Theoretically robust and guided by the author's near 40 years of experience as an educationalist, this research-informed book offers an account of the practices and principles that underpin effective teacher education for special educational needs and disability (SEND). At a time when urgent questions around equity are being discussed on the global stage, this book will be of interest to scholars, researchers, and postgraduate students in the fields of inclusion and special education, teacher education, and the theory of education more broadly. teacher travel opportunities summer 2024: The Right Kind of White Garrett Bucks, 2024-03-19 A "deeply revealing and vulnerable memoir" (Kate Schatz, New York Times bestselling coauthor of *Do the Work*) that earnestly reckons with whiteness and explores how understanding one's own white identity can create the racial accountability needed in the national discourse. As the product of progressive parents and a liberal upbringing, Garrett Bucks prided himself on the pursuit of being a "good white person." The kind of white person who treats their privilege as a responsibility and not a burden; the kind of white person who people of color see as the peak example of racial allyship; the kind of white person who other white people might model their own aspirations of being "better" after. But it's Buck's obsession with "goodness" that prevents him from building meaningful relationships, particularly those who look like him. *The Right Kind of White* charts Buck's intellectual and emotional odyssey in his pursuit of this ideal whiteness, the price of its admission, and the work he's doing to bridge the divide from those he once sought distance from.

teacher travel opportunities summer 2024: Work Less Jon Peirce, 2024-01-02 You can't have a healthy economy with an unhealthy work force. Work Less proposes ways to reduce work hours and keep workers happier, healthier, and more productive. Recent years have revealed just how stressed out many workers are. While the trend to longer hours has been developing for several decades, the trend's effects have been aggravated during the pandemic by the growing use of Zoom and other new technologies for meetings with clients, customers, and co-workers. Exhausted and fed up, today's workers are starting to insist on shorter hours and greater flexibility as to where they do their work. There is growing consensus that the forty-hour week, the norm since the 1940s, has outlived its usefulness. And there is an urgent need for new work schedules that adequately reflect the far greater intensity of work today, as well as the greater family demands on a labour force made up of almost fifty percent women, who bear the brunt of domestic duties. Work Less offers practical scheduling suggestions to employers and workers and numerous policy options for government policy-makers to improve working conditions.
