teacher night at the k 2024: Teaching and Time Poverty Greg Thompson, Anna Hogan, 2024-12-04 As teacher shortages reach a global crisis point, this book explores how time poverty has become a critical factor in the working lives of teachers and school leaders. Arguing that we need to move away from framing the problem of teachers’ work as simply workload, this book suggests that understanding time poverty is the first step in moving toward more manageable working lives. The book brings together international perspectives on teacher time poverty, drawing on theoretical and empirical work to underscore the growing complexity of teachers’ work and how this impacts job satisfaction, stress and feeling that there is never enough time to accomplish all that needs to be done. Many policy solutions misdiagnose the problems of teachers’ work, simply suggesting it is an issue of workload. The chapters investigate issues of work intensification, finding that teachers are not only working longer, but also working harder as they manage more complex classrooms and policy mandates. This book is essential reading for those interested in understanding how current education policy both produces time poverty and could better identify and respond to the complexities of teachers’ work.

teacher night at the k 2024: Critical AI in K-12 Classrooms Stephanie Smith Budhai, Marie K. Heath, 2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence, education, and justice Artificial intelligence is rapidly integrating into today’s classrooms, but unlike other new technologies, AI has the potential to harm, making it difficult to take advantage of its benefits. In Critical AI in K-12 Classrooms, Stephanie Smith Budhai and Marie K. Heath draw attention to the biases embedded within AI algorithms, such as those powering OpenAI’s ChatGPT and DALL-E, to guide students and teachers in developing strategies to best incorporate AI—or not—into equitable learning. AI’s reliance on existing data and knowledge systems means Black, queer, those with disabilities, and other marginalized students are at greater risk of being harmed by built-in limitations and bias. Budhai and Heath show how to circumvent if not actively resist such harms as machine learning, NLPs, LLMS, and GenAI enter the classroom, with practical examples rooted in culturally sustaining, abolitionist, and fugitive pedagogies across disciplines. Their practical guide creatively answers the concerns of educators committed to forward-thinking yet fair instruction and the needs of students eager to use AI for just ends. Critical AI in K-12 Classrooms meets the challenges of a key STEM technology with an eye toward cultivating a more just world. Balancing responsible learning with the joy of discovery, Budhai and Heath build a framework for AI instruction that all educators can confidently use.

teacher night at the k 2024: Accessible Assessment and Pedagogies Linda J. Graham, Jill Willis, 2025-07-28 This book is an evidence-based, practical guide to enable pre- and in-service teachers, system, school, and middle leaders to maximise students’ understanding of classroom teaching and assessment, improving outcomes and expanding opportunities for all students. Developing accessible assessment and pedagogy is especially critical when students have language and/or attentional difficulties; what if there were some simple things schools could do to make learning and assessment easier for all students to understand, from the outset? This book presents robust evidence from world-leading collaborative research in three large secondary schools that proactively designing classroom instruction and assessment for accessibility makes a positive difference for students and teachers. Evidence from eye-tracking technology, classroom observations, questionnaires and interviews with students and teachers, and summative assessment

results points to what can change and why these changes are important. Written in the same plain language and humour as its best-selling sister, *Inclusive Education for the 21st Century: Theory, Policy and Practice*, this new book explains accessibility and why it matters and details processes for designing out barriers in summative assessment and pedagogy. Stories from partner schools about how they spread these gains across the whole school make this an accessibility playbook to drive whole school and system reform. Teachers, heads of department, principals, speech pathologists, and other professionals will find this text a rich source of professional learning for individuals and teams with discussion prompts for leaders and teachers at the end of each chapter.

