technical writing degree masters: Writing Majors Greg Giberson, Jim Nugent, Lori Ostergaard, 2015-02-01 The writing major is among the most exciting scenes in the evolving American university. Writing Majors is a collection of firsthand descriptions of the origins, growth, and transformations of eighteen different programs. The chapters provide useful administrative insight, benchmark information, and even inspiration for new curricular configurations from a range of institutions. A practical sourcebook for those who are building, revising, or administering their own writing majors, this volume also serves as a historical archive of a particular instance of growth and transformation in American higher education. Revealing bureaucratic, practical, and institutional matters as well as academic ideals and ideologies, each profile includes sections providing a detailed program review and rationale, an implementation narrative, and reflection and prospectation about the program. Documenting eighteen stories of writing major programs in various stages of formation, preservation, and reform and exposing the contingencies of their local and material constitution, Writing Majors speaks as much to the "how to" of building writing major programs as to the larger "what," "why," and "how" of institutional growth and change.

technical writing degree masters: *Research Literacies and Writing Pedagogies for Masters and Doctoral Writers* Cecile Badenhorst, Cally Guerin, 2015-10-20 Debates about researcher education emphasise the dramatic changes facing higher education in the twenty-first century. Post/graduate students must learn often-hidden research literacies with very limited support. *Research Literacies and Writing Pedagogies for Masters and Doctoral Writers* explores the challenges students face when engaging in research writing. The chapters offer insights into effective pedagogies, ranging from direct, scaffolded instruction to peer learning, in face-to-face and online interventions. Themes extend from genre approaches, threshold concepts and publishing pedagogies through to the emotional aspects of post/graduate writing, writing groups, peer learning and relational collaborations, employing both online and digital technologies. Throughout, authors have revealed how research literacies and writing pedagogies, in situated contexts around the globe, demonstrate practices that are constantly changing in the face of personal, institutional and broader influences. With contributions from: Nick Almond, Cecile Badenhorst, Agnes Bosanquet, Marcia Z. Buell, Jayde Cahir, Mary Davies Turner, Robert B. Desjardins, Gretchen L. technical writing degree masters: Computer Games and Technical Communication

Jennifer deWinter, Ryan M. Moeller, 2016-05-23 Taking as its point of departure the fundamental observation that games are both technical and symbolic, this collection investigates the multiple intersections between the study of computer games and the discipline of technical and professional writing. Divided into five parts, Computer Games and Technical Communication engages with questions related to workplace communities and gamic simulations; industry documentation; manuals, gameplay, and ethics; training, testing, and number crunching; and the work of games and gamifying work. In that computer games rely on a complex combination of written, verbal, visual, algorithmic, audio, and kinesthetic means to convey information, technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex. The contributors to this volume bring to bear the analytic tools of the field to interpret the roles of communication, production, and consumption in this increasingly ubiquitous technical and symbolic medium.

technical writing degree masters: **Teaching Professional and Technical Communication** Tracy Bridgeford, 2018-09-21 Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication (PTC). The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. This practicum features chapters by prominent PTC scholars and teachers on rhetoric, style, ethics, design, usability, genre, and other central concerns of PTC programs. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a theoretical basis for interpreting the narrative, illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom.
