

structures, and outcomes that help insure accountability, competence and autonomy. Features a forward by Tim Porter-O'Grady and a reprint of the 1988 ANA Guidelines for Peer Review! © 2011 | 252 pages

preceptor training for nurses: The Rural Nurse Deana Molinari, Angeline Bushy, 2011-11-18 Transitioning to rural practice can be daunting for both experienced nurses and new graduates who have an urban orientation and are accustomed to specialized practice with abundant health care resources. Since most nursing education programs and practicing nurses are located in urban settings, programs are needed to prepare nurses who choose rural practice. In their book, Dr. Molinari and Dr. Bushy provide excellent examples of practice models from North America, New Zealand, and Australia with curricula that address transition issues. The text makes a significant contribution to the discussion about how to best prepare nurses for rural practice and will be of interest to administrators, educators, and clinicians. From the Foreward by Charlene A. Winters, PhD, APRN, ACNS-BC Associate Professor Montana State University College of Nursing This is the only volume to address the pressing need for practical information about transitioning from an urban-based nursing education or practice to a rural health care environment. It provides successful strategies that nurses in rural settings can use to develop, implement, and evaluate innovative programs that will meet the needs of individual rural communities. The book details current rural nursing transition-to-practice trends and issues, national standards, and evidence-based model programs worldwide. Rural practice culture is described along with professional education issues, competency, patient care, and safety. Chapters are presented in easy-to-access formats that offer ready solutions for problems commonly encountered in rural practice such as nurse recruitment and retention. In addition to health care delivery issues for specific rural populations, the book presents program descriptions from local to state levels, including locally developed education programs, urban hospital systems outreach to rural facilities, universities collaborating with rural businesses, city-based workshops, statewide competencies tracked by employers, and a distance education program customized by rural agencies. Case studies demonstrate how rural facilities-even the smallest and most isolated-are advancing health care through nurse support. The text will be of value to rural nursing staff developers, critical access hospitals and community clinic administrators, rural professional organizations, small urban health facilities, continuing education providers, nursing workforce centers, and graduate programs. Key Features: The first transition from academia-to-practice guide for rural nursing Charts evidence-based successes and offers model programs in different rural settings Provides rural-specific information to facilitate statewide health mandates Features residency program development processes, with tips and tools that work

preceptor training for nurses: Handbook of Nursing Case Management Dominick L. Flarey, Suzanne Smith Blancett, 1996 AACN Protocols for Practice: Healing Environments discusses the benefits of creating a healing environment for critically ill patients and their families and how changes to a patient's environment can promote healing. Family needs, visitation, complementary therapies, and pain management are also covered.

preceptor training for nurses: *Clinical Nurse Leaders Beyond the Microsystem* James L. Harris, Linda A. Roussel, Patricia L. Thomas, 2021-08-04 *Clinical Nurse Leaders Beyond the Microsystem: A Practical Guide*, Fourth Edition is a core resource for CNLs which imparts the competencies necessary to lead improvement teams, analyze data, and ensure delivery of quality, safety, and value-based care in any healthcare setting.

preceptor training for nurses: The Preceptor's Handbook for Supervising Physician Assistants Randy Danielsen, Ruth Ballweg, Linda Vorvick, Donald Sefcik, 2011-05-27 The Preceptor's Handbook for Supervising Physician Assistants is a helpful guide for clinical preceptors of physician assistant (PA) students during their educational program and for physicians who supervise PAs in their practice. This work encompasses the experience and passion of four dedicated PA educators with combined experience of over 100 years. This indispensable resource addresses current practice as well as future projections and provides guidance for new styles of supervision in evolving health care systems including distance supervision, supervision in teams, and patterns of supervision in

home care and geriatrics. Covering a wide variety of topics including supervision in the team environment as well as in individual practice, this handbook will provide the physician and physician assistant with the information and skills needed to be an excellent preceptor for students and a supervising clinician for graduate PAs. "The uniqueness of the physician-PA team paves the way for effective physician assistant practice. The Preceptors Handbook: A Guide to Supervising Physician Assistants presents a comprehensive model to help physicians reap the benefits that PAs bring to their practice, their patients, and the health care team. This clear and accessible resource provides step-by-step guidelines for building relationships with PAs, including tips on how to hire and work effectively with a PA, how to give constructive feedback, and how to apply coaching strategies. The authors, all leaders in PA education and practice, provide the essential information for building and sustaining a successful physician-PA team. ~ Janet J. Lathrop, MBA President, National Commission on Certification of Physician Assistants (NCCPA) Interested in purchasing The Preceptors Handbook: A Guide to Supervising Physician Assistants for a group of your students, residents, preceptors, faculty, or others? Preview sample content on our website & ask your Account Specialist about bulk purchase specials for your program! Save up to 30% on bulk orders. Features • Case Studies • Job Descriptions • Performance Agreements • Evaluation Tools • Professional Improvement Plans Clinical Rotations Ethics And Professionalism © 2012 | 218 pages

preceptor training for nurses: Methodologies and Intelligent Systems for Technology Enhanced Learning, Workshops, 12th International Conference Zuzana Kubincová, Alessandra Melonio, Dalila Durães, Davide Rua Carneiro, Mehdi Rizvi, Loreto Lancia, 2022-11-18 This book covers the 12th International Conference in Methodologies and Intelligent Systems for Technology Enhanced Learning which was hosted by the University of L'Aquila and was held in L'Aquila (Italy) from July 13 to 15, 2022. The conference has established itself as a consolidated fertile forum where scholars and professionals from the international community, with a broad range of expertise in the TEL field, share results and compare experiences. Technologies in TEL are capable of delivering smart, personalized, tailored, and motivating learning solutions. Methods are coming from different fields, such as education, psychology, medicine, computer science, and from diverse communities, where collaboration and co-working are used.

preceptor training for nurses: Acting to Manage Conflict and Bullying Through Evidence-Based Strategies Bruce Burton, Margret Lepp, Morag Morrison, John O'Toole, 2015-06-15 This book offers a complete and detailed account of the evolution of an internationally successful, evidence-based program that has been the result of almost two decades of action research into conflict and bullying. It addresses one of the most serious problems encountered in schools and work places worldwide: that of bullying and inter-personal conflict. The book presents a comprehensive account of the research, development and refinement of the DRACON Project and the Acting Against Bullying and Cooling Conflicts programs. The effective strategies that emerged from the extensive international research and practice use a combination of theories of conflict and bullying management with drama techniques and peer teaching which have been unique in their application. The book analyses their evolution into an effective program that has impacted positively on bullying and conflict in a number of settings. In the UK the program successfully addressed behavioural problems amongst girls in schools through the use of peer teaching in a drama setting. In Sweden the program assists nursing students, nurses and other health professionals to deal with conflict in the workplace. In Australia it has been applied in hundreds of schools to reduce bullying and assist newly arrived refugees to deal with cultural conflict and develop resilience and self-identity in their new country. This volume makes a major and authentic contribution to the international effort to find effective strategies and techniques to deal with interpersonal conflict and bullying across a range of contexts.