teacher night at the k 2024: Mathematics Tasks for the Thinking Classroom, Grades K-5 Peter Liljedahl, Maegan Giroux, 2024-05-27 Practical and proven math tasks to maximize student thinking and learning Building upon the blockbuster success of *Building Thinking Classrooms in Mathematics*, Peter Liljedahl has joined forces with co-author Maegan Giroux to bring the Building Thinking Classrooms (BTC) framework to life in this new book, *Mathematics Tasks for the Thinking Classroom, Grades K-5*. But this book is so much more than simply a collection of good thinking tasks. It delves deeper into the implementation of the 14 practices from the BTC framework by updating the practices with the newest research, and focusing on the practice through the lens of rich math tasks that address specific mathematical learning outcomes or standards. Across the 20 non-curricular tasks and 30 curricular tasks used as models, this book: Helps you choose tasks to fit your particular math standards, goals, and the competencies you want your students to build Walks you through all the steps and scripts to launch, facilitate, and consolidate each task Shares examples of possible student solutions along with hints you might offer to help their thinking along Offers tasks for consolidation, example notes to my future forgetful self, and mild, medium, and spicy check-your-understanding questions (CYUs) for every thin sliced sequences of curricular tasks Imparts reflections from the authors on each task The book closes with specific guidance on how to find more tasks or craft your own non-curricular and curricular tasks, along with answers to educators' frequently asked questions. It includes access to a companion website that includes downloadables and a task template for creating your own tasks. Whether you are new to BTC or a seasoned user, *Mathematics Tasks for the Thinking Classroom, Grades K-5* will help teachers, coaches, and specialists transform traditional math classrooms into dynamic and thought-provoking learning spaces.

teacher night at the k 2024: Educational Psychology Angela M. O'Donnell, Eva Dobozy, Michael C. Nagel, Brendan Bartlett, Simone Smala, Catherine Wormald, Gregory Yates, 2024-12-31 O'Donnell et al.'s *Educational Psychology* provides pre-service teachers with a comprehensive framework for implementing effective teaching strategies aimed at enhancing students' learning, development, and potential. Through a meticulous examination of relevant psychological theories, supplemented by contemporary local case studies, and detailed analysis of lesson plans, the text offers a nuanced understanding of educational psychology without resorting to specialised terminology. Central to the text is a reflective practice framework, equipping readers with the essential skills to bridge theoretical concepts with real-world classroom scenarios. Emphasising critical thinking and reflective practice, the text underscores their significance in fostering sustained professional growth and success. By integrating reflective practice into the fabric of the narrative, utilising real classroom examples, *Educational Psychology* cultivates a deep-seated understanding of the practical applications of psychological principles in educational contexts.

teacher night at the k 2024: Teaching Life Writing Orly Lael Netzer, Amanda Spallacci, 2024-07-05 *Teaching Life Writing: Theory, Methodology, and Practice* combines research in life writing and pedagogy to examine the role of life stories in diverse learning contexts, disciplines, and global settings. While life stories are increasingly integrated into curricula, their incorporation

raises the risk of reducing them to mere historical evidence. Recognizing the importance of teaching life stories in a manner that goes beyond a surface understanding, life-writing scholars have been consistently exploring innovative pedagogical practices to engage with these stories in ways that encourage dynamic and nuanced conversations about identity, agency, authenticity, memory, and truth, as well as the potential of these narratives to instigate social change. This book assembles contributions from a diverse group of international educators, weaving together life writing research, critical reflection, and concrete pedagogical strategies. The chapters are organized around three overarching conversations: the materials, practices, and mediations involved in teaching life writing within the context of contemporary social change. The unique perspectives presented in this collection provide educators with valuable insights into effectively incorporating life stories into their teaching practices. Featuring works by over a dozen educators, the volume interlaces life writing research, critical reflection, and tangible pedagogical practices. The chapters in this book were originally published as a special issue of *a/b: Auto/Biography Studies*.

teacher night at the k 2024: *Teaching Higher-Order Thinking to Young Learners, K-3* Steffen Saifer, 2024-09-20 To be truly educated today, students need more than knowledge; they need higher-order thinking skills. Critical and creative thinking is required to recognize and counter

disinformation, to overcome thinking errors, and to be successful in school and life. To effectively teach these skills, we must start early, when young minds are still forming. While K-3 students are capable of higher-order thinking, most lessons engage only their lower-order thinking. In this comprehensive book based on sound science, Dr. Saifer offers many practical and engaging ways to develop students' logical, critical, and creative thinking skills within nearly every lesson, in all subject areas, and throughout the day. *Teaching Higher-Order Thinking to Young Learners, K-3: How to Develop Sharp Minds for the Disinformation Age* is key reading for any early childhood teacher, leader, or parent.

