why do we study literature: Why Study Literature? Jan Alber, Kraglund, Rikke Andersen Kraglund, Stefan Iversen, Louise Brix Jacobsen, Reestorff, Camilla Møhring Reestorff, Nielsen, Henrik Skov Nielsen, 2011-10-11 This book presents new ways of thinking about the historical, epistemological and institutional role of literature, and aims at providing a theoretically well-founded basis for what might otherwise be considered a relatively unfounded historical fact, i.e. that both literature and the teaching of literature hold a privileged position in many educational institutions. The contributors take their point of departure in the title of the volume and use narratological, historical, cognitive, rhetorical, postcolonial and political frameworks to pursue two separate but not necessarily related questions: Why literature? and, Why study? This collection brings together theoretical studies and critical analyses on literature as a medium among, and compared to, other media and includes essays on the physical and mental geography of literature, focusing on the consequences and values of its reading and studying.

why do we study literature: *The Teaching of Geometry* David Eugene Smith, 1911

why do we study literature: Brown on Brown Frederick Luis Aldama, 2009-07-21 Common conceptions permeating U.S. ethnic queer theory tend to confuse aesthetics with real-world acts and politics. Often Chicano/a representations of gay and lesbian experiences in literature and film are analyzed simply as propaganda. The cognitive, emotional, and narrational ingredients (that is, the subject matter and the formal traits) of those representations are frequently reduced to a priori agendas that emphasize a politics of difference. In this book, Frederick Luis Aldama follows an entirely different approach. He investigates the ways in which race and gay/lesbian sexuality intersect and operate in Chicano/a literature and film while taking into full account their imaginative nature and therefore the specific kind of work invested in them. Also, Aldama frames his analyses within today's larger (globalized) context of postcolonial literary and filmic canons that seek to normalize heterosexual identity and experience. Throughout the book, Aldama applies his innovative approach to throw new light on the work of authors Arturo Islas, Richard Rodriguez, John Rechy, Ana Castillo, and Sheila Ortiz Taylor, as well as that of film director Edward James Olmos. In doing so, Aldama aims to integrate and deepen Chicano literary and filmic studies within a comparative perspective. Aldama's unusual juxtapositions of narrative materials and cultural personae, and his premise that literature and film produce fictional examples of a social and historical reality concerned with ethnic and sexual issues largely unresolved, make this book relevant to a wide range of readers.

why do we study literature: Before Austen Comes Aesop Cheri Blomquist, 2021-05-10

Before Austen Comes Aesop presents an in-depth examination of the Children's Great Books, that is, the literature that has made the most profound impact on the lives of children throughout Western history. In addition to its invaluable chronological list of titles, from ancient times to the present, the book provides both students and their parents the guidance they need to read leisurely or study formally the Children's Great Books at home. The book's premise is that children often do not spend enough time with the literature written or adapted for them before diving into adult works. An experienced teacher, the author argues that children benefit in many ways from lingering longer over literature created for them. The Children's Great Books list includes the classic works that, while not written strictly for children, were orally passed on to them for generations and are foundational for understanding Western culture. These works include Greek and Roman fables, myths, and epics; European legends, sagas, folk stories, and fairy tales; and the Bible. The list also includes the acclaimed works written specifically for children, beginning in the age of the first printing presses and continuing into the late twentieth century. Additionally, acknowledging the changes in children's literature that have occurred since the mid-1960s, the author provides helpful information for discerning which contemporary influential books are appropriate, or perhaps inappropriate, for one's children. She also includes several appendices that are useful for the study of literature at both the elementary and the secondary levels.

why do we study literature: Why Do We Hurt Ourselves? Baptiste Brossard, 2018-06-14 A sociological analysis of self-injury, the causes of it, and the conditions surrounding those who commit it. Why does an estimated 5% of the general population intentionally and repeatedly hurt

themselves? What are the reasons certain people resort to self-injury as a way to manage their daily lives? In *Why Do We Hurt Ourselves*, sociologist Baptiste Brossard draws on a five-year survey of self-injurers and suggests that the answers can be traced to social, more than personal, causes. Self-injury is not a matter of disturbed individuals resorting to hurting themselves in the face of individual weaknesses and difficulties. Rather, self-injury is the reaction of individuals to the tensions that compose, day after day, the tumultuousness of their social life and position. Self-harm is a practice that people use to self-control and maintain order—to calm down, or to avoid “going haywire” or “breaking everything.” More broadly, through this research Brossard works to develop a perspective on the contemporary social world at large, exploring quests for self-control in modern Western societies.
