who does oliphant financial collect for: *The Oliphant* Avinoam Shalem, 2004-08-01 Setting a group of medieval carved ivory horns in the specific artistic and historical context in which they were manufactured, used and re-used, this book presents a mine of information for the study of medieval history. The first chapters explore such technical aspects as the cutting and carving of oliphants, and also the broader issues of the morphology of ivory and its availability in the Mediterranean basin in the Middle Ages. On the basis of specific carving methods and varying vocabulary of motifs, the oliphants are organized into groups and their probable sites of production are suggested. The core of this volume, however, is the attempt to place them in their specific historical context. The purpose of their mass-production, namely their patronage and original function, is explored, but also their reception and new functions in the church treasuries of Latin Europe is broadly discussed.

Case studies of Frankfurt, Johannesburg, Bangkok, Manila, Tampa, Sydney, Brussels, and Caracas provide the basis for an alternative theoretical approach to global city formation. Reconciling a market-based understanding and an agency-based understanding of global cities, this book proposes that globalization and cities are mutually constituted by the global political economy engaging with transnational and local agents. The volume proposes an alternate theoretical approach to the literature of globalization while remaining grounded in concrete discussions of key cities. Its expert contributors reconcile the conflicting ways in which two dominant paradigms, one emphasizing market forces and the other the unique actions of individuals and groups, embody our understanding of global cities. This book will be of interest to students and researchers alike, and is a perfect complement to texts in Urban Studies and Globalization.
