who is credence resource management: *Understanding Human Resource Management* Ken Kamoche, 2001-04-16 * An accessible introduction to the key debates in human resource management * A fresh critique of taken-for-granted assumptions underpinning HRM * A pointer to future directions in HRM Ken Kamoche critically examines contemporary issues in the management of people. He reviews some of the significant themes that have shaped HRM as it has emerged during the course of the last century. The book identifies the definitive role of the tension between the drive for organizational performance and the 'humanization' of work. It argues, however, that our understanding of both strands is inadequate and poorly researched, leading to an incomplete picture of the dynamics of managing people. *Understanding Human Resource Management* also examines the relevance of such contemporary debates as the resource-based view, appropriation and globalization, and explores how researchers and practitioners can now move towards a more viable conception of HRM. '...excellent coverage of the essential areas in human resource management today: contemporary human resource management, strategic HRM, and international HRM...a very readable and concise treatment...it is easy to highly recommend this book.' Professor Randall S. Schuler, Rutgers University 'At last a genuinely original new book on HRM that deals with the concerns of the 21st rather than the last century. Ken Kamoche unpacks some fascinating ideas about appropriation, the community concept and facilitating resourcefulness. He is to be congratulated on a real tour de force. A book not to be missed by anyone taking a critical perspective on HRM.' Professor Karen Legge, University of Warwick

It also gives voice to a number of contemporary issues – reverse knowledge flows, skill supply strategies, employer branding, e-enablement, outsourcing, global

networks – that now need to be accommodated within the field. Lepak who was the Berthiaume Endowed Chair of Business Leadership in the Isenberg School of Management at the University of Massachusetts Amherst. Professor Lepak was an internationally renowned HRM scholar who believed in giving back to his profession and was committed to introduce his research findings to students as well as the business community. In addition to being a tribute to Professor Lepak and his work, this volume aims to help organizations and managers understand how to use human resource management to benefit employees while achieving organizational effectiveness. The chapters in this volume focus on strategic management of human capital resources, strategic HRM and multilevel HRM —areas of research that were central to Professor Lepak's academic contributions. These chapters together provide important theoretical and practical implications for understanding how organizations can use HRM to generate and utilize their strategic human capital resources and how HRM interacts with internal and external factors to influence important employee and organizational outcomes. The chapters in this book were originally published as a special issue of The International Journal of Human Resource Management.

who is credence resource management: Revisiting Integrated Water Resources Management Cecilia Tortajada, 2017-10-02 The book includes seventeen excellent researched and documented papers that reflect the diversity of thought, ideas and experiences related to IWRM. They draw from an extensive, inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local, basin, regional and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal, policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation and the reasons why that has been the case; reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery; and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the International Journal of Water Resources Development.
