It grants operators access to VHF and UHF bands, along with limited privileges on HF bands. This license is designed for beginners who want to learn the basics of radio communication, electronics, and regulatory compliance.

Privileges and Operating Frequencies

Technician licensees have access to a wide range of frequencies primarily in the Very High Frequency (VHF) and Ultra High Frequency (UHF) spectrum. These bands are suitable for local communications, including repeater use and simplex channels. Technicians also gain limited privileges on certain High-Frequency (HF) bands, enabling global communication opportunities.

Requirements and Eligibility

There are no age or citizenship restrictions to take the Technician Class exam. Candidates must pass a 35-question multiple-choice test covering basic electronics theory, operating practices, and FCC rules. Passing this exam grants the Technician Class license, which is valid for ten years and

renewable.
