sweat by hurston analysis: Sweat Zora Neale Hurston, 1997 Now frequently anthologized, Zora Neale Hurston's short story *Sweat* was first published in *Fireell*, a legendary literary magazine of the Harlem Renaissance, whose sole issue appeared in November 1926. Among contributions by Gwendolyn Bennett, Countee Cullen, Langston Hughes, and Wallace Thurman, *Sweat* stood out both for its artistic accomplishment and its exploration of rural Southern black life. In *Sweat* Hurston claimed the voice that animates her mature fiction, notably the 1937 novel *Their Eyes Were Watching God*; the themes of marital conflict and the development of spiritual consciousness were introduced as well. *Sweat* exemplifies Hurston's lifelong concern with women's relation to language and the literary possibilities of black vernacular. This casebook for the story includes an introduction by the editor, a chronology of the author's life, the authoritative text of *Sweat*, and a second story, *The Gilded Six-Bits*. Published in 1932, this second story was written after Hurston had spent years conducting fieldwork in the Southern United States. The volume also includes Hurston's groundbreaking 1934 essay, *Characteristics of Negro Expression*, and excerpts from her autobiography, *Dust Tracks on a Road*. An article by folklorist Roger Abrahams provides additional cultural contexts for the story, as do selected blues and spirituals. Critical commentary comes from Alice Walker, who led the recovery of Hurston's work in the 1970s, Robert Hemenway, Henry Louis Gates, Gayl Jones, John Lowe, Kathryn Seidel, and Mary Helen Washington.

sweat by hurston analysis: Zora Neale Hurston Cynthia Davis, Verner D. Mitchell, 2013-05-09 Zora Neale Hurston (1891-1960), the most prominent of the Harlem Renaissance women writers, was unique because her social and professional connections were not limited to literature but

encompassed theatre, dance, film, anthropology, folklore, music, politics, high society, academia, and artistic bohemia. Hurston published four novels, three books of nonfiction, and dozens of short stories, plays, and essays. In addition, she won a long list of fellowships and prizes, including a Guggenheim and a Rosenwald. Yet by the 1950s, Hurston, like most of her Harlem Renaissance peers, had faded into oblivion. An essay by Alice Walker in the 1970s, however, spurred the revival of Hurston's literary reputation, and her works, including her 1937 novel *Their Eyes Were Watching God*, have enjoyed an enduring popularity. *Zora Neale Hurston: An Annotated Bibliography of Works and Criticism* consists of reviews of critical interpretations of Hurston's work. In addition to publication information, each selection is carefully crafted to capture the author's thesis in a short, pithy, analytical framework. Also included are original essays by eminent Hurston scholars that contextualize the bibliographic entries. Meticulously researched but accessible, these essays focus on gaps in Hurston criticism and outline new directions for Hurston scholarship in the twenty-first century. Comprehensive and up-to-date, this volume contains analytical summaries of the most important critical writings on Zora Neale Hurston from the 1970s to the present. In addition, entries from difficult-to-locate sources, such as small academic presses or international journals, can be found here. Although intended as a bibliographic resource for graduate and undergraduate students, this volume is also aimed toward general readers interested in women's literature, African American literature, American history, and popular culture. The book will also appeal to scholars and teachers studying twentieth-century American literature, as well as those specializing in anthropology, modernism, and African American studies, with a special focus on the women of the Harlem Renaissance.

sweat by hurston analysis: Rereading the Harlem Renaissance Sharon L. Jones, 2002-12-30 African American writers of the Harlem Renaissance generally fall into three aesthetic categories: the folk, which emphasizes oral traditions, African American English, rural settings, and characters from lower socioeconomic levels; the bourgeois, which privileges characters from middle class backgrounds; and the proletarian, which favors overt critiques of oppression by contending that art should be an instrument of propaganda. Depending on critical assumptions regarding what constitutes authentic African American literature, some writers have been valorized, others dismissed. This rereading of the Harlem Renaissance gives special attention to Fauset, Hurston, and West. Jones argues that all three aesthetics influence each of their works, that they have been historically mislabeled, and that they share a drive to challenge racial, class, and gender oppression. The introduction provides a detailed historical overview of the Harlem Renaissance and the prevailing aesthetics of the period. Individual chapters analyze the works of Hurston, West, and Fauset to demonstrate how the folk, bourgeois, and proletarian aesthetics figure into their writings. The volume concludes by discussing the writers in relation to contemporary African American women authors.

