teachings of the presidents: Teachings of Presidents of the Church: Joseph F. Smith The Church of Jesus Christ of Latter-day Saints, 2000 President Joseph F. Smith served for 52 years as a General Authority of the Church—as a member of the Quorum of the Twelve, as a Counselor to four Church Presidents, and for 17 years as the President of the Church. He taught the restored gospel of Jesus Christ with eloquence, tenderness, and conviction, calling for the people to “live in harmony with the designs of our Heavenly Father.” His ministry was marked by his powerful witness of Jesus Christ: “I have received the witness of the Spirit in my own heart, and I testify before God, angels and men... that I know that my Redeemer lives.” Today his messages and sermons continue to give divine direction on our path of eternal progress. Our work in this world, said President Smith, “is to do good, to put down iniquity under our feet, to exalt righteousness, purity, and holiness in the hearts of the people, and to establish in the minds of our children, above all other things, a love for God and his word.” He declared that “to be a Latter-day Saint requires the sacrifice of worldly aims and pleasures; it requires fidelity, strength of character, love of truth, integrity to principle, and zealous desire to see the triumphant, forward march of truth.” The First Presidency and Quorum of the Twelve Apostles have established the series Teachings of Presidents of the Church to help Church members deepen their understanding of gospel doctrines and draw closer to Jesus Christ through the teachings of the prophets in this dispensation. Smith, who said: “To be Latter-day Saints, men or women must be thinkers, and workers; they must be men and women who weigh matters in their minds, men and women who consider carefully their course of life and the principles that they have espoused. ... When people understand the gospel of Jesus Christ, you will see them walking straightforward, according to the word of the Lord, and the law of God, strictly in accordance with that which is consistent, just, righteous, and in every sense acceptable to the Lord.” Each chapter in this book includes four sections: (1) a statement that briefly summarizes the focus of the chapter; (2) “From the Life of Joseph F. Smith,” which illustrates the chapter’s teachings by an example from President Smith’s life or his wisdom; (3) “Teachings of Joseph F. Smith,” which presents important doctrines from his many messages and sermons; and (4) “Suggestions for Study,” which encourages personal review and inquiry, further discussion, and application to our lives today through questions.

teachings of the presidents: O Wondrous Plan J. Peter Baumgarten, 2025-07-11 The idea of predestination, which seems to have a scriptural basis, is actually a Trojan horse. While appearing to many to be a gift of grace, it is actually full of deceptions and completely inconsistent to the plan of salvation-holding that man has no free choice and that God has already selected a favored few of his children for salvation while committing the rest (most of mankind) to damnation, regardless of merit. To explore this subject with maximum clarity, I will present the doctrine of predestination in sharp relief to the true doctrines of the wondrous plan of salvation for all mankind. This presentation includes a detailed description of what the doctrine consists of, its origin and history, the scriptural authority referenced to support the doctrine, its implications, and a discussion of how and why the idea of predestination is inconsistent and at odds with the gospel of Jesus Christ. To better introduce this subject, I begin the first chapter of this book with a personal experience-an experience that heightened my own awareness of the issue.

teachings of the presidents: Administration - Unraveled, Revealing a Unified General Theory George McCleskey, 2011-12-06 Governing Authority (Board of Directors, Owner etc.) is responsible for the enterprise and should exert control of its' General Interest through Governing Objectives and to assure conformity with accepted standards of proper business conduct, customs, conventions and societies legal degrees of freedom and constraints such as laws, statutes, ordinances regulations etc. The Governing Authority should be functional and operative and not just ceremonial and must possess the capability to determine and guide the General Interest of the enterprise. They should not simultaneously serve as members of the Administration. These are mutually exclusive responsibilities and accountabilities. Governing Objectives are the means through which Governing Authority regulates and audits the compliance of Administration and Management with the General Interest of the enterprise. Ethical standards of business conduct should be specifically established through Governing Objectives. Profit should not be the only objective of the enterprise. Administration is a system of principle and process and not one of formula and numbers. It is the means through which the functions necessary to develop, operate or analyze an enterprise including those mthat use formula and numbers are accomplished. These include management, financial, accounting, manufacturing, commercial, technical, personnel, security and whatever else may be necessary for the intended purpose. Administration is useful in all manner of human society for all varieties of enterprise such as public, business, military, hospital, education etc. Its' use for the design, operation or analysis of an enterprise will yield the best possible result consistent with the abilities and diligence of the designer, operator or analyst. At least 32 principles and related processes should be consciously and appropriately considered in establishing, operating or analyzing an enterprise. Most developers, operators and analysts of enterprises are not or have not been consciously aware of the 32 administration principles and related processes. Relevant principles not consciously considered in developing and operating an enterprise will naturally, rationally and

