women history month colors: *The Risk It Takes to Bloom* Raquel Willis, 2023-11-14 A passionate, powerful memoir by a trailblazing Black transgender activist, tracing her life of transformation and her work towards collective liberation. In 2017, Raquel Willis took to the National Women’s March podium just after the presidential election of Donald Trump, primed to tell her story as a young Black transgender woman from the South. Despite having her speaking time cut short, the appearance only deepened her commitment to speaking up for communities on the margins. Born in Augusta, Georgia, to Black Catholic parents, Raquel spent years feeling isolated, even within a loving, close-knit family. There was little access to understanding what it meant to be queer and transgender. It wasn’t until she went to the University of Georgia that she found the LGBTQ+ community, fell in love, and explored her gender for the first time. But the unexpected death of her father forced her to examine her relationship with herself and those she loved. These years of grief, misunderstanding, and hard-won epiphanies seeped into the soil of her life, serving as fertilizer for growth and allowing her to bloom within. Upon graduation, Raquel entered a career in journalism against the backdrop of the burgeoning Movement for Black Lives, intersectional feminism going mainstream, and unprecedented visibility of the trans community. After hiding her identity as a newspaper reporter, her increasing awareness of the epidemic of violence plaguing trans women of color and the heightened suicide of trans teens inspired her to come out publicly. Within just a few short years of community organizing in Atlanta, Oakland, and New York, Raquel emerged as one of the most formidable Black trans activists in history. In *The Risk It Takes to Bloom*, Raquel Willis recounts with passion and candor her experiences straddling the Obama and Trump eras, the possibility of transformation after tragedy, and how complex moments can push us all to take necessary risks and bloom toward collective liberation.

women history month colors: A Cultural History of Color in the Age of Industry Alexandra Loske, 2022-08-31 A Cultural History of Color in the Age of Industry covers the period 1800 to 1920, when the world embraced color like never before. Inventions, such as steam power, lithography, photography, electricity, motor cars, aviation, and cheaper color printing, all contributed to a new exuberance about color. Available pigments and colored products - made possible by new technologies, industrial manufacturing, commercialization, and urbanization - also greatly increased, as did illustrated printed literature for the mass market. Color, both literally and metaphorically, was splashed around, and became an expressive tool for artists, designers, and writers. Color shapes an individual's experience of the world and also how society gives particular spaces, objects, and moments meaning. The 6 volume set of the Cultural History of Color examines how color has been created, traded, used, and interpreted over the last 5000 years. The themes covered in each volume are color philosophy and science; color technology and trade; power and identity; religion and ritual; body and clothing; language and psychology; literature and the performing arts; art; architecture and interiors; and artefacts. women history month colors: Sister Style Nadia E. Brown, Danielle Casarez Lemi, 2021-01-19 They don't think I'm viable, because I'm a Black woman with natural hair and no husband. This comment was made by Stacey Abrams shortly before the 2018 Democratic primary after she became the first Black woman to win a majory party's nomination for governor. Abrams' sentiment reflects the wider environment for Black women in politics, in which racist and sexist cultural ideas have long led Black women to be demeaned and fetishized for their physical appearance. In Sister Style, Nadia E. Brown and Danielle Casarez Lemi argue that Black women's political experience and the way that voters evaluate them is shaped overtly by their skin tone and hair texture, with hair being a particular point of scrutiny. They ask what the politics of appearance for Black women mean for Black women politicians and Black voters, and how expectations about self-presentation differ for Black women versus Black men, White men, and White women. Black women running for office face pressure, often from campaign consultants and even close colleagues, to change their style in order to look more like White women. However, as this book shows, Black women candidates and elected officials react differently to these pressures depending on factors like age and incumbency. Moreover, Brown and Lemi delve into the ways in which Black voters react to Black female candidates based on appearance. They base their argument, in part, on focus groups with Black women candidates and elected officials, and show that there are generational differences that

determine what sorts of styles Black women choose to adopt and to what extent they change their physical appearance based on external expectations.