sweat by hurston analysis: Student Companion to Zora Neale Hurston Josie P. Campbell, 2001-07-30 Zora Neale Hurston is considered one of the most controversial yet prominent figures associated with the Harlem Renaissance. This introductory study examines Hurston's contributions to that literary movement, as well as her role as mediator between the black and white worlds in which she lived. Readers will appreciate the clear presentation of the biographical facts of her life, as well as an overview of the issues and varying perceptions surrounding her literary achievements. A full chapter is devoted to analysing each of Hurston's major works of fiction: *Jonah's Gourd Vine* (1934), *Their Eyes Were Watching God* (1937), *Moses, Man of the Mountain* (1939), *Seraph on the Suwanee* (1948) as well as her short fiction and her fictionalized autobiography *Dust Tracks on a Road* (1942). For each of the works, plot, character development, themes, setting and symbols are identified and discussed in clear accessible language. An alternate critical perspective enhances the understanding of each of Hurston's full length works. Contemporary reviews are cited in a bibliography which also helps students find further biographical and critical information on Zora Neale Hurston.

sweat by hurston analysis: Black Heart Phillip M. Richards, 2006 *Black Heart* is a

provocative and polemical critique of African American literary studies at the beginning of the twenty-first century. Through a series of sharp and insightful essays on a wide range of critical thinkers, Phillip M. Richards traces what he sees as an erosion of moral reflection in African American literary culture - a process that has left contemporary black academic criticism socially, politically, and culturally hollow. Exploring the work of Henry Louis Gates, Jr., Michael Dyson, Karla Holloway and others, *Black Heart* sets forth the rhetorical strategies of present-day African American critical writing, and probes the ethical dimensions of its institutional life in the academy, the media, and the public sphere. Richards undertakes to recover the procedures by which cultural and moral value may be recovered for black literary culture and to establish the possibilities for a new humanism in African American writing and literary culture.

Moreover, this crossroads intersects with the cultural determinations that some of the contributors explore in a critical way. Consequently, this volume represents a necessary contribution to the new maps of gender that are currently being set for the future. The book will appeal to academic scholars interested in the articulation of gender in traditional discourses, as well as the many deconstructions that have been undertaking in the recent past and the present. sweat by hurston analysis: Black Power and the American People Rafael Torrubia, 2016-09-14 While the history of the non-violent Civil Rights Movement, from Rosa Parks to Martin Luther King, is one of the great American stories of the twentieth century, the related Black Power movement has taken a more complex path through the nation's history. Formed by a multitude of individuals, the long history of the Black Power movement stretches before and beyond its political manifestations. Beginning with the folk-narratives told on the plantation, *Black Power and the American People* charts a course through the iconoclasm of the Harlem Renaissance, the battleground of the American campus, the struggle and skill of the Negro Leagues, the drama of the boxing ring, the killing fields of Vietnam and the cold concrete of the penitentiary, right up to the Black Lives Matter movement of the present day. Tracing these connected cultural expressions through time, *Black Power and the American People* explores the profound legacy of Black Power from its earliest roots to its most futuristic manifestations, its long history in American culture and its profound influence on the American imagination.

sweat by hurston analysis: Readings in Writing Courses Richard C. Raymond, 2010-12-01 As the title suggests, this six-chapter book responds to a question which, in Western culture, goes back to Plato, Aristotle, Cicero, and Quintilian, namely, What should rhetoric teachers ask their students to read? Primarily historical, the first two chapters trace conflicting answers to the question above, focusing on two constructive results of the debate: the re-invention of rhetoric and writing as a

