who owns grace management: Natural Gas and Geopolitics David G. Victor, Amy M. Jaffe,

Mark H. Hayes, 2006-06-29 By most estimates, global consumption of natural gas - a cleaner-burning alternative to coal and oil - will double by 2030. However, in North America, Europe, China, and South and East Asia, which are the areas of highest-expected demand, the projected consumption of gas is expected to far outstrip indigenous supplies. Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter-regional, cross-border gas transport infrastructures. This book investigates the implications of this shift, utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources. The contributors aim to shed light on the political challenges which may accompany a shift to a gas-fed world.

who owns grace management: Daddy Grace Marie W Dallam, 2007-11-01 "This edgy and resourceful analysis" of the early twentieth century preacher "expands our understanding of a critical period in the black church experience" (Shayne Lee, author of *T. D. Jakes: America's New Preacher*). In 1919, Charles Manuel "Sweet Daddy" Grace founded the United House of Prayer for All People—long regarded as one of the most extreme Pentecostal sects in the country. The flamboyant Grace wore purple suits with glitzy jewelry, purchased high profile real estate, and conducted baptisms in city streets with a fire hose. He was also reputed to accept massive donations from his poverty-stricken followers and use the money to live lavishly. Though Grace appeared to be the glue that held this church together, it has continued to thrive long after his death in 1960. After a period of restructuring and streamlining, the House of Prayer remains active with a national membership in the tens of thousands. In *Daddy Grace*, Marie W. Dallam offers both a religious history of the House of Prayer and an intellectual history of its colorful and enigmatic leader. Dallam examines the religious nature of the House of Prayer, the dimensions of Grace's leadership strategies, and the connections between his often ostentatious acts and the intentional infrastructure of the church itself. Furthermore, woven through the text are analyses of the race, class, and gender issues manifest in the House of Prayer structure under Grace's aegis.

who owns grace management: Leadership Unplugged J. Moore, S. Sonsino, 2003-05-23 For managers, talk is action. This ground-breaking book argues that what senior executives do should rest squarely on what they say. The logical conclusion is that organizations are a network of conversations - between employees, employers, suppliers and customers - the only thing executives can influence is the debate, discussion or dialogue they happen to be in at the moment. The authors explore how twelve global firms have tackled the art and science of strategic conversations and the book contains a range of new tools and techniques for leading effective change and implementing strategy using this philosophy.

who owns grace management: Queen Silver Wendy McElroy, 2011-04-06 When she was just eight-years-old, a little girl with the odd name of Queen Silver stunned citizens and scholars alike in pre-1920s Los Angeles by hosting six remarkable public lectures on Darwin and Einstein, sponsored by the London Society of Science. A child prodigy and the daughter of famed socialist activist Grace Vern Silver, founder of the Industrial Workers of the World (IWW), Queen Silver was the subject of Cecil B. De Mille's film *The Godless Girl*. She matured to become an international feminist, atheist, and socialist, living a remarkable and inspiring life, of which few feminists today are aware. *Queen Silver: The Godless Girl* is a fiery and profound biography of one of America's most amazing feminist thinkers, a woman who remained an active advocate of intellectual independence to the moment of her death in 1998 at the age of 86. Prolific feminist writer Wendy McElroy sympathetically chronicles the life of Queen Silver from personal interviews with her friends, published reports, letters, and a vast library of the family's personal papers. What emerges is a life like none other. A well-known thinker by the time she was 11-years-old, giving speeches titled *Pioneers of Freethought*, *The Rights of Children*, and *Science and the Workers*, Queen challenged three-time presidential candidate William Jennings Bryan to a debate on evolution (he declined); organized an atheist group at her high school; and left home at 15 to marry a doctor three-times her age, which later became the source of a highly publicized divorce. As a teenager, Queen once served as a defense lawyer for her mother and won. She founded the scholarly and well-reviewed *Queen Silver Magazine*, and overcame personal tragedy and political persecution during World War I's red scare. Queen worked as an extra in movies directed by D.W. Griffith, attended violent and controversial meetings of the IWW, and went into hiding at the advent of McCarthyism. In her later years, Queen received many freethought awards, remained active in the American Civil Liberties Union, and campaigned hard for public libraries. McElroy tells a complete story by profiling Queen's mother, lecturer and feminist writer Grace Vern Silver, whose struggles for justice in the IWW found her running for Congress, and whose personal education motivated her to inspire the genius in her daughter.

who owns grace management: A Civil Action Jonathan Harr, 2011-08-10 #1 NATIONAL BESTSELLER • NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • The true story of one man so determined to take down two of the nation's largest corporations accused of killing children from water contamination that he risks losing everything. The legal thriller of the decade. —Cleveland Plain Dealer Described as “a page-turner filled with greed, duplicity, heartache, and bare-knuckle legal brinksmanship by The New York Times, A Civil Action is the searing, compelling tale of a legal system gone awry—one in which greed and power fight an unending struggle against justice. Yet it is also the story of how one man can ultimately make a difference. Representing the bereaved parents, the unlikeliest of heroes emerges: a young, flamboyant Porsche-driving lawyer who hopes to win millions of dollars and ends up nearly losing everything, including his sanity. With an unstoppable narrative power reminiscent of Truman Capote’s *In Cold Blood*, A Civil Action is an unforgettable reading experience that will leave the reader both shocked and enlightened. who owns grace management: **Pharmaphobia** Thomas P. Stossel, 2015-04-23 For millennia, human survival depended on our innate abilities to fight pathogens and repair injuries. Only recently has medical science prolonged longevity and improved quality of life. Physicians and academic researchers contribute to such progress, but the principal contributor is private industry that produces the tools – drugs and medical devices – enabling doctors to prevent and cure disease. Heavy regulation and biology’s complexity and unpredictability make medical innovation extremely difficult and expensive. Pharmaphobia describes how an ideological crusade, stretching over the last quarter century, has used distortion and flawed logic to make medical innovation even harder in a misguided pursuit of theoretical professional purity. Bureaucrats, reporters, politicians, and predatory lawyers have built careers attacking the medical products industry, belittling its critical contributions to medical innovation and accusing it of non-existent malfeasance: overselling product value, flaunting safety and corrupting physicians and academics who partner with it. The mania has imposed “conflict-of-interest” regulations limiting or banning valuable interactions between industry and physicians and researchers and diverting scarce resources from innovation to compliance. The victims are patients suffering from cancer, dementia, and other serious diseases for which new treatments are delayed, reduced, or eliminated as a result of these pointless regulations. With breathtaking detail, Thomas Stossel shows how this attack on doctors who work with industry limits medical innovation and inhibits the process of bringing new products into medical care.
