**teacher gift craft ideas:** *Cultivating Dialogue, Language, and Literacy for Social Justice in Teacher Education* Adam Devitt, 2025-07-22 Within sociocultural traditions, language, dialogue, and social literacies play an institutional role in learning and human development. Discourse practices, however, go far beyond the traditional focus of using speaking and listening to support the learning of content knowledge. Teacher discourse practices ought to promote critical literacies and linguistic practices, and promote anti-racism and social and environmental justice. Classroom discourse, however, is missing from teacher education programs on a large scale in these significant ways. Teacher educators need to understand the social and political policies, pedagogical role, and multitude of practices for helping pre-service teachers and teacher practitioners learn to acquire and facilitate quality discursive practices in K-12 schools and understand related pedagogy. This book, 'Cultivating Dialogue, Language, and Literacy for Social Justice in Teacher Education', offers a variety of models for integrating discourse practices and pedagogies into the field of teacher education, including pre-service teaching, professional development, and even critiques on policy and subsequent affordances and consequences that inhibit or promote the quality of teacher discourse and the purposes for which teachers utilize classroom discourse. I would recommend this book for teacher education programs as well as professional developers who work with pre- and in-service teachers. Additionally, I recommend this book for researchers committed not only to classroom discourse analysis, but to promote speaking and listening among teachers and students in ways that enhance learning and development.

**teacher gift craft ideas: Do You Know What You Look Like?** Jack Levy, 2005-08-15 Much of the work in this book has originated from an international project called Education for Teachers. Educational researchers from Holland, USA, Australia and Israel look at an important element of teacher behaviour - that is the interpersonal actions which create and maintain a positive classroom atmosphere. The book uses systems theory and family therapy to analyze what happens in classrooms, looking at classes as big families. It provides a simple way to collect feedback from participants in communication in education (students, teachers, principles, student-teacher supervisors). Thus for example, differences between students' perceptions and the teachers self-perception of the teacher communication style are are formed. This feedback can be used to improve teaching. The book reviews research on communication styles of teachers in secondary education with the help of the questionnaire on teacher interaction and includes implications for teacher programs.
