teacher thank you cards for students: School-based Partnerships in Teacher Education Linda Hobbs, Coral Campbell, Mellita Jones, 2018-08-14 This book demonstrates school-based approaches to primary science teacher education. The models used involve partnerships between universities and primary schools to engage pre-service primary teachers in classroom teaching and learning that effectively connects theory with practice separate to the formal practicum arrangements. The book is a culmination of the research and collaboration of researchers from five Australian universities involved in the Science Teacher Education Partnerships with Schools (STEPS) project, funded by the Australian Government Office for Learning and Teaching. While the STEPS project focused on partnerships in primary science teacher education, a key strength of the partnership model (the STEPS Interpretive Framework) developed and explored in this book is its applicability for cross-case, national, international, and inter-state analyses of partnership practices. This is shown through a number of case studies where the STEPS Interpretive Framework is applied and evaluated in the context of other school- or learning-related partnerships. These broad-ranging analyses illustrate the relevance of the model to a range of settings, both within and outside of education.

teacher thank you cards for students: *Teachers' Work and Emotions* Kwok Kuen Tsang, 2018-10-26 Being a teacher is often thought of as an emotionally fulfilling job, with many positive experiences in watching students grow and mature. However, as Tsang's research shows, there are plenty of negative emotional experiences in this line of work as well. Given the recent attention towards mental health and well-being, this book addresses these negative experiences and provides recommendations for dealing with them. Focusing on teachers in Hong Kong, Tsang investigates the social mechanisms that arouse such negative emotional experiences, otherwise known as caam2. He asserts that these feelings are socially constructed, and it is only by understanding the causes and feelings can we begin to improve teachers' emotional well-being and teaching quality. Using a theoretical framework based on a critical review and synthesis of five existing perspectives, including labor process perspective, school administration perspective, emotional labor perspective, social interaction perspective, and teacher identity perspective, Tsang does precisely that, exploring the social process of these emotional experiences and the interplay between teacher agency and social structure. These findings go a long way in ameliorating teacher experiences all over the world.

teacher thank you cards for students: Teacher Practice Online Désirée H. Pointer Mace, 2015-04-25 Teachers know how complicated their work is. They constantly balance considerations of individual students with those of the group; they think about how past events affect today's lessons; and they constantly adapt and revise for future lessons. But few people ever get to see teachers' work in this way. The most energizing, relational, complicated, inspiring, disheartening parts of teaching remain largely invisible. Over nearly a decade at the Carnegie Foundation for the Advancement of Teaching, Désirée Pointer Mace worked with dozens of teachers across the country to “open their doors” by creating multimedia, web-based representations of teaching practice. This book describes how such multimedia representations are envisioned, documented, created, and shared and how others might engage in this process. This practical book: Examines the cutting edge of electronic-media documentation of teaching practice. Features cases studies that represent diverse grades, cultures, and contexts with both novice and veteran teachers. Provides clear examples of how multimedia representations of teaching can be used as alternative texts in teacher learning environments. Describes the positive outcomes for teachers and learners when teaching is

made public. Includes screen images of teachers' websites, as well as classrooms and children participating in projects. "[This book] is a rare find. . . . We not only learn from Pointer Mace's examples, but also get inside what we need to know to learn the power and possibilities of making our own websites, to learn from our own practice, and to secure a position in the conversation about learning from one's own teaching." —From the Foreword by Ann Lieberman, Senior Scholar, Carnegie Foundation for the Advancement of Teaching "Désirée Pointer Mace is in the vanguard of a new generation of teacher educators. This volume will become a classic reference in the emergence of a new signature pedagogy for the initial preparation and professional development of teachers." —Lee S. Shulman, Charles E. Ducommun Professor of Education Emeritus, Stanford University "The practices discussed in this book are at the cutting edge of current efforts to preserve and learn from the wisdom of expert teachers.
