Program Overview

The swedish family medicine first hill residency is a three-year accredited program designed to train well-rounded family physicians capable of managing a broad spectrum of medical conditions across all ages. Situated in Seattle's First Hill district, the program benefits from proximity to major hospitals and diverse urban communities. The residency emphasizes a patient-centered model that integrates evidence-based medicine with an understanding of social determinants of health. Its mission is to cultivate compassionate, skilled physicians who are prepared to practice in various settings including outpatient clinics, hospitals, and community health centers.

Mission and Vision

The mission of the swedish family medicine first hill residency centers on delivering high-

quality, comprehensive care while promoting lifelong learning and professional development. The vision is to develop leaders in family medicine who advocate for health equity and innovate primary care delivery.

Program Structure

The residency is structured into progressive training years, each building upon the previous with increasing responsibility. Residents gain experience in outpatient, inpatient, emergency, and specialty care settings. The program also incorporates didactic sessions, quality improvement projects, and community engagement activities.

Curriculum and Training

The curriculum of the Swedish family medicine first hill residency is designed to balance clinical practice with academic learning. The training includes core family medicine topics, behavioral health integration, chronic disease management, and preventive care strategies. Residents participate in weekly educational conferences, journal clubs, and simulation labs to enhance clinical reasoning and procedural skills.

Core Educational Components

Residents receive comprehensive training in areas such as pediatrics, internal medicine, obstetrics, geriatrics, and mental health. Emphasis is placed on patient communication, cultural competence, and interprofessional collaboration. The curriculum also addresses emerging healthcare challenges such as opioid management and telemedicine.

Procedural Training

The program offers hands-on training in essential family medicine procedures including joint injections, skin biopsies, excisions, and minor surgical interventions. Procedural competency is monitored through direct observation and skills assessments.

Clinical Rotations and Patient Care

Clinical rotations at the Swedish family medicine first hill residency provide residents with exposure to a wide range of patient populations and medical conditions. Rotations are carefully designed to ensure comprehensive experience across outpatient clinics, inpatient wards, emergency departments, and specialty services.

Outpatient Clinics

Residents spend significant time in outpatient family medicine clinics where they manage acute and chronic illnesses, conduct wellness visits, and perform preventive screenings.

The clinics serve diverse populations, including underserved communities, allowing residents to develop cultural sensitivity and resourcefulness.

Inpatient and Emergency Care

Inpatient rotations involve managing hospitalized patients with complex medical and psychosocial issues. Emergency medicine rotations enhance residents' skills in acute care, triage, and urgent interventions, reinforcing their ability to provide comprehensive family medicine care in various settings.

Community Health Engagement

The residency encourages participation in community health initiatives and outreach programs. Residents gain experience addressing social determinants of health and collaborating with multidisciplinary teams to improve patient outcomes.

Faculty and Mentorship

The Swedish family medicine first hill residency boasts a team of experienced and dedicated faculty members committed to resident education and professional growth. Faculty include board-certified family physicians, behavioral health specialists, and subspecialists who provide mentorship and guidance throughout the training.

Educational Leadership

Program directors and core faculty oversee curriculum development, resident evaluation, and quality improvement efforts. They foster an environment of continuous feedback and encourage scholarly activity among residents.

Mentorship Opportunities

Each resident is paired with faculty mentors who support clinical skill development, career planning, and work-life balance. Mentorship extends beyond clinical education, promoting leadership skills and academic pursuits.

swedish family medicine first hill residency: *Trauma Stewardship* Laura van Dernoot Lipsky, Connie Burk, 2009-05-08 This beloved bestseller—over 180,000 copies sold—has helped caregivers worldwide keep themselves emotionally, psychologically, spiritually, and physically healthy in the face of the sometimes overwhelming traumas they confront every day. A longtime trauma worker, Laura van Dernoot Lipsky offers a deep and empathetic survey of the often-unrecognized toll taken on those working to make the world a better place. We may feel tired, cynical, or numb or like we can never do enough. These, and other symptoms, affect us individually and collectively, sapping the energy and effectiveness we so desperately need if we are to benefit humankind, other living things, and the planet itself. In *Trauma Stewardship*, we are called to meet these challenges in an intentional way. Lipsky offers a variety of simple and profound practices, drawn from modern psychology and a range of spiritual traditions, that enable us to look carefully at our reactions and motivations and discover new sources of energy and renewal. She includes interviews with successful trauma stewards from different walks of life and even uses New Yorker cartoons to illustrate her points. “We can do meaningful work in a way that works for us and for those we serve,” Lipsky writes. “Taking care of ourselves while taking care of others allows us to contribute to our societies with such impact that we will leave a legacy informed by our deepest wisdom and greatest gifts instead of burdened by our struggles and despair.”

swedish family medicine first hill residency: *International Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education* Jeanne Mahoney Leffers, Jennifer Gail Audette, Kevin S. Hardwick, William Van Cleve, 2018-07-31 A critical problem in resource-scarce countries across the globe is the shortage of appropriately trained health care providers. According to the World Health Organization, the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035. This disproportionately affects resource-scarce countries, denying basic health care to millions and limiting access to life-saving treatments. Due to limited resources in these countries, not enough health professionals receive training, few have the opportunity for continuing education, and the ability to develop or implement educational programs and curricula is constrained. Additionally, many existing providers choose to emigrate in pursuit of professional advancement opportunities, contributing to the overall shortage of qualified health care providers in these environments. Efforts to strengthen health workforce capacity not only increases access, safety and availability of care, but is critical to building resilient health systems capable of caring for the world’s neediest populations. This requires not only cultivating new health care providers, but also providing ongoing professional development to retain and support current providers, advancing the level of practice in accordance with current clinical science, cultivating educators, and enhancing training curricula. It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention. This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships, offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships. Collectively, the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic, non-governmental organizations and other global partnership forms. The published manuscripts highlight various elements of partnerships with several consistent themes emerging: capacity building, local empowerment, mutual trust and respect, long-term commitment, equity, collaboration, and the importance of integrating theory and practice, for a balance of academic and clinical development. The manuscripts provide examples of partnership and educational programs that are in the formative, early stages of implementation and others which have been sustained long term, some for