teacher night at the k 2024: *Franz Kafka: The Best Works* Franz Kafka, 2024-02-22 This ebook compiles Franz Kafka's greatest writings, including novels, novellas, short stories and parables such as *Amerika*, *The Trial*, *The Metamorphosis*, *The Castle*, *In the Penal Colony*, *A Hunger Artist* and *The Great Wall of China*. This edition has been professionally formatted and contains several tables of contents. The first table of contents (at the very beginning of the ebook) lists the titles of all novels included in this volume. By clicking on one of those titles you will be redirected to the beginning of that work, where you'll find a new TOC that lists all the chapters and sub-chapters of that specific work.

teacher night at the k 2024: *Collected Works of C. G. Jung, Volume 4* C. G. Jung, 2024-03-19 The authoritative edition of Jung's essential writings for understanding his early enthusiasm for—and later split with—Freud and psychoanalysis. Freud and Psychoanalysis gathers Jung's writings on Freud and psychoanalysis published between 1906 and 1916, along with two later, related papers. The book covers the period of the enthusiastic collaboration between the two pioneers of psychology through the years when Jung's growing appreciation of religious experience, his criticism of Freud's emphasis on pathology, and other differences led to Jung's formal break with his mentor. Part I features brief studies of Freud's theory of hysteria, dream analysis, the psychology of rumor, and other subjects. Parts II and III contain the essentials of the criticism that led to Jung's rupture with Freud, the most important of which is "The Theory of Psychoanalysis." Part IV presents "The Significance of the Father in the Destiny of the Individual." The book's final two pieces, "Freud and Jung: Contrasts" and the introduction to a book by W. M. Kranefeldt, further illuminate Jung's reassessment of psychoanalysis.

teacher night at the k 2024: *The New Meaning of Educational Change* Michael Fullan, 2025 This new edition is unlike any of its predecessors. Michael Fullan first provides a critical account of the last 60 years of educational change across the world with a focus on the United States. He then presents a radically different future, including a complete model for transforming our badly outdated current education system. "A searing synthesis of what we now know about system change." —Anthony Mackay, Centre for Strategic Education, Melbourne "This definitive book articulates in plain language where we need to go and how to get there." —Michael Matsuda, superintendent, Anaheim Union High School District, CA "Fullan captures the complexity of leadership in a time of technological advancements and complex societal challenges." —Thomas D'Amico, director of education, Ottawa Catholic School Board "Run, don't walk, to pick up and read the sixth edition of *The New Meaning of Educational Change*!" —Barnett Berry, Learning Policy Institute "Michael Fullan brings the reader on a compelling 60-year journey of educational change." —Tiffany Bastin, assistant deputy minister, New Brunswick Department of Education, NJ "I have no doubt that this sixth edition will continue Fullan's enormous success in influencing policy and practice globally." —Mel Ainscow, emeritus professor, University of Manchester, UK

teacher night at the k 2024: *Constructivist Teaching by Heart* Krista Calvert, Dana McMillan, 2024-06-03 This insightful book offers a modern take on the time-honored tradition of developmentally appropriate, child-centered, constructivist philosophy of instruction: Teaching children one at a time, yet all at once. The book provides a comprehensive road map to teaching that supports student engagement, child development, classroom environment, grouping and organization, authentic literacy instruction, and culturally informed practices. Through a series of practical chapter essays and examples, the authors push back against scripted curricula and

one-size-fits-all school initiatives, offering instead rich examples and guiding questions to bring you closer to an authentic teaching approach that honors students and their learning. Designed for early childhood through third-grade teachers, principals, administrators, and pre-service students, *Constructivist Teaching by Heart* is essential reading for professional development, peer discussions, university coursework, individual study, and everyone on the journey to making children the heart of their classrooms.