unavoidably self-implement with random, undefined and unintentional results. Superior enterprise leadership is unlikely if based only on technical or professional on the job proficiencies without a sound philosophy of administration. An enterprise professional has a sound philosophy of administration and a broad fundamental basis for effective thinking. Bureaucracy, the name given to the hierarchical organization of specialties that results from the progressive sub-division of authority and work, is a natural, rational and unavoidable enterprise characteristic that is possessed in variably significant and substantial degrees by all formal enterprises. The more closely that Webers' ideal, monocratic bureaucracy is approximated in the design and operation of an enterprise the greater will be the ability of the Governing Authority, Administration and Management to serve the General Interest of the enterprise. Most employees will become Indifferent. They will eventually exchange their work for the available compensation and gratification and develop a benign indifference to enterprise objectives in the unilateral bargain. Administration and Management are not interchangeable. Administration delegates and distributes Authority and Objectives to Management. Management guides and directs the operation of the enterprise for the implementation of objectives through the principles of the Administrative Process. There is good regulation, bad regulation, under regulation and over regulation but there is no such condition as too much good regulation in the conduct of human affairs.

teachings of the presidents: Mormonism 101 Bill McKeever, Eric Johnson, 2015-04-14
Mormonism is one of the fastest growing religions in the world. For those who have wondered in what specific ways Mormonism differs from the Christian faith, Mormonism 101 provides definitive answers, examining the major tenets of Mormon theology and comparing them with orthodox Christian beliefs. Perfect for students of religion and anyone who wants to have answers when Mormons come calling.

teachings of the presidents: *Answering Mormons' Questions* Bill McKeever, Eric Johnson, 1983 The Church of Jesus Christ of Latter-Day Saints currently boasts millions of members, thousands of missionaries, and congregations on every continent as well as in the vast majority of the world's countries. It's clear that their influence is still growing in our communities, places of business, and in the political arena. It's also clear that Christians need to be prepared to answer questions from Mormon friends, neighbors, co-workers, and from fellow believers as well. In this updated and expanded edition of McKeever's popular and practical book, authors Bill McKeever and Eric Johnson provide ready responses to the common questions Mormons ask. With more than six decades of combined experience, the authors tackle such tough questions as: Why don't you accept Mormons as Christians? Do you believe Mormonism is a cult? If the LDS church is not true, which church is? How can you explain the many contradictions found throughout the Bible? After offering analysis and responses to these and other questions, McKeever and Johnson provide helpful appendices that summarize Mormon beliefs, provide 101 Bible references to use in conversation, and expose common logical fallacies. Originally published in the 1980s, this volume has been--and will continue to be--a classic resource to help Christians become more successful in sharing their faith with Mormons.

teachings of the presidents: *President Brigham Young's Doctrine on Deity – Vol. 1* ,
teachings of the presidents: *The Seeker's Guide to Faith* J. Peter Baumgarten, 2020-11-23
The Seeker's Guide to Faith confronts and answers the thirteen principal arguments against God that are now advanced by modern secularist movement (sometimes called New Atheism) using the powerful insights and teachings of The Church of Jesus Christ of Latter-day Saints. There are many books written to encourage faith for people who are experiencing doubts about God generally. However, this book is the only one of its kind by a Latter-day Saint author that directly and specifically challenges all the main arguments against faith in God that are now aggressively asserted by the belligerent modern secular movement. Its uniqueness is enhanced by the fact that the doctrines and teachings of The Church of Jesus Christ of Latter-day Saints are used whenever

applicable to effectively answer the challenges raised by this movement. This author believes that the unique teachings and insights of the Church are better suited than those of any other faith for answering those challenges. Furthermore, the author's professional and volunteer activities have afforded him the opportunity to know and work with people of nearly all religious backgrounds, in nearly all walks of life. Recent experiences have led him to examine the reasons many apparently intelligent people reject faith. His legal background and training have aided him in spotting and understanding the weaknesses and flaws of the logical underpinnings of atheism. His Gospel upbringing as a member of The Church of Jesus Christ of Latter-day Saints has helped him see through the fog of the dogma and arguments of atheism to the "More Excellent Way" afforded by the Gospel's plan of happiness. He hopes The Seeker's Guide to Faith will help others who stand at the crossroads of their doubts to find their faith in Heavenly Father and His Son, Jesus Christ.
