principle centred leadership covey: *Action Leadership* Ortrun Zuber-Skerritt, 2011-04-15
 Action leadership is a creative, innovative, collaborative and self-developed way to lead. It eschews the hierarchical structure usually associated with leadership and is based instead on the democratic values of freedom, equality, inclusion and self-realization. It takes responsibility for, not control over, people through networking and orchestrating human energy towards a holistic outcome that benefits the common interest. Action leaders are passionate people who abide by the motto that “Learning does not mean to fill a barrel but rather to ignite a flame” in others. And in this time of rapid economic, political, technological, social and ecological changes, action leadership and action leaders are precisely what's needed to improve how people and organizations engage constructively to address the myriad complex issues challenging society at all levels. *Action Leadership: Towards a Participatory Paradigm* explains and illustrates how action leadership can be developed through participatory action learning and action research (PALAR). It addresses real-life issues by people who choose to work collaboratively towards shared goals while developing their learning, insights, knowledge, people skills and personal relationships through involvement in a PALAR project. The book provides a conceptual framework for action leadership and for the integrative, practical theory of PALAR; and examples of applications in higher education, management education for organization development, and community development. Readers are encouraged to adopt, adapt and further develop the evolving concepts of action leadership and PALAR in a participatory paradigm of learning, research and development.

principle centred leadership covey: *Creating a Nonviolent Culture in a Modern Organization* Miriam Baermann, 2021-12-21
 Increasing violence amongst youth in society, burn-out as a widespread disease and scandals in companies are only some of the headlines which appear regularly in the news media. Politics scarcely seems to have any success in fighting violence and injustice in society and in the world. The thesis here suggests that people do not have to wait for a savior such as a politician but that everyone can contribute to a less violent, more peaceful and just world. It will be demonstrated that organizations have an enormous influence on society and this book deals with the possibilities which an organization has to contribute to a less violent culture. By the term “organization” all forms of organized groups of people who come together for a certain purpose are meant, for example schools, clubs, public social aids and others, whilst we mainly concentrate on companies in our research. The intention is to focus particularly on the issues related to the theme of creating a nonviolent culture in the workplace. In the first part on culture, we deal with several questions regarding culture, including such fundamental questions as What is organizational culture?, What are the dimensions of culture? and is it possible to influence it and if yes, how does it work? In the second part, we take a look at the terms violence and nonviolence and a survey of how these aspects occur in society and organizations is made. The third part is the

largest and deals with the qualities of leadership and with the organizational conditions which are necessary to create a nonviolent culture. We hope it will become clearer to the reader that nonviolence is not a strategy or a formula to be used. It can appear very different in different situations. There are component elements which can promote it and there are certain principles that cannot be violated if one wishes to establish true nonviolence. Nevertheless, there is no one patent formula nor one exclusively correct way of creating a nonviolent culture. It requires considerable creativity and endurance to create it and can take a variety of forms.

It is well organised and moves seamlessly to address many important questions about the nature of leadership, including important questions of ethics, gender, trust, motivation, innovation, teams, and distributed leadership. The final section focuses on leading change in healthcare, a critical element of leadership practice in today's world. Too many leadership books ignore context. This book, however, is firmly rooted in the healthcare context, and aspires to help professionals in this sector to reflect deeply on the complexities of leading through uncertain times. Whilst each chapter stands alone, the book's merit is in offering multiple perspectives. Curtis and Cullen have encouraged the book's contributors to address the big debates and themes in healthcare leadership today, whilst keeping in sharp focus the practice of leadership. Sharon Turnbull, Visiting Professor, Lancaster University Management School, UK In Leadership and Change for the Health Professional, Elizabeth Curtis and John Cullen have crafted an exceptionally timely collection of practically-based research insights. Anyone interested in the development of leadership and change will find this particularly stimulating and a valuable text for academic and students alike. Alison H James, School of Healthcare Sciences, Cardiff University, UK This book covers many aspects of leadership, which are timely in nature and directly relevant to health professionals. The contributors are highly respected and offer different perspectives on this complex issue. We need to encourage practitioners to see themselves as leaders - this evidence-based text will serve to guide them in this quest. De-emphasising the individual leadership qualities and including those of teams makes this book stand out from others. The NHS features prominently but despite this, readers from other countries should be able to easily transfer the content to their own health services. The useful websites at the end of each chapter provide further direction for readers. This is a text that is written with a very positive stance, even though the difficulties of being a leader are not ignored. It ends with a discussion on the vision for leadership - at individual, team and organisational levels. Lots to read, absorb and you can do this a chapter at a time which is great. Professor Bridie Kent, Head of School of Nursing and Midwifery, Plymouth University, UK This book addresses an important topic, where there is huge scope to add value. This is partly due to the scale of the NHS. The language makes the text accessible to professionals as well as academics. It is also good to see that the issue of learning organisations is addressed, as well as impact of leadership on patients. Professor John G Burgoyne, Lancaster University Management School, UK Leadership and Change for the Health Professional is a timely and authoritative academic and professional exposition of the challenges for clinicians and healthcare managers in carrying out their management roles in our modern medical and healthcare systems. Its focus on

change is both apt and relevant in the context of the dynamic development of our healthcare structures. Niamh Brennan, Michael MacCormac Professor of Management, University College Dublin