teacher night at the k 2024: Artful Teaching David M. Donahue, Jennifer B. Stuart, 2024 The authors in this volume share exemplary arts-integration practices across the K-8 curriculum. Rather than providing formulas or scripts to be followed, they carefully describe how the arts offer an entry point for gaining insight into why and how students learn. The book includes rich and lively examples of public school teachers integrating visual arts, music, drama, and dance with subject matter, including English, social studies, science, and mathematics. Readers will come away with a deeper understanding of why and how to use the arts every day, in every school, to reach every child--

teacher night at the k 2024: Ebook 180 Day Access to Accompany Allen, Misconceptions in Primary Science 4e Michael Allen, 2025-03-05 "As Michael Allen points out, old misconceptions seldom die while new ones are conceived daily. He has made an excellent job of refreshing this fourth edition... It is so much more than a collection of fascinating conceptual 'butterflies', it is a carefully detailed window onto some of children's science-based thinking." Mike Watts, Professor of Education, Brunel University, UK "Misconceptions in Primary Science is a comprehensive account of how children learn science and the common misconceptions they may have. It is a detailed and helpful book that all primary teachers should consult before teaching any aspect of science." Dr James Williams, Reader in Science Education and Communication, University of Sussex, UK *Misconceptions in Primary Science* remains the go-to resource for primary teachers seeking practical, accessible support to tackle common misconceptions in the science classroom. This updated edition will enhance teachers' grasp of scientific concepts and offers practical guidance to address the thought processes that can lead children astray. Unlike many primary science books that solely focus on subject knowledge or lesson plans, Michael Allen delves into the origins of over 100 common misconceptions, providing insights into why they arise and how to address them effectively. New features include: •Planning and assessment sheets tailored to each chapter •A new chapter on climate change •Misconceptions about bacteria and viruses, including Covid-19 •Guidance on leveraging Artificial Intelligence to enhance science teaching With creative activities and actionable advice, this book helps teachers bring scientific concepts to life for their students, fostering deeper understanding and improved learning outcomes. For student, newly qualified and experienced teachers alike, *Misconceptions in Primary Science* is an indispensable toolkit for teaching primary science with confidence.

teacher night at the k 2024: Cases on Enhancing P-16 Student Engagement With Digital Technologies Gierhart, Aaron R., 2024-12-27 Reimagining how digital technologies are integrated into education is crucial for fostering active and meaningful student engagement. Traditional, knowledge-centric approaches often overlook the dynamic processes students use to interact with and apply technology in their learning. By focusing on how students actively engage with digital tools to meet academic and developmental goals, educators can create richer, more effective learning experiences. This shift not only enhances academic outcomes but also prepares students with the critical skills needed to navigate and contribute to an increasingly digital world. *Cases on Enhancing P-16 Student Engagement With Digital Technologies* features cases of teaching and learning with digital technologies in P-16 educational settings, focusing specifically on what learners do with technology. It shares cases of teaching in which technologies are leveraged in student-centered ways that transform learning and allow students to engage in authentic, meaningful learning experiences. Covering topics such as artificial intelligence (AI), immersive learning experiences, and traditional learning, this book is an excellent resource for P-16 educators, leaders, stakeholders, policymakers, and more.

teacher night at the k 2024: Teaching Shakespeare Beyond the Major M. Tyler Sasser, Emma K. Atwood, 2024-02-22 This edited collection considers the task of teaching Shakespeare in general education college courses, a task which is often considered obligatory, perfunctory, and ancillary to a professor's primary goals of research and upper-level teaching. The contributors apply a variety of pedagogical strategies for teaching general education students who are often freshmen or sophomores, non-majors, and/or non-traditional students. Offering instructors practical classroom approaches to Shakespeare's language, performance, and critical theory, the essays in this collection explicitly address the unique pedagogical situations of today's general education college classroom.
