teacher in service days: *Kill the Messenger* Richard Phelps, 2017-09-04 In response to public

demand, federal legislation now requires testing of most students in the United States in reading and mathematics in grades three through eight. Many educators, parents, and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available. *Kill the Messenger*, now in paperback, fills this gap. This is perhaps the most thorough and authoritative work in defense of educational testing ever written. Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self-interest. It is not surprising that they arrive at emphatically anti-testing conclusions. Much, if not most, of this hostile research is passed on to the public by journalists as if it were neutral, objective, and independent. *Kill the Messenger* explains and refutes many of the common criticisms of testing; describes testing opponents' strategies, through case studies of Texas and the SAT; illustrates the profound media bias against testing; acknowledges testing's limitations, and suggests how it can be improved; and finally, outlines the consequences of losing the war on standardized testing.

teacher in service days: Stop the Violence in Latin America Laura Chioda, 2017-06-19 The Latin America and Caribbean (LAC) region has the undesirable distinction of being the world's most violent region, with 24.7 homicides per 100,000 inhabitants. The magnitude of the problem is staggering and persistent. Of the top 50 most violent cities in the world, 42 are in LAC. In 2010 alone, 142,302 people in LAC fell victim to homicide, representing 390 homicides per day and 4.06 homicides every 15 minutes. Crime disproportionately affects young men aged 20 to 24, whose homicide rate of 92 per 100,000 nearly quadruples that of the region. The focus of Crime Prevention in Latin America and the Caribbean is to identify policy interventions that, whether by design or indirect effect, have been shown to affect antisocial behavior early in life and patterns of criminal offending in youth and adults. Particular attention is devoted to recent studies that rigorously establish a causal link between the interventions in question and outcomes. This publication adopts a lifecycle perspective and argues that as individuals progress through different stages of the lifecycle, not only do different sets of risk factors arise and take more prominence, but their interactions and interdependencies shape human behavior. These interactions and the relative importance of different sets of risk factors identify relevant margins that can effectively be targeted by prevention policies, not only early in life, but throughout the lifecycle. Indeed prevention can never start too early, nor start too late, nor be too comprehensive.

teacher in service days: Developing English Teachers Goodwyn, Andrew, 1997-05-01 * How do student teachers learn to teach? * How can experienced English teachers teach student teachers? * How can good English teachers continue to develop and improve? Developing English Teachers is a book for anyone interested in helping English teachers to develop and improve. Its main focus is on the ways in which experienced English teachers can support and develop student teachers and induct them into the profession. However it goes further than this to examine the idea of mentorship as a feature of continuing professional development and of professional development as a constant element in the life of a reflective practitioner. It examines how experienced English teachers can learn from the challenge of explaining their teaching to student and beginning teachers. It also examines how being a mentor is very different to being a class teacher and emphasizes the new areas of learning that such a role demands. The book shows how all participants can learn from this reflective cycle and improve their teaching and contribute to improving the quality of the English teaching profession.
