This changes everything you thought you knew about innovation and strategy. In their groundbreaking book, *Human + Machine*, Accenture technology leaders Paul R. Daugherty and H. James Wilson showed how leading organizations use the power of human-machine collaboration to transform their processes and their bottom lines. They cracked the code and figured out how to customize the credit card experience by offering personalized designs, credit limits, and rewards, revolutionizing the way the credit card industry operated. Known for their ubiquitous advertising campaigns with A-list talent such as Jennifer Garner and Samuel L. Jackson, the youngest bank in the business was once turned down by every one of their competitors but has since grown to dominate the industry.
