teacher secret santa ideas: The Best-Kept Teaching Secret Harvey Daniels, Elaine Daniels, 2013-10-11 Your fast-track to student engagement Everywhere Smokey Daniels goes--every school he visits, every workshop he leads, every keynote he gives--there's one teaching strategy that teachers embrace above all others. That single method for transforming students from passive spectators into active learners . . . for evoking curiosity, inspiring critical thinking, and building powerful writers along the way. Now, with Elaine Daniels as Smokey's coauthor, that best-kept teaching secret is revealed to teachers at large: Written Conversations. Just what make Written Conversations so potent? An ongoing, thoughtful correspondence between students, and between students and their teachers, Written Conversations, above all else, catch and ride the wave of social interaction, which in turn makes school matter to kids. It's that simple. Structure by structure, from beginning to end, Smokey and Elaine describe four variations of these silent writing-to-learn discussions, during which all students in a classroom think and talk at once in writing, instead of one at a time out loud. How Written Conversations Work It all starts with mini-memos, short student letters that teachers use to introduce, extend, and assess class work. Then come dialogue journals, where pairs dive deeply into academic subjects. Next, groups of three or four students join in extended written discussions called write-arounds. Finally, kids take their thinking online, where they enjoy digital discussions with partners from their own classroom--and with kids from around the world. . . . all the while, you are supported by detailed descriptions of each structure, lessons, and annotated student samples--making this the most practical teaching book in recent memory. What kid wouldn't want to refine written argument skills, clarify a point, or defend another's viewpoint, when the audience is people who matter? And Yes, Written Conversations align with the Common Core Standards for writing, reading, language, and speaking and listening, taking students well

beyond the standards themselves.

This book provides one, and describes how fully integrating technology would dramatically benefit 21st-century schools. Web 2.0 and its associated tools have the power to substantially increase student achievement. This book has two straightforward primary purposes: to detail the research-based reasons classroom teachers fail to incorporate Web 2.0 tools into their instruction and collaboration with other educators; and to provide actionable strategies to rectify these omissions. The Secret Reasons Why Teachers Are Not Using Web 2.0 Tools and What School Librarians Can Do about It provides authoritative definitions of Web 2.0, explains the types of Web 2.0 tools suited for use in educational settings, examines the research-based reasons they are underutilized, and offers strategies for school librarians to model the use of technology-enabled tools—and for teaching others to do so. teacher secret santa ideas: Composing a Teacher Study Group Richard J. Meyer, With Linda Brown, Elizabeth DeNino, Kimberly Larson, Mona McKenzie, 2013-10-18 There has been a flurry of writing about teachers as inquirers and researchers as well as books about children as inquirers. This volume brings these two areas together -- teachers and students are inquiring at Ridgeway Elementary School. It demonstrates the importance of thought collectives as forums for student and teacher learning. The children in the primary classrooms in this book are working to understand the world around them and their place in it as literate individuals. Their teachers are studying themselves and the students. No other book describes the way this work affects children, teachers, and the ethos of the school in which the work occurs. In that sense, this book is groundbreaking in that it is an honest portrayal of the joys and sorrows, the successes and the stumbling blocks, the clear vision, and the obfuscating that teachers live as they enact a life of asking questions, being curious, wandering, and wondering. Acknowledging and honoring the many faces of inquiry in schools, this book demonstrates the children's inquiry, their teachers' inquiry, and the place of that inquiry in schools. It lays out the ways in which inquiry is fundamental to teaching and learning in a democracy in which all of the members of the community have a voice in deciding curricular directions and ways of presenting learning. Teachers are presented as thinkers and learners, not merely as technicians enacting others' views of what is to be learned and when.

Readers will find teachers dealing with the real issues of life in schools; they will see how teachers can use their existing situations as points of departure for their growth and their students' learning.

teacher secret santa ideas: A Drop of Light Liz Attwell, 2020-04-04 A-ha! Working through a topic or question, a shaft of sudden inspiration hits. The cloud of fragmented ideas and thoughts clear as a whole picture begins to form coherently in your mind. What you have now worked out – in an unexpected, exciting eureka moment – will stay with you forever. All teachers seek this experience for their students. Liz Attwell explores theories of education to argue that traditional teaching, 'filling buckets', must be replaced by dynamic, progressive teaching that promotes active learning – not just 'lighting a fire', but knowing how to lay the sticks and finding the matches too. This progressive approach seeks to create a basis for inner awakening and original insight, in order for students ultimately to come to their own a-ha moments. In A Drop of Light, Liz Attwell presents her original research into the phenomenon of a-ha moments, offering a theoretical background as well as practical advice to give teachers the tools, lesson plans, anecdotes and inspiration to bring living thinking to their own classrooms. Goethe's approach and Rudolf Steiner's pedagogical ideas make an important contribution, but Attwell advises that teachers following Steiner's philosophy should enter into dialogue with educators from other backgrounds. Working together, enlightened teachers around the world can help schools and colleges to become true learning communities.
