Aesthetic Life Carol Wild, 2022-07-08 This book explores why and how the personal creative practice of arts teachers in school matters. It responds to ethnographic research that considers specific works-of-art created by teachers within the context of their classrooms. Through a classroom-based ethnographic investigation, the book proposes that the potential impact of artist-teacher practice in the classroom can only be understood in relation to the flows of power and policy that concurrently shape the classroom. In particular, Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed, not so much because of the advent of the Internet, but because of the potential divide between the expectations and practices of students who are "digital natives" of the digital revolution, and those of their teachers who are mostly "digital immigrants". She addresses the question: do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education. This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. teacher relationship with student quotes: *Mathematics at the Margins* Elizabeth Warren, Jodie Miller, 2016-03-17 This book reports the impact a four-year longitudinal study (Representations, Oral Language and Engagement in Mathematics (RoleM)) had on teachers and students from 16 schools in disadvantaged contexts. It offers theories with regard to the interplay between teaching and learning mathematics as teachers and students in these contexts implement a mathematics program. The data are longitudinal, drawn from 154 teachers and their students (up to 1738 students) from the first four years of school (Foundation to Year 3). To ascertain the effectiveness of the RoleM Professional Learning model, teachers were interviewed three times a year and pre and post-tests were administered to students at the beginning and end of each year. Students' results indicated that all students' understanding of mathematics improved significantly, with the ESL students showing the greatest gains. Their results matched the norm-referenced expectations for all Australian students of this age. This book shares the journey of these teachers, Indigenous teacher aides and students. It outlines the dimensions of the research findings that supported teachers to become effective teachers of mathematics and assisted students in becoming successful learners of mathematics. The book also draws on the expertise of researchers from both Canada and New Zealand. They share the similarities and the differences between RoleM findings and their own contexts, in order to draw general conclusions for the effective teaching and learning of mathematics at the margins of society.

teacher relationship with student quotes: *Breaking the Culture of Bullying and Disrespect, Grades K-8* Marie-Nathalie Beaudoin, Maureen Taylor, 2004-01-20 Even in primary school, students suffer from bullying, aggression, and harassment at the hands of other students. Teachers and Headteachers deal with incidents of disrespect day in and day out, taking valuable time and energy away from instruction and force teachers into the role of disciplinarian. Often teachers and other educators resort to using stricter forms of control and behavior modification to stop bullying, but usually this doesn't solve the problem and also threatens the student-teacher relationship. The fact is, students don't want to be bullies, but for many they feel it's their only option in a given situation. By first understanding students' experiences, teachers and other educators can help students discover other options for dealing with problematic situations that avoid bullying, aggression, and harassment. The authors provide ideas, strategies, and activities that promote respect, responsibility, and tolerance. The authors-a school psychologist and an elementary school teacher-interviewed dozens of students and educators and have tested their strategies in dozens of schools. The book includes numerous easy-to-implement activities along with programs and curricula appropriate for working with individual students, classes, and whole schools. This accessible and jargon-free resource includes first-person quotes from students and teachers, successful stories of students overcoming problems of bullying and disrespect, frequently asked questions, reflective questions, examples of student work, and a glossary.
