teacher salary in san antonio texas: Living in God's Providence: History of the Congregation of Divine Providence of San Antonio, Texas, 1943-2000 Mary Christine Morkovsky, CDP, 2009-06-29 In 1943 the bell attached to a rope on both floors of a plain box-like convent in Houston, Texas, rang at 5 a.m. The nine Sisters of Divine Providence stationed at the grade school arose, reciting aloud the traditional prayer that began "Live, Jesus, in my heart! My God, I give you my heart. Mercifully deign to receive it and grant that no creature shall possess it but Thou alone." Continuing to pray aloud for five more minutes, the Sisters who shared small bedrooms began to dress. All had developed in their novitiate a rhythm for this process, which launched each day in a uniform way. Over 20 items of dress had to be donned in a certain order. Before Morning Prayer at 5:25 in the small chapel on the first floor, the Sisters also stripped their single beds, flipped the thin mattresses, and replaced the bed linens, trying not to invade a companion's limited space. Usually it was still dark outside when they started to recite morning prayers unique to the Congregation. This was followed by chanting in Latin on one tone Matins, Lauds, Prime, Tierce, Sext, and None from the Little Office of the Blessed Virgin Mary. Then the superior read aloud some points for reflection, and the Sisters meditated in silence for half an hour. This was the first time of the day they had some relatively unstructured time, and they sometimes experienced "distractions." Perhaps they planned how to teach something better or recalled problematic students. At 6:30 one of the parish priests offered Mass, which was followed by breakfast. The Sisters ate in silence while one of them read passages from the Imitation of Christ. By 8 a.m. they were leading their pupils across the playground to the children's daily Mass in the parish church. In sharp contrast, in 1990 Sister Mary Walter Gutowski, CDP, one of two Sisters living in a small apartment, was the administrator of Our Lady of Guadalupe clinic for low income Latinos and African Americans in Rosenberg, Texas. Sister Walter, who was credited with having delivered more than 3,000 babies under difficult rural circumstances, once remarked, "When someone knocks at my door in the middle of the night, I get dressed in two minutes flat because I never know what will be waiting for me outside."1 What explains this dramatic change of style and ritual in the routines of Catholic Sisters living in mission houses? How did the Sisters move from cloisters to apartments? How did the rigid routines of the nine Sisters of 1943 transmute into the singular and unstructured life of Sister Mary Walter? What are the connections between the bell that rang at five in the morning and the one that sounded at any hour? This history examines the period of 1943 to 2000, an era during which the Sisters of Divine Providence redefined their perspective and practices within the context of a changing American Catholic church. It demonstrates that the Sisters were well situated to embrace the shifting demands of religious mission because their very heritage was grounded in ongoing transformations. Those transformations were played out on a highly charged stage of oppression concerning multi-racial relationships, one that further prepared the Sisters for the intense dynamics of modern church life. When the Sisters celebrated in 1966 the centennial of their arrival in Texas, they were staffing their own college, high schools, and numerous grammar schools in several states as well as hospitals, clinics, and neighborhood centers. They had

incorporated a group of women from Mexico and encouraged the independence of a new Providence congregation in the U.S. Responding to Vatican encouragement, after the second Vatican Council they began experiments to update structures and customs so as minister more effectively. The most visible were in the areas of community living and governance and were accompanied by greater collegiality, subsidiarity, variety in prayer

teacher salary in san antonio texas: *Public School Teacher Cost Differences Across the United States* Jay G. Chambers, William J. Fowler, 1995 This document presents findings of a study that used a hedonic wage model to develop a national, geographical teacher cost index (TCI). The research sought to extend the analysis of teacher compensation to include not only variables that reflect the geographic cost-of-living, but also the amenities of the labor markets in which the public school districts are located. Hedonic considerations are those factors that attract workers to an area. The result was an estimated average teacher-salary cost index for each state and for regions in each state. The research drew on a sample of 40,484 public school teachers derived from the Schools and Staffing Survey (SASS) database for 1990-91. The study examined: (1) discretionary factors--the effects of teacher and job characteristics on patterns of variation in teacher salaries; (2) cost factors--the regional and school-district characteristics beyond local control; and (3) teacher cost differences by the type of school district. The TCI model was also compared with two alternative models. The data show a salary difference that favored males; some evidence points to lower salaries being paid to minorities of the same gender. Teachers with higher degree levels received higher salaries. Larger districts in more urbanized settings tended to pay higher teacher salaries for teachers with the same qualifications. The average TCI tended to be lowest in southern states and highest in northeastern states. Large urban school districts tended to have higher teacher costs. Finally, compensating differentials are necessary to attract teachers to remote regions. In conclusion, the TCI includes important factors beyond the costs of living that should be considered in examining how much more or less it costs to recruit and employ comparable teachers. Appended are technical notes; descriptive statistics and parameter estimates variables included in teacher salary regressions; and standard errors. Contains 48 references. (LMI)

teacher salary in san antonio texas: *St. Philip's College* Marie Pannell Thurston, 2013-01-06 In 1898, St. Philip's Normal and Industrial School opened its doors in San Antonio, offering sewing classes for black girls. It was the inaugural effort in a program, founded by the West Texas diocese of the Episcopal Church, to educate and train former slaves and other African Americans in that city. Originally tied to St. Philip's Church, about three miles east of the downtown center, the school grew to offer high school and then junior college courses and eventually affiliated with the San Antonio Independent School District and San Antonio College. One of the few remaining historically black junior colleges in the country, St. Philip's, whose student body is no longer predominantly black, has also been designated a Hispanic-serving institution, one of few schools to bear both designations. Known by many as "the school that love built," St. Philip's College claimed in its 1932 catalog, "There is perhaps as much romance surrounding the development of St. Philip's Junior College as there is of the 'Alamo City' in which it is located." That love story, also containing dominant strains of sacrifice, scarcity, creativity, determination, and pride, finds its full expression in this history by Marie Pannell Thurston. Based on archival research and extensive interviews with current and former alumni, faculty, and friends, St. Philip's College presents the

heartwarming and inspiring record of a school, the community that nurtures it, and the collective pride in what the institution and its graduates have accomplished.

teacher salary in san antonio texas: Changing Politics of Education Michael Fabricant, Michelle Fine, 2015-11-17 The authors persuasively argue that the present cascade of reforms to public education is a consequence of a larger intention to shrink government. The startling result is that more of public education's assets and resources are moving to the private sector and to the prison industrial complex. Drawing on various forms of evidence-structural, economic, narrative, and youth-generated participatory research-the authors reveal new structures and circuits of dispossession and privilege that amount to a clear failure of present policy. Policymaking is at war with the interests of the vast majority of citizens, and especially with urban youth of color. In the final chapter the authors explore democratic principles and offer examples essential to mobilizing, in solidarity with educators, youth, communities, labor, and allied social movements, the kind of power necessary to contest the present direction of public education reform.

teacher salary in san antonio texas: *Dismantling Contemporary Deficit Thinking* Richard R. Valencia, 2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias. It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning. *Dismantling Contemporary Deficit Thinking* provides comprehensive critiques and anti-deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking. *Dismantling Contemporary Deficit Thinking* examines the ongoing social construction of deficit thinking in three aspects of current discourse - the genetic pathology model, the culture of poverty model, and the at-risk model in which poor students, students of color, and their families are pathologized and marginalized. Richard R. Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation's public schools. Valencia also discusses a number of proactive, anti-deficit thinking suggestions from the fields of teacher education, educational leadership, and educational ethnography that are intended to provide a more equitable and democratic schooling for all students.