decades. The following eBook is divided into two parts, with each part broken down into sections. Part I of the eBook includes 18 manuscripts that showcase long-term educational programs that strongly exemplify multiple, foundational aspects of international partnerships in education including mutual collaboration and project management, empowerment of host partners to lead and sustain programs, and capacity building. While individual manuscripts included in Part I look broadly at multiple aspects of successful, international partnerships in education, Part II manuscripts focus intently on one-two elements. Part II includes 13 articles that highlight partnership through short- rather than long-term educational initiatives as well as program development and broad academic partnerships. This Research Topic was sponsored by Health Volunteers Overseas – a United States based non-profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low-resource countries to provide continuing education, train the trainer courses, professional support, and consultation on academic program and curricula development.

swedish family medicine first hill residency: Emotion in the Clinical Encounter Rachel Schwartz, Judith A. Hall, Lars G. Osterberg, 2021-08-22 The foundational knowledge and practical actions you need to effectively address your patients' emotions—and manage your own Emotions are ever-present in the context of illness and medical care and can have an enormous impact on the well-being of patients and healthcare providers alike. Despite this impact, emotions are often devalued in a medical culture that praises stoicism and analytical reasoning. Featuring the latest theories and research on emotion in healthcare, this much-needed resource will help you build the necessary skillset to navigate the extraordinary emotional demands of practicing medicine. Emotion in the Clinical Encounter will help you: Learn the science of emotion, as it relates to clinical care Understand the role of emotion in illness Recognize the connection between clinical response to patient emotions and care outcomes Develop effective strategies for emotion recognition Build strong emotional dialogue skills for medical encounters Identify biases that may shape clinical interactions and subsequent outcomes Understand emotion regulation in patients, providers, and in the clinical relationship Address challenges and opportunities for clinical emotional wellness Identify a new path forward for delivering emotion-based medical school curricula “How did we manage for this long in healthcare without this textbook? This is an essential guide to help both trainees and established clinicians sharpen their skills. Our patients will only benefit when we bring our full set of skills to the bedside. —Danielle Ofri MD, PhD, Clinical Professor of Medicine, New York University, Editor-in-Chief of Bellevue Literary Review, and author of What Doctors Feel: How Emotions Affect the Practice of Medicine “This is a unique contribution that deeply explores the role of emotions in clinical medicine, drawing on a wide range of disciplines and presenting both scholarly paradigms and practical applications. It should be essential reading for medical educators, clinicians and

patient advocates who all aim to better navigate today's frustrating healthcare system." —Jerome Groopman MD, Recanati Professor Harvard Medical School, and author of *How Doctors Think* "Emotion in the Clinical Encounter is a must-read book for clinicians. It would be especially helpful if medical students start their careers by reading this invaluable volume to gain a deeper understanding of human emotion. The book is evidence-based and detailed enough to be perhaps the definitive guide to emotions for the clinician." —William Branch, MD, MACP, FACH, The Carter Smith, Sr Professor of Medicine, Emory University

swedish family medicine first hill residency: The Making of a Rescuer Nicholas Campbell Corff, 2012-11-26 This is a book about the making of a hero - a rescuer. There are few of us that can claim to be bigger-than-life heroes, but surely the story of Dr. Otto Trotts life is the story of one of these. Because of his existence many lives have been saved or improved, human suffering has been reduced, and the world is a better place. What greater statement can be made about a person? A hiker sees the beautiful blue of a mountain gentian just off the trail and stops to capture the image through a snapshot, but in seeking a slightly wider angle steps back -- in a flash the hiker lies injured amid the rocks. A snowboarder searches for untouched powder snow, but finds a cliff instead. A small plane has engine trouble and glides steeply toward a mountain meadow. An early snowstorm catches two climbers exposed in the high alpine. An avalanche buries a foolish snowmobiler trying to make the highest mark on the side of snow-covered slope. An older gentleman has a heart attack far from his city hospital. Its quite possible and even probable that what all of the above have in common is Dr. Otto Trott. He co-founded the search and rescue organization that seeks out the injured and carries them down from the mountains, he pioneered the medical treatments that will be used for hypothermia and frostbite, he introduced advanced European methods of climbing as well as the identification of avalanche danger areas and the systematic search for and rescue of accident victims. Most importantly, Otto taught generations of others to follow in his footsteps. As Lou Whittaker, the renowned mountain guide states, This book is a must for anyone who seeks the mountains and their reward. Dee Molenaar the acclaimed mountaineer, artist and writer, says that this treatise is long overdue, while the legendary high altitude premier climber Jim Wickwire writes that Nicholas Corff has brought to life the fascinating story of Otto Trott There is no question that Dr. Otto Trott was one of those few men who was a legend in his own time, but he always remained a man of great empathy as well as skill who sought to relieve suffering, improve the safety of the outdoors and protect the mountain environment he so loved. In his long and adventuresome life he overcame great loss with courage and perseverance, and ultimately was the recipient of many awards including the Jefferson Award. Along with the text there are over 250 full page photos and illustrations.