discipline, a coherent and growing body of knowledge; and, as a result, the emergence of independent departments of writing, free from departments of English, free, therefore, to develop their own curriculum and to manage their own budgets. Additionally, the second chapter examines two destructive consequences of this debate: the ban of literature from writing courses, where students might profitably study both; and, as a result, the often painful departmental splits, which not only separate former colleagues but also cramp the pedagogy of those trained to teach both writing and literature. More than a survey of key publications, this chapter encourages readers to honor the discipline of rhetoric but to make a place for literature on their composition syllabi. The next four chapters provide pedagogical support for these chief claims: that literature can and should be taught in writing courses, and that such readings need not distract students from the primary text, their own writing. On the contrary, these readings motivate serious writing when students feel invited into a conversation on issues that touch their lives. These pedagogical chapters, then, move entering professionals from the theoretical debate to the application of theory; therefore, the book would serve well professors of courses in composition theory, particularly those who enjoy 'teaching the conflicts' and preparing their graduate students to design assignments and courses that apply theories of learning, reading, and composing.

sweat by hurston analysis: Manifestations of Masculine Magnificence Teresa N.

Washington, 2014-02-25 *Manifestations of Masculine Magnificence: Divinity in Africana Life, Lyrics, and Literature* is a remarkable study and the first of its kind. Teresa N. Washington eschews popular culture's pimp myths and thug sagas and traces the Africana man's power, creativity, and consciousness to his inherent divinity. *Manifestations of Masculine Magnificence* takes the reader to the source of power with an analysis of African Divinities and divine technologies. Washington explores the permanence and proliferation of African Gods from oppressive plantations to the empowering proclamations of such leaders as W. D. Fard, Marcus Garvey, Father Divine, and Allah, the Father. Washington analyzes the summonses to and from the Gods that resonate in the music of such artists as Erykah Badu, The RZA, Sun Ra, X Clan, and Rakim. Using literary analysis as a prism to display the diversity of Africana divinity, Washington reveals the literature of such writers as August Wilson, Walter Mosley, Toni Morrison, Ngugi wa Thiong'o, and Ishmael Reed to be three-way mirrors that eternally reflect and project the Gods, their myriad powers, and their weighty responsibilities. *Manifestations of Masculine Magnificence* will prove indispensable to independent scholars as well as scholars of Comparative Literature, Hip Hop Studies, Gender Studies, Africana Studies, Literary Criticism, and Religious Studies.

sweat by hurston analysis: Collective Participation and Audience Engagement in Rap

Music David Diallo, 2019-08-28 Why do rap MCs present their studio recorded lyrics as "live and direct"? Why do they so insistently define abilities or actions, theirs or someone else's, against a pre-existing signifier? This book examines the compositional practice of rap lyricists and offers compelling answers to these questions. Through a 40 year-span analysis of the music, it argues that whether through the privileging of chanted call-and-response phrases or through rhetorical strategies meant to assist in getting one's listening audience open, the focus of the first rap MCs on community building and successful performer-audience cooperation has remained prevalent on rap records with lyrics and production techniques encouraging the listener to become physically and emotionally involved in recorded performances. Relating rap's rhetorical strategy of posing inferences through intertextuality to early call-and-response routines and crowd-controlling techniques, this study emphasizes how the dynamic and collective elements from the stage performances and battles of the formative years of rap have remained relevant in the creative process behind this music. It contends that the customary use of identifiable references and similes by rap lyricists works as a fluid interchange designed to keep the listener involved in the performance. Like call-and-response in live performances, it involves a dynamic form of communication and places MCs in a position where they activate the shared knowledge of their audience, making sure that they "know what they mean," thus transforming their mediated lyrics into a collective and engaging performance.

sweat by hurston analysis: Materialities of Ritual in the Black Atlantic Akinwumi

Ogundiran, Paula Saunders, 2014-10-03 Focusing on everyday rituals, the essays in this volume look at spheres of social action and the places throughout the Atlantic world where African-descended communities have expressed their values, ideas, beliefs, and spirituality in material terms. The contributors trace the impact of encounters with the Atlantic world on African cultural formation, how entanglement with commerce, commodification, and enslavement and with colonialism, emancipation, and self-rule manifested itself in the shaping of ritual acts such as those associated with birth, death, healing, and protection. Taken as a whole, the book offers new perspectives on what the materials of rituals can tell us about the intimate processes of cultural transformation and the dynamics of the human condition.
