teacher falls in love with student movie: Bisexual Characters in Film Wayne M Bryant, 2013-10-23 How far have we progressed from the days when showing a film such as Jack Smith's *Flaming Creatures* landed the cinema's programmer, projectionist, and ticket taker in jail? What are some of the hidden clues modern audiences are overlooking in older films that suggest a character's bisexuality? Which famous actors, actresses, directors, and screenwriters were attracted to people of both sexes? In *Bisexual Characters in Film*, the first book to focus on the role of bisexual characters in film, you'll find answers to these questions and many more as you explore, analyze, and celebrate 80 years of bisexual movie characters (and the people who have created them) from around the world. These include the directors, writers, actors, composers, and designers whose sexual orientation has informed their work. An analysis of the Motion Picture Production Code and its devastating effect on bisexual and homosexual screen images forms an important part of the book. You learn how, specifically, it eradicated gay, lesbian, and bisexual characters from Hollywood films as well as the role of bisexual, lesbian, and gay filmmakers in finally defeating it. Other questions you'll find answers to include: Who, or what, is a bisexual? How were bisexual characters represented in silent film, before the forces of censorship banned them from the screen? What bisexual myths and stereotypes are portrayed on film? What is the role of "camp" in bisexual film? *Bisexual Characters in Film* is a unique resource for researchers; librarians; film festival planners; the queer media; professors and students of lesbian, gay, and bisexual studies; bisexual activists; and general bisexual, gay, lesbian, and transgendered readers. teacher falls in love with student movie: *Critical Pedagogy in Hong Kong* Carlos Soto, 2019-09-06 This book chronicles the author's application of critical pedagogy in Hong Kong secondary schools serving students from working-class families of South Asian heritage, so-called 'ethnic minorities' in the local context. Soto used concepts such as banking pedagogy, generative themes, liberatory dialogue, and transformative resistance, to first understand students' school, online, and community experiences, and then to reshape his teaching of English and humanities subjects to address the students' academic, social, and emotional needs. This critical ethnography is set against educational reforms in Hong Kong, which re-orientated schools towards developing a knowledge-economy workforce, increased privatization and competition in the school system, aimed to build national identification with China, and sought to address growing inequality in a territory known for wealth disparity. While these reforms opened opportunities for implementing student-centered pedagogies in schools and increased student access to tertiary education, ethnic minority youth faced ongoing economic and social marginalization on top of academic difficulties. The central narrative captures everyday struggles and contradictions arising from intersections of neoliberal reforms, institutional school histories, students' transnational realities, and collective efforts for equity and social justice. In the course of the book a parallel story unfolds, as the author explores what it means to be a critical teacher and researcher, and is reborn in the process. The book's 'on the ground' story is hopeful, yet tempered, in discussing the limits and possibilities for critical pedagogy. It will be of a great resource for researchers, teacher educators, and pre-service and in-service teachers who are interested in the topic.

teacher falls in love with student movie: The Teacher Wars Dana Goldstein, 2014-09-02 In her groundbreaking history of 175 years of American education, Dana Goldstein finds answers in the past to the controversies that plague our public schools today. Teaching is a wildly contentious profession in America, one attacked and admired in equal measure. In *The Teacher Wars*, a rich, lively, and unprecedented history of public school teaching, Dana Goldstein reveals that teachers have been similarly embattled for nearly two centuries. From the genteel founding of the common schools movement in the nineteenth century to the violent inner-city teacher strikes of the 1960s and '70s, from the dispatching of Northeastern women to frontier schoolhouses to the founding of Teach for America on the Princeton University campus in 1989, Goldstein shows that the same issues have continued to bedevil us: Who should teach? What should be taught? Who should be held accountable for how our children learn? She uncovers the surprising roots of hot button issues, from teacher tenure to charter schools, and finds that recent popular ideas to improve schools—instituting merit pay, evaluating teachers by student test scores, ranking and firing veteran teachers, and recruiting “elite” graduates to teach—are all approaches that have been tried in the past without producing widespread change. And she also discovers an emerging effort that stands a real chance of transforming our schools for the better: drawing on the best practices of the three million public school teachers we already have in order to improve learning throughout our nation’s classrooms. *The Teacher Wars* upends the conversation about American education by bringing the lessons of history to bear on the dilemmas we confront today. By asking “How did we get here?” Dana Goldstein brilliantly illuminates the path forward.
